

THE INDIAN LANDS

SENATOR CLARK, OF MONTANA, SUSPECTS INDIAN AGENTS

Believes they are Favoring White Men at the Expense of Indians.

The news comes from Washington that the demand for a sweeping investigation of Indian agency matters is even stronger now than a week ago, when Senator Turner offered his resolution for this purpose, and if the senate committee declines to act the house is almost sure to.

Senator Clark, of Montana, who is on the Indian affairs committee, and who is thoroughly familiar with the conditions in the west, is convinced that there is a great deal of room for improvement in the matter of making leases on Indian lands for grazing or mining purposes. He also expresses himself in favor of the thorough investigation of each reservation and the character of the leases now existing.

Indian agents often sacrifice the interests of the Indians to their desire to secure valuable leasing privileges for white stock owners who have the inside track in the matter of Indian grazing lands. Outsiders' cattle are allowed to mingle with those belonging to the Indians and in the roundup many Indian cattle are branded with the leases and are thus a complete loss to the tribe which has leased the lands.

It is also the custom to make a lease with a cattle or sheepman which may give him, for instance, the right to put 5000 cattle at so much per capita upon a piece of Indian land, and then with the connivance of the agent he grazes 10,000 or 15,000 head unknown to the department and paying nothing to the Indians for the privilege.

Of course, if there is to be an investigation of the agencies, the Umatilla reservation will be included. Here the government investigators will find a very satisfactory condition of affairs and one of the best, if not the best, conducted Indian school in the United States. The finger of suspicion does not point at the Umatilla reservation.

DEATH OF MRS. RUSSELL.

Funeral Occurred Today at 2 O'clock From the Family Residence.

In the afternoon of yesterday, at her home on Lewis street, Mrs. Fannie C. Russell, wife of John E. Russell, of this city, after a brief illness, passed peacefully to the rest that knows no awakening, but which faith teaches remaineth for the people of God. Mrs. Russell was the youngest daughter of the late J. M. Campbell and Mrs. Fannie A. Campbell, who survives her. She was born in this county 29 years ago and has spent all her days in this community. Ten years ago she was happily married to John E. Russell and four children have been born to them, two of whom are still living. Taken away from this earth in the full flush of womanhood, from a devoted and affectionate husband, and from young children who so much needed their mother's loving care and guidance. Her death, to human understanding, is one of peculiar sadness and prompts the deepest sympathy of friends and acquaintances for those who are left to mourn their loss. Her funeral took place from the family residence this afternoon at 2 o'clock, Rev. W. E. Potwine officiating at the house, and the order of Lady Maccabees holding the concluding ceremonies at the grave.

ROAD TO GRANDE RONDE.

Walla Walla is Again Threshing Over Old Straw. Residents of the Grande Ronde valley, as well as business men of Walla

Walla, are interested in the building of a railroad along the line of the once proposed Hunt system from Walla Walla, says the Union, to tap the Eastern Oregon sections at a point where competition would be not exactly entered into with the Union Pacific lines and would still afford an immense volume of business to the new road. The old survey was by way of the Looking Glass river and the grade there, it is claimed, would not be excessive, although the haul would be long. It is known that the Grande Ronde, notably Elgin and other small cities, would contribute handsomely toward such a road, as it is their chief desire to be placed on a direct line of communication with the outside world.

That Walla Walla business men would assist in the proposed road many believe from the fact that Walla Walla would at once become the base of supplies for that whole section, which at present does not send one cent this way. To Union county, Oregon, such a road would be worth thousands of dollars a year by reason of its effect upon the wool traffic alone, and all shipments would be made through Walla Walla. Whether anything will be done is a question which is up to the people and to railroad promoters, but the matter is being agitated in Oregon and the claim is made communication will be entered into with the Walla Walla Commercial Club.

STREET PAVING.

A Mining Engineer Recommends Vitrified Brick.

H. B. Williams, one of the leading mining engineers of Eastern Oregon, who is connected with the Virtue mine, in an interview with the Baker City Democrat man, stated that the solution of the paving of Baker City streets, rests in the hands of the people here, who have at their very door the cheapest and most durable material.

"I know of streets paved in Eastern cities with vitrified brick which have been paved for 20 years and are still in good condition. There are clays in Baker county which will make a first-class vitrified brick. The city could easily and cheaply make its own paving blocks from this material and could supply the same to Portland, Seattle, Tacoma and Spokane and make money on the proposition, besides putting its own streets in first-class condition. The right kind of material to begin with makes a vitrified brick that is as durable as granite blocks, and forms a better surface and a surer footing for horses than any other known pavement."

The same advice is good for Pendleton, there being material at hand for the manufacture of vitrified brick with which the two main streets of Pendleton should be paved.

ASSESSORS TO MEET IN BAKER.

Assessors Brown, of Union, Buzan, of Umatilla, and Jett, of Baker, to Confer.

County Assessor George J. Jett, of Baker county, says the Democrat, has arranged with the assessors of Union and Umatilla counties to meet with him in Baker City, Thursday of this week for the purpose of discussing matters dealing with the assessment of property in those counties.

Assessor Brown, of Union, and Buzan, of Umatilla, have been heard from and will be here the day appointed. For some time past a movement has been talked of to interest the assessors over the state to meet in convention and discuss such questions as might be of benefit to them. Thus far the proposition has met with no response, and the representatives of Baker, Union and Umatilla decided to come together for mutual benefit.

When seen Monday Mr. Jett stated the object of this meeting was mainly for the purpose of endeavoring to arrange a more equitable taxation in the three counties. This would not mean the same on all property, but on things in common.

The year's work of 1902 will begin the first of the coming month, and it is desired that the conference be held before that time.
