ANOTHER GERM DESTROYER.

Herpicide is Death to Dandruff Germs.

The germ burrows into the scalp,
throwing up the cuticle in thin scales,
called dandruff, or scurf, and digging
at the root of the hair where it saps
the hair's vitality. First comes brittle
hair, then lusterless and dead-like
hair, then falling hair and finally bald-
ness. Ninety-nine of the hair troubles
are caused by dandruff. Without dan-
druff, hair will grow luxuriantly, as
nature intended. "Herpicide" kills the
dandruff germ leaving the hair to
grow unhampered, as it does with the
American red man.
