SOME NOTES FROM GOTHAM

LETTER OF GOSSIP SENT

FROM NEW YORK CITY

Some Matters of Interest Not Essentially News as Seen or Heard by a Correspondent.

New York, Dec. 7.—Already Gotham, New York City has put on her holiday dress and though the great department stores, of which there are so many are gaudy in their Yuletide decorations, the office buildings and private residences happily suggest the approach of Christmas by the wreaths of green cedar tied with ribbons which are beginning to appear in the windows.

There are many very artistic novelties displayed for the benefit of those who would make presents, not the least attractive of which are the McKinley valentines. These bear a very striking likeness of the late lamented William McKinley with appropriate scroll work and the first words of his favorite hymns printed beneath the picture.

Colonel John S. Partridge, who has been selected by Mayor-elect Low to succeed Colonel Michael C. Murphy as police commissioner of New York City, is a man of wide business experience as well as political. He is at present state public works superintendent and was recommended for the position by Mr. Low when the appointment was given him in 1895 by Governor Odell. It is expected that Colonel Partridge's first act in his new position which he assumes January 1, will be the pulling out of Deputy Commissioner Devery and the appointment of his successor, which predictions count for anything will be Mr. Frank Moss, an enemy of Mr. Devery's, in politics, and a conspicuous figure in the recent raids which awoke New Yorkers to the actual situation of affairs. Colonel Partridge is very domestic in his habits, loves his home, his books and his horses. His favorite study is history and his favorite recreation is horseback riding, at both of which he spends many hours.

Apropos things political, it may be mentioned that the success of the voting machine used in Brooklyn in the recent election, has furnished the advocates of the machine with an argument for their adoption which will be made the most of with the board of elections. At general headquarters the result of the election in which the machine was used, was known, and none of the voters experienced any difficulty in using the machine. As a matter of economy the instruments are a great success. A certain saving would be on the ballot clerks, of whom there are two to each poll. These are paid \$16 for the day—\$3 each—making \$25,152 for 1,572 polls in the city. Then the cost of printing ballots is saved. The machines cost \$500 each, and the claim is made that they will pay for themselves in five years.

It is doubtful if any event of the year sees the birth of as many fads as does the horse show. The longest lived reminder of the fashionable exhibition this year is the horse show "hand-shake." This new mannerism comes as a successor to the chin-high tug and push hand-shake and though somewhat similar in general motion, is manipulated principally from the elbow, which is held on a line with the belt and kept very rigid.

Soon the charity balls, for which Gotham is notable, will begin and those who do not get a glimpse of society at the earlier functions, will have the pleasure of seeing the society leaders of which so much is written and comparatively so little known. In spite of the great extravagance of which New York society women are accused, they conduct many worthy charities in such an unostentatious way that the outside world hears very little of them in the role of Good Samaritans. In all of the prominent families there are charitably inclined men as well as women, so that the subscription lists of the entertainments which are given for the poor, aggregate quite a snug fortune by the time they are counted.

FOUND SALMON RUNNING

INSPECTS OREGON STREAMS
SNAKE, WALLOWA, UMATILLA.

Master Fish Warden of Astoria, Ends a Trip to the Rivers of the Inland Empire.

H. G. Van Dusen, of Astoria, master fish warden, was in Pendleton during Friday evening en route home. He had come from Bingham Springs on a freight, and had been looking at the streams thereabouts, with a view to examining them to learn the conditions existing. He has been also on the Snake and Wallowa rivers, and has obtained information that will be of use to him in the prosecution of his official duties.

Mr. Van Dusen stated to the East Oregonian that he thinks there are many Oregon streams that may be improved in the interest of the fish industry, and that although in most instances it will involve much of labor, it will in the end pay for the expense and work. He learned here that salmon are running up to and above the fish rack that has been placed a mile below Pendleton in the Umatilla, but press of official business at Astoria prevented him from making close investigation. He left for home on the night train.
