GENERAL NEWS

The viceroys of India telegraphed that the drouth is drying the crops in Bengal, the northwestern provinces and in Punjab. The autumn crops are fast in the Province of Sindh and in the Bombay deccan.

Bitter feeling between the two parties in the senate broke out in a very acrimonious debate and it shows that the Philippines have divided the republicans and democrats on lines fully as sharply drawn as the southern issue of the "force bill."

The Northwestern University at Evanston, Ill., which has many graduates and ex-students in the Northwest, has a new president in the person of Professor E. J. James, late of the University of Chicago. Professor James, who is 47 years of age, was born in Bloomington, Ill. He graduated at Harvard in 1874, and studied at Berlin, Leipzig and Halle.

Clarence Clowe, of Seattle, who recently arrived home from the Philippines, where he served as a private in Company H, Twenty-fifth Infantry, U. S. V., has authorized the publication of a letter, written by him to Senator Hoar from the islands June 10, 1900. Clowe asks in the letter an honorable discharge from a service that is outraging his conscience.

In a message which he transmitted to the Colorado legislature, Governor O'Connor recommended amendments with the necessary safeguards of the revenue law which has been attacked by the corporations in the courts. He advises that a new section be added to this law providing for the assessment of mining property whether productive or nonproductive.

Two thousand miles across plains and mountains was the pilgrimage that Henry M. Prouse, a discharged soldier of Oriskany, N. Y., started up on in a dry goods van Tuesday. One brief mile over cobblestones to the central police station, most of the time standing on his head, and all the time barking his shins and of bows, was the journey he really made.

PACIFIC NORTHWEST NEWS

The will of B. DeJorne, written at Thuring, France, in the French language, was filed for probate in Salem. DeJorne died in France, leaving property bequeathed to Louise Maria DeJorne.

The board of trustees of the Oregon Insane Asylum renewed the contract with the governor of Alaska for the care of insane persons from that territory. Alaska is to pay \$20 per month for each insane person taken care of.

At the annual meeting of the Baker City Chamber of Commerce the following were elected to serve as directors for the ensuing year: Fred Basche, W. J. Drowley, C. H. Breck, J. W. Patterson, S. Stragle, William Pollman and L. H. Park. The new board will meet Monday evening in elect.

There is no news of the Condor in advices received from Honolulu to January 21. 50 days after she sailed on the teeth of the heavy southeast gale of December 3. News comes by the steamer Queen City of the finding of a boat at Ahousett, believed to be one of the Condor's, and the news is also given of the finding of a life buoy and some cases of salmon on Long Beach, near Clayquot bearing the name of the salmon ship Red Rock.

Thomas Middleton, chief accountant for the Yukon territory, has committed suicide rather than face the disgrace of arrest for embezzlement. He was a native of Leeds, England. He had been missing for several days during which time a thorough examination of his accounts was made and a shortage approximating \$10,000 was discovered. A warrant was immediately served out for Middleton's arrest. He was found in an out of the way house and taken to the government offices.

TO CURE A COLD IN ONE DAY

Take laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box 25c.

TO KILL THE PESTS

Paper by E. L. Smith, of Hood River, for Fruit Growers.

Walla Walla, Jan. 30.—E. L. Smith, of Hood River, read a paper before the fruit convention here, saying in part:

The spray pump might well be adopted as the emblem of the fruit grower, and on it inscribed the old legend, "by this we conquer."

If there is any considerable fruit growing section, independent of its use, it is unknown to me, and thorough spraying has become one of the most essential factors in successful orcharding. The subject being one of prime importance, and as many discouraging results have been reported, it is well to compare experiences and inform ourselves as to those conditions that will insure success. My own experience has demonstrated that these conditions are substantially as follows:

First—The material must be an adjuvanted and of regulation strength. Time forms a part of many spraying compounds and its efficiency is greatly lessened if it becomes slack before using. I have been frequently asked as to the relative merits of Paris Green and the Arsenite of Soda for codling moth. I believe they are equally effective if properly prepared and applied.

At the Proper Time.

Second—The spraying must be done at the proper time and continued at proper intervals. For the apple moth, for the best results, spray fruit as soon as petals have fallen, and then at regular intervals of two weeks to the middle of September. I am aware that so eminent authority as Professor Spingeland holds that subsequent spraying after the two first are useless. His idea is that the calyx of the apple being cup shaped will hold sufficient poison to kill the young larvae, but that we can not coat the sides of the apple with sufficient amount to be effective. I cannot concur in this conclusion. The calyx of many varieties of apples never closes and I believe it is well to renew the poison that may have been dissipated at the eye of the apple. Again, the moth lays many eggs on the upper surface of the leaves and even the fruit itself with such amount of poison bearing time as to afford a very uncomfortable diet for the new born larvae? An opinion has prevailed among many growers that the lime itself, if not an insecticide, is at least a deterrent, and for that reason we use from 6 to 8 pounds freshly slacked to 50 gallons of water.

Late sprayings are important from the fact that the moth be never so much in evidence as between the 15th day of August and the 15th day of September.

Careful Spraying.

Third—The spraying must be done thoroughly to secure the best results. From my point of observation, on top of the spray-tank I find that there is a tendency to slight the center and highest branches of the trees by the men who guide the nozzle.

I do not hesitate to say that failures or partial failures are usually on account of the non-appliance with these indispensable conditions. If the orchard is a large one, a power pump is of great utility. There are several kinds of these pumps in use, but the most effective in my opinion, are those run with small engines, usually gasoline. These engines afford a constant and desired power, agitating the liquid thoroughly, which is especially necessary when Paris Green is used, as it is not soluble in water, and forces the spray between the leaves and into the clusters of apples far better than can be done with a hand pump. The engine must be covered, however, to protect it from the spray. This adds much to the weight of the load and requires a man with some knowledge of mechanics to keep it in order.

Gives a Formula.

Hood River apple growers, so far as I know with a single exception, use the arsenite of soda application for the moth and are using a greater proportion of white arsenic than in former years, without injury to the foliage. The past season I used the following formula:

Water, 1 gallon; white arsenic, 1 pound; sal soda, 2 pounds. Boil 15 minutes or until the liquid is clear. Add amount of water equal to that evaporated, making one full gallon of arsenicite, and use one and one-half pints to 50 gallons of water, to which must be added six pounds of fresh slacked lime. This spray has been used for the past four years with average results of 90 to 95 per cent of fruit free from moth.

In Southern Oregon equally favorable results have been attained by using Paris Green and London Purple. In Missouri quite a number favor a dry powder, claiming that it is easier and more rapidly applied. If you want to use make a powder composed of:

Lime, 10 pounds; Paris Green, 1 pound; Bordeaux, 1 pound. Apply with a powder gun when the dew is on the leaves.

For San Jose Scale and Aphid.

For scale, I cannot learn that anything has yet been discovered that is more satisfactory than the old lime sulphur and salt formula. It is encouraging to note that Professor C. L. Morlat has discovered in Central China a beetle that feeds upon the scale and that living specimens have been sent to the department of agriculture at Washington, for experimental purposes in California.

For the aphid, I have tried a number of insecticides, but get the best results with a combination of whale oil and quassia chips, using one pound of the soap and the extract from one pound of the chips to eight gallons of water.

are weeds. Unless they are kept down, they divert the nutrition which the soil provides from the growing crops and ruin their productiveness.

Diseases are to the body what weeds are to the soil. They divert the nutrition which is necessary to sound health, and the body, instead of being strong and hardy, drags out a sickly existence. When the stomach is diseased, and the other organs of digestion and nutrition are involved with it, there is a constant loss of nutrition by the body. The stomach and its allied organs are not able to convert the foods into nourishment, and hence the body and its several organs are deprived of the necessary elements of vitality. What is known as "weak heart" or "weak lungs," "weak nerves" and other forms of so-called weakness, are generally caused by "weak stomach." When the stomach and the other organs of digestion and nutrition are cured, then the other diseases are cured with it. Diseases which are caused by a diseased condition of the stomach are cured through the stomach. Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and its associated organs of digestion and nutrition. It cures through the stomach diseases of heart, lungs, liver and other organs. It increases the activity of the blood-making glands, so that the whole body is nourished by an abundant supply of pure blood, rich in the bright red corpuscles of health.

There is no alcohol in "Golden Medical Discovery" and it contains neither opium, cocaine, nor any other narcotic. It is strictly a temperance medicine.

Persons suffering from chronic forms of disease are invited to consult Dr. Pierce by letter free. All correspondence strictly private. Address Dr. R. V. Pierce, Buffalo, N. Y.

Suffered for Years.

"My gratitude to you and your 'Golden Medical Discovery' is so great," writes Mr. R. M. Martin, of Arlee, Mason Co., West Virginia, "that I am at a loss to find words to express my true feeling. I had suffered for a number of years with lung and throat troubles, and doctors with specialists, but got no better. Then I decided to try Dr. Pierce's Golden Medical Discovery, and after using it I was greatly relieved. I have all faith that it has saved my life."

Torpid Liver Cured.

"I was a sufferer from torpid liver for over a year," writes Mrs. Nora Willis, of Wheatfield, Jasper Co., Ind., "and could not sleep, nor eat but very little, and then it would cause me great distress. I tried several doctors but got no relief. Was advised by a friend to write to Dr. Pierce, which I did, and in a few days I received a letter advising me to take his 'Golden Medical Discovery' and also his 'Pleasant Pellets.' After I had taken only half a bottle I was greatly improved. I only took three bottles of the 'Golden Medical Discovery' and two vials of the 'Pellets,' and, thanks to Dr. Pierce and his wonderful medicine, I am as well as ever in my life, and feel that life is worth living after all."

"Last winter I took a severe cold which resulted in pleurisy. Tongue can not tell what I suffered. For two nights and two days I could not move without it nearly killed me. I told my husband I could not endure another night of suffering. The weather was so cold and stormy that it was almost too bad for anyone to go six miles to town, but he went and got a bottle of Dr. Pierce's Extract of Smart-Weed, which gave me instant relief. I can say that for all pains that I have tried it for it has worked like magic. We keep a bottle of the 'Smart-Weed' in the house all the time. I cannot thank Dr. Pierce enough for what he has done for me."

Constipation has almost countless consequences. Dr. Pierce's Pleasant Pellets cure constipation and cure its consequences. They should always be used with "Golden Medical Discovery," when the use of a laxative is indicated.

GAMBLING IS CLOSE

But our radical style of cut price making in our celebrated

Closing Out Sale

continues to worry competition and please thousands of contented customers.

Plenty Pants if you need them. Coats and vests if you need them—How will that suit you?

A few days now and we will take annual invoice. We are therefore anxious to close out a lot of odds and ends at sacrifice prices.

We have added the celebrated \$3.50 shoe for ladies to our extensive shoe store and as this shoe has proved such a favorite in the big towns we speak for it a hearty welcome here.

Boston Store

WHEN YOU TAKE TO COVER

BE SURE IT IS A GOOD COVER

With a pair of "Pendleton Blankets" on your bed you will be comfortable and warm during the coldest winter nights.

FOR

A pair of six pound blankets of Pendleton manufacture have been proven to be as warm as a ten pound pair of other brands.

BECAUSE

Nothing but pure FLEECE wool is used in the Pendleton Mills and they spin their yarn finer and weave their blankets closer than other mills.

PENDLETON WOOLEN MILLS

PENDLETON, OREGON.
