THE PEDAGOGS GATHERED

EDUCATIONAL MEETINGS HELD IN EAST TODAY

Associations Assembled in Syracuse
N. Y.—Topeka Has a Gathering of Teachers—Cleveland Has a Conference—Various Sessions in Other Places.

Syracuse, N. Y., Nov. 28.—The Association of Colleges and Preparatory Schools of the middle states and Maryland began its fifteenth annual session at Syracuse University today with many noted educators in attendance. Professor James H. Robinson of Columbia University opened the morning session with a paper on "The Elective System and a Liberal Education." The features of the afternoon was the presentation of a paper by President Eliot of Harvard on "Freedom in Speech in Connection with Education." In the discussion following the reading of the papers President Faunce of Brown University, President Stryker of Hamilton College, President Schurman of Cornell University and President Rhee of Rochester University took part.

Educational Matters Discussed.
Topeka, Kan., Nov. 28.—Several hundred teachers in private schools, business colleges and other special branches are attending the annual meeting of the Special Teachers' Federation of Kansas which began its sessions in Topeka today.

At the formal opening of the gathering the teachers were welcomed by Professor W. H. Wasson of Fairville to whose address response for the visitors was made by Mrs. C. T. Smith of Kansas City. These formalities over the teachers took up the discussion of the advantages and disadvantages of specialization, the business college outlook, business penmanship, touch typewriting and other subjects relating to their work. The convention will continue its sessions tomorrow.

Important Educational Conference.
Cleveland, O., Nov. 28.—The second annual conference of the collegiate and secondary school instructors of eastern Ohio and western Pennsylvania opened this morning at Western Reserve University. After an address of welcome by President Thwing of Western Reserve University the educators entered into a symposium discussion of the question, "What Has the Secondary School a Right to Expect From the College?" Among those taking a prominent part in the discussion were D. C. Rybolt of Akron, Superintendent W. L. McGowan of Warren, Pa., J. Rouse Bishop of Cincinnati and C. E. Lord of Franklin, Pa.

Kentucky Teachers.
Henderson, Ky., Nov. 28.—There was a good attendance today at the opening of the annual meeting of the Second Congressional Teachers' association. Subjects discussed during the day included the supervision of rural schools, compulsory attendance, how to secure legislation concerning education, public schools as centers of community life and subjects to be included in the ideal course of study. This evening Professor A. R. Taylor of Decatur, Ill., will address the teachers on the subject, "The Education Which Best Fits for Life."

Teachers Meet at Superior.
Superior, Wis., Nov. 28.—Teachers from Northern Wisconsin, the range towns, Dubuth and the adjoining counties were present in force today at the opening of the third annual meeting of the Lake Superior Teachers' association. A two day program has been prepared, including addresses and papers on important educational topics to be presented by men and women prominent in the profession.

Bay State Pedagogues.
Worcester, Mass., Nov. 28.—The annual meeting of the state teachers' association was held in Worcester today. Prominent among the speakers were such well-known educators as Inspector Hughes of Toronto, Principal Gulick of Pratt Institute, Supervisor Gregory of Trenton, N. J., and F. A. Hill, secretary of the Massachusetts state board of education.

National Aid for Valley Forge.
Philadelphia, Nov. 28.—It is more than likely that at the coming session of congress a bill will be introduced to provide for the preservation of the famous camping ground at Valley Forge. The Valley Forge National Park association has had the matter under advisement for some time, and it is said will ask for \$250,000, the amount needed to purchase the entire field and restore it to the condition it was in when first occupied by the continental army. The first fall meeting will be held at the Hotel Bellevue this evening, and plans will then be completed to interest every member of congress in the project.

Heavy Equipment Orders.
Chicago, Nov. 28.—Contracts for the equipment and rolling stock placed by western and southern railroads during the past two weeks run up to a total seldom if ever equalled for a like period. The Great Northern has ordered forty locomotives, the Mexican Central fifteen, the Lake Shore twenty-five and the Atchison Topeka & Santa Fe one hundred and twenty. Numerous smaller orders are also reported from other roads.

Against Child Insurance.
Montreal, Que., Nov. 28.—In view of the rapid increase in infant mortality in Montreal, the provincial board of health has asked the federal government to prohibit the issuance of insurance policies on the lives of children under ten years of age, in favor of death. After thorough investigation the board has concluded that the system of infant insurance encourages many parents to neglect their children when ill.

Ready for Labor Meeting.
Santon, Pa., Nov. 28.—Arrangements have been completed for the entertainment of the American Federation of Labor convention which is to open here the latter part of next week. Applications for accommodations indicate a large attendance of delegates. President Gompers and members of the executive board are expected to arrive tomorrow and will remain in session until the formal opening of the convention Thursday.

To Start Fight on Saloons.
Waco, Tex., Nov. 28.—Representatives of the various anti-saloon organizations of Texas are rounding up here today for an important conference. The purpose of the meeting is to develop plans for a systematic warfare against the liquor traffic. B. P. Bailey, of Houston, late prohibition candidate for governor, is the chief promoter of the movement.

HOUSER WILL START SMELTER.
Has Matters on the Tapis at the Quartzburg Properties.
United States Marshal Zoeth Houser, who has just returned from Quartzburg, where he has minor property, states that his smelter is about ready to start up at the Standard and Dixie mines, and that there is now about 100 tons of ore in the bins ready for treatment. It is intended to have on hand a few more tons when the smelter will be given an opportunity to test its capacity as well as the value of the ore. In speaking of the strike of an eight-foot vein of cobalt Mr. Houser stated that he had with him several specimens from the vein, and that it is fully as rich as reported. He thinks it will take about a week yet to get everything in readiness to start the smelter.

The Children's Friend.
For coughs, croup, bronchitis, grip, One Minute Cough Cure never fails. (C. B. George, Winchester, Ky.): "Our little girl was attacked with croup and so hoarse she could hardly speak. We gave her a dose of One Minute Cough Cure. It relieved her immediately. Next morning she had no signs of croup." Tallman & Co. and Brock & McComas.

CERTAINLY IS PETROLEUM

EXPLOITING THE MALHEUR OIL FIELDS

Experts Have Been on the Ground and Look for Some Development.

Baker City, Nov. 28.—The well-known experts and metallurgists, H. G. Pearson and J. B. Bowden, have returned from a visit of considerable extent to the Malheur basin, where they made an exhaustive examination of the oil fields and located some fine oil bearing lands in the heart of the region. Two more sanguine men never returned from fields of future glory. They say the indications are splendid and that there seems really to be not the slightest doubt that oil will be found in all kinds of quantities. Dozens and scores of experts from every oil region in the United States and Canada have visited the fields and without exception all of them have returned favorable reports to the men who have sent them in. This argues well for the future of the region. It is something that has never occurred before in the history of petroleum in this country. All other fields have detrimental reports occasionally turned in.

There has as yet no machinery arrived on the Malheur fields, but one company, known as the Hirsch syndicate, has purchased apparatus and it is now on the way. Immediately on its arrival this company will begin to sink a well.

Some Choice Lands.

The lands located by Messrs. Pearson and Cowden are in the heart of the region and are in close proximity to those of the Cascade Company, which are regarded by experts as being very choice lands. These experts say there are still considerable quantities of good land that has not yet been located and they saw crude oil flowing in appreciable quantities from seepholes in the ground on land that has no owner except the government.

The county clerk of Malheur county has over 1500 notices of oil locations that have been filed for record.

The fact that natural gas has been found in the artesian well at Ontario is regarded as a very favorable indication. Night before last the gas at Ontario burned all night, which shows that the flow is considerable and at a greater depth may prove to be something immense. Ontario is only 16 miles away from Vale and is immediately in the same sedimentary formation that extends from the Malheur basin into Idaho.

He Kept His Leg.

Twelve years ago J. W. Sullivan, of Hartford, Conn., scratched his leg with a rusty wire. Inflammation, with blood poisoning set in. For two years he suffered intensely. Then the best doctors urged amputation, "but," he writes, "I used one bottle of Electric Bitters and 1 1/2 boxes of Bucklen's Arnica Salve and my leg was sound and well as ever." For eruptions, eczema, tetter, salt rheum, sores and all blood disorders Electric Bitters has no rival on earth. Try them. Tallman & Co. will guarantee satisfaction or refund money. Only 50 cents.

Fine figured crepe paper, full 10 root-rolls 25c.

Frederick Nolf

Santa Claus Store

Special Sales this week
Drummer's sample line of knives worth 35c and 40c. Choice at 25c
