DISGRACE OF CIVILIZATION.

Atrocities of the Most Horrible Character in Congo Free State.
London, Jan. 4.—Capt. Guy Burrows, who has just retired from the employ of the Congo Free State government after six years service, says in an interview here with a representative of the Associated Press, that conditions prevailing in the Congo Free state are a disgrace to civilization and far worse than ever before. He pictured atrocities of the most horrible character perpetrated on the natives by officials and whites who had concessions of rubber land.
As a typical instance of the means employed by the Free State government, Capt. Burrows corroborated the statement of American missionaries to the effect that the officials employed 500 cannibals, to whom they issued rifles to massacre and capture unarmed natives who had rebelled against their brutal methods.
"I have sworn testimony," said Burrows, "of Belgians handing over to express purpose of their being eaten. Forced labor prevails everywhere and 'shot gun rule' is the truest description of the present administration."
