the remedy that cures a cold in one day.

Albert Houston, of Independence, spent last night in town as the guest of his brother, William Houston. He is looking for a business location.

John Luhrs, of the Pilot Rock neighborhood, is in Pendleton today. He says sheepmen are busy lambing in the country south of Pendleton.

Walter Sawtell is in Pendleton, where he lives, from The Dalles, visiting his mother, brothers and sisters, and shaking hands with his many friends.

E. W. Cooper, of Independence, is visiting his nephew, Dr. E. A. Mann, and wife. Mr. Cooper is on his way to Vale, where he goes to take a position in a general merchandise store.

Sol Hardman, of Waitsburg, is in town visiting his son and daughter, who are attending St. Francis' academy. Mr. Hardman has sold his business at Waitsburg and contemplates locating here.

Mrs. H. P. Burns and son, who have been visiting her parents, Mr. and Mrs. James Crawford, has returned to their home at Reardon, Wash. Miss Delta Crawford accompanied them and will remain with Mrs. Burns for several months.

Baker City Herald: C. Cleaver, of Pendleton, and Elmer E. Cleaver, of Prairie City, foregathered at the Geiser Grand yesterday. The Cleaver brothers are prosperous shoe dealers in Furnish's town, and are also the most enthusiastic and enterprising mining men in the John Day district, where they own valuable property.

Baker City Democrat: Ex-Governor Z. C. Moody, of The Dalles, father of Congressman Malcolm A. Moody, is in Baker City. Mr. Moody's mission is said to savor of politics. While it is not admitted, an understanding is abroad locally that Mr. Moody is here in the interests of the aspirations of his son, whose somewhat shattered fences are being looked after in an effort to strengthen them.

SUITS AGAINST J. L. BISHER.

G. E. Stocker and C. E. Roosevelt are the Complainants.

Two suits were filed this morning with the county clerk against J. L. Bisher, the merchant and saw mill man of Alba. One suit names G. E. Stocker as plaintiff and the complaint alleges that on February 10, 1902, defendant delivered his promissory note to plaintiff for \$450.15, agreeing to pay the same 10 days after date, but failed to do so. Plaintiff now asks judgment in the sum of the note and \$50 attorneys' fees. J. H. Lawrey is plaintiff's attorney.

The second suit is brought by C. E. Roosevelt, and names J. L. Bisher and Rose Bisher as defendants. It alleges that between June 13, 1901, and July 15, of the same year, plaintiff delivered to defendants, at their special request, goods and wares to the value of \$213.85 and that all that has been paid on the original bill is \$106.80, leaving \$107.05 yet due and plaintiff prays judgment in the latter sum and attorneys' fees with the costs of action. John McCourt is attorney for plaintiff in the last case.

Political Notes.

The republican county central committee of Clatsop county, has fixed the following apportionment of delegates in Astoria to the county convention: First Ward, 22; Second Ward, 18; Third Ward, 10. The primaries will be held March 22, and the convention March 28.

The republican primaries were held at Heppner Wednesday. The result throughout the county, is a complete victory for J. N. Williamson for congress. The county convention will be held next Saturday, and will probably send a solid delegation for J. N. Williamson.

The democratic state central committee will not open headquarters in Portland until after the primaries next Saturday.

The republican county committee at Baker City has fixed March 22 as the date for the primaries, and March 26 for the convention, which will consist of 132 delegates.

Mignon—"Papa called on your landlady to make inquiries about you."

Harold—"You mustn't believe a word she says. She tells a peck of lies every time she opens her mouth."

Mignon—"Indeed! Thank you for the information. The fact is, she praised you up to the skies."

RATTIGAN VS. SMITH.

The "Mill" Came Off in Pendleton Unexpectedly—Policeman Fee Referee.

One of the liveliest fights that has occurred in Pendleton for some time was pulled off Thursday afternoon at the home of Mrs. James Rattigan, at the corner of Court and College streets. A young man by the name of Smith, recently from Boise, had been rooming there, and he and Rattigan got to drinking together Thursday and fell out. They went out into the yard to settle their difficulty in a regular Corbett-Fitzsimmons fashion. After scrapping for some time out doors, they went into the house and renewed the trouble and Mrs. Rattigan telephoned the police. Policeman Fee went to see what was the matter and when he attempted to arrest Rattigan the latter showed fight. The policeman grappled with him and in the melee got his hand badly bitten and lost a little skin off the end of his nose. Rattigan showed fight until the policeman was compelled to use his billy on him and knocked him out before he would give up. Rattigan and Smith were taken to the city jail and locked up.

Both Men Fined.

Police Judge McCourt fined Rattigan \$60, and in default of payment he was sent to jail for 30 days. Smith was assessed \$10 and he was also committed to jail in default.

DR. BLALOCK'S ENTERPRISE.

The Lands of Long Island, in the Columbia, to Be Cultivated.

The large farm, the property of the Blalock Company, located on Long Island, in the center of the Columbia, a few miles below Umatilla, will soon have water flowing through and over its sandy soil if the plans formulated and carried out by the promoters of this immense scheme do not fail; and there is no reason to doubt that the problem of irrigation of this tract has been solved at last. This land is known to be productive if water can be secured, and many schemes have been formed and many dollars have been spent in trying to devise some way of forcing the waters of the Columbia over its surface at a nominal cost. It was thought the problem was solved when a powerful water motor constructed by a Suokane man was installed at the head of the island, but the motor was found to be deficient in raising enough water to supply the number of acres of land the company wished to irrigate.

Now the company has fallen back on steam engines to do this work, and the necessary machinery and engines have been installed and are all ready for a test run. A 65 horse-power stationary engine has been set up and to supply the power for this monster, two 25 horse-power marine boilers are all ready to receive a fire under the grates. A test run would have been made before this time, but a contractor who was to supply the necessary fuel, shipped the wood to Blalock station instead of Cayote, the company's station. As soon as this can be transferred the first run to test the machinery will be made. The ten inch centrifugal pump is capable of raising 13,000 gallons of water a minute and it is expected this will enable the company to irrigate easily some 1500 acres.

The block system will be used on the farm where available, and when not, the ditch system will be resorted to. The block system is very simple and effective. Where a level piece of ground to be irrigated is found, the outer edges of the strip are banked up and then flooded. The water is allowed to stand as long as desired, when it is released to another tract of land and so on as far as possible.

Notice of Dissolution of Partnership.

Notice is hereby given that the partnership heretofore existing between S. L. Wakefield and Jesse Failing, under the firm name of Wakefield & Failing, is hereby dissolved by mutual consent. The said S. D. Wakefield will continue the business, collect all accounts and pay all existing debts of said co-partnership.

Dated at Pendleton, Oregon, this 14th day of March, A. D. 1902.
S. L. WAKEFIELD,
JESSE FAILING.

The March American Boy.

The March number of this best of all boys' magazines, The American Boy (Sprague Publishing Company, Detroit, Mich.) has arrived. The front cover has a full page illustration of a boy spearing fish and it will appeal to all lovers of out door sports, old and young alike. It has its usual number of interesting stories, the principal ones being: "A School Lookout," by D. R. Robinson; "Cathbert's Rattler," by Edgar D. Price; "A Night in the North," by Frank Baird; "A Grandmotherly Lark," by Minna Stanwood; "Toby," a story for little boys, by Roberts Silvey. The second installment of "Trooper Stork," by Will Levington Comfort, appears in this number. The true story of "Casablanca," by Louise Jamison; a story of the "Deep Sea," by Collison Fleming. Handsome illustrations adorn every page.

Riveting of boilers and the like is now done almost entirely by a compressed air hammer, which strikes 1500 times a minute.

CUBA NOT FREE.

Requires Special Legislation to Separate Her From United States.

Washington, March 14.—Does Cuba belong to and is it under the immediate sovereignty of the United States? is a question which was raised in congress when Representative Jenkins, of Wisconsin, delivered a strong address before the house advocating the theory that Cuba was a part of the American nation and as such could not be separated from it without special legislation. The remarks of Jenkins created much comment and were listened to with marked attention. It is understood there are others in congress who possess the same views.

Big Western Oil Syndicate.

San Francisco, Cal., March 14.—The great purchase of oil lands by the American Consolidated Oil company, which was announced some days ago, is the largest deal in the accumulation and transfer of western oil property ever undertaken. By it, 108,000 acres of oil land, 25,000 of which are proved to have oil, are turned over to a combination of syndicates composed of men prominent in the oil business in New York, Chicago, Omaha and California. The price paid was nearly \$6,000,000. The company will commence immediately the construction of a large system of pipe lines and the erection of refineries.

Railroad Betterment in Mexico.

Monterey, Mexico, March 14.—More than 200 miles of roadbed of the Mexican National and the Texas-Mexican have been widened and will soon be ready for the change of gauge of the track from narrow to standard width. The wooden bridges are rapidly being superseded by substantial iron structures, the curves are being lengthened and a vast amount of other improvement work is being done preparatory to changing the gauge of the line. The Texas-Mexican line runs from Loredo, Texas, to Corpus Christi, Texas, connecting with the San Antonio and Aransas Pass, which is a Southern Pacific property, both at Alice and Corpus Christi.

Shamrocks from the "Old Sod."

New York, March 14.—In the mails from Europe this week were many packages of shamrocks sent to Irishmen in America to aid in the proper celebration of St. Patrick's day. The shamrocks were placed in damp earth in tin boxes and were found when opened to be as fresh as when first packed. The packages were consigned not only to New York but to Chicago, Denver, Minneapolis, St. Louis and other cities throughout the country.

Florida Endeavors.

Tallahassee, Fla., March 14.—The state convention of the Christian Endeavor society, which opened in Tallahassee today, is the largest in the point of attendance ever held by the organization in Florida. Delegates are present from Jacksonville, Pensacola, Tampa, Ocala and other cities of the state. The program, which covers three days, contains the names of a number of prominent divines, educators and others who are to present papers and addresses to the convention.

Best Sources of Animal Protein.

Fresh ground meat and bone is a very valuable constituent of the ration for egg production. In many localities, however, it is difficult to procure readily, and many who might get it do not have a bone cutter. On the other hand, beef scraps and meat meal can be bought at any time and, being dry, can be readily mixed in with other feed stuffs. The West Virginia experiment station has compared the value of the two for egg production, with results decidedly in favor of the green bone.

During a period of four months, beginning Oct. 25, seventeen Plymouth Rock hens fed the fresh bone laid 650 eggs of an average weight of 11.75 pounds per 100, while a similar number fed meat meal in their ration laid 554 eggs, weighing 11.94 pounds per 100. The birds fed fresh ground meat and bone also increased more in weight and were much healthier during the experiment, four of the others having died and being replaced by others. As this experiment was made with only one sample of meat meal the results cannot be considered conclusive.—American Agriculturist.

Growing Chicks.

Rapidly growing chicks are quite liable to leg weakness, and when they once get down it is hard to cure them. With an even, regular temperature and plenty of charcoal there should be no bowel trouble, that bane of brooder chicks. A good dry location and plenty of exercise makes healthy, rapidly growing chicks.

Did You Ever

get up in the morning with an all-gone feeling in the stomach and a desire for a good cup of coffee and—not get it.

Try Owl Special

in the future, it is pleasant in flavor and goes right to the spot.
