BASEBALL AT ATHENA SUNDAY.

Perhaps a Special Train Will be Run From Pendleton.

On Sunday next Sharpstein's Sharpshooters, of Walla Walla, and Osborn's Yellow Kids, of Athena, are to meet in Athena for their first contest of the season. An excursion train goes from Walla Walla, and it is possible that, if the Pendleton fans desire it enough to warrant the expectation that a train from here would be needed, the O. R. & N. will arrange to run one. Something like 100 persons should go to induce the company to run the special.

Last Sunday the special that went to carry the people who saw the Pendleton-Athena game was short of coaches. It was the subject of complaint by many who were on the excursion, and this will not occur again. Last Sunday, there was no reason why there should not have been plenty of coach room. The conductor was ready and authorized to connect all the coaches needed, but, judging from the number of tickets sold at the ticket window, he thought he had enough cars. Numbers boarded the train with no tickets, and after leaving the station it was found that the train was crowded. Two coaches which had been attached to the train were cut off, and these would as well have been taken along if it had not been for the misunderstanding on the part of the conductor.

R. bridge across the Umatilla river, in the eastern part of town, will begin the concrete work at once for one of the piers. The work will now be pushed as fast as possible until the foundation is complete and then the massive steel structure, that is designed to stand for the next century and hold the weight of the W. & C. R. trains that cross on it, will be placed and it is hoped to have it finished before fall. Up to the present the work has been somewhat impeded by the high water, but that is not expected to interfere hereafter.

Yesterday was the day set by Supreme Judge Bean for the appearance before him at Salem of City Recorder McCourt in the city recorder case, but by motion of defendant, time was extended to the 5th. Ellis on the bench, ordered that Beam vacate the office of recorder, and he did so, turning over the paraphernalia to McCourt. The suit was then taken to the supreme court for the state of Oregon. Mayor Halley will represent McCourt at Salem Saturday.

He was opposed by David Frank, a prominent business man. To prevent fraud, Frank had posted at the various polling places, college athletes. A heavy vote was cast early. In addition to the aldermen the referendum question was voted on, and the propositions are, ownership of public utilities by the city and the nomination of city candidates by a direct primary vote.

CORN AS HEN FEED.

It Is Not a Good Eggmaker and Should Not Be Fed in Excess.

One reason why farmers do not realize more from their poultry, I believe, is because they make corn the main diet. Corn is considered by them to be the cheapest feed and the handiest to feed, for by throwing it out on the ear the hens are given more or less exercise in picking it off; hence the owner is saved the labor of scattering grain in the litter for the fowls to scratch up. But I have little faith in this plan of exercising and feeding fowls. With a good many farmers corn is probably a cheap food, but even this depends somewhat on the season of the year, the climate and whether the hens have free range or not. In cold weather corn may be fed quite liberally to laying stock without injury, and also to fowls having farm range, but when given in the way that many feed it, by spreading it on the ground before the hens three times a day, all they will eat, I believe that it is expensive hen feed.

Very many attribute the increase of eggs to corn, when in fact the corn has produced eggs more by keeping the hens warm than through the supply of egg elements afforded. Eggs cannot be made to any great extent by corn alone, or for a long time, for the reason that a hen fed nothing but corn will be unable to supply the mineral elements of the eggs, and while she may be eating largely of corn find sufficient nitrogen for an egg, she will sooner or later become excessively fat from too much carbon. A very economical and good feed for winter egg production is a mixture of clover, cut in half inch lengths and scalded, with cornmeal and bran. This is a very complete ration on all the elements necessary for eggs. It supplies bulky food, promotes digestion, affords a variety and costs less than any other food that I have been able to get.

When a hen leaves corn for other feed, it means that she wants something not fully supplied by corn. Without exception the best results may be had from a varied diet, and while a hen may do very well on corn, she will do better on a variety. It is not an easy matter to make up a perfectly balanced ration for a laying hen. While she is producing eggs she will use a vast amount of raw material, but if she stops laying a corn diet will soon ruin her. A concentrated food for hens should be avoided. Milk added daily to other food assists largely in supplying many needed elements not easily obtained from other sources. Clover, vegetables, milk, meat and corn or wheat are better than any single article.—V. M. Couch in Poultry Monthly.
