THE MANGY HORSES

INDIAN HORSES WITH THE DISEASE MENACE OTHERS.

Oregon Domestic Animal Commission and the Government in Correspondence Regarding Stamping Out the Disease.

A Salem correspondent writing to a Portland paper says: For years the state officers have been in receipt of appeals from Eastern Oregon to help in preventing the spread of mange among horses, caused by the running at large of many animals owned by the Indians on the reservations. The Oregon Domestic Animal Commission has frequently corresponded with the interior department regarding this matter since the Indian agents refuse the right to the state authorities to destroy the mangy horses, which have become a menace to the horses of settlers and ranchers. Recently Dr. William McLean, the state veterinarian, placed the matter before United States Senator John H. Mitchell, asking his co-operation in securing some action on the part of the Indian department to help eradicate the evil. The state board under the Oregon statute, orders horses similarly afflicted killed, but the Indian agent at the Umatilla reservation refused to allow this to be done with diseased horses on the reservation. Since Senator Mitchell has taken up the matter and pushed it with the department, there is some prospect of early action being taken.

The board received a letter written by A. C. Towner, acting commissioner of Indian affairs, to Senator Mitchell regarding this matter, enclosing also a copy of a letter sent to the Indian agent on the Umatilla reservation. In the letter to Senator Mitchell the commissioner says, in part:

"Relative to the existence of mange among the Indian horses on the Umatilla reservation, you are informed that the matter of the existence of mange among the Indian horses at the Umatilla reservation is at present under investigation by the Agricultural Department, with a view of taking measures for its eradication. In this connection you are advised that every effort possible on the part of this office will be taken to eradicate this disease among the horses of the Indians of the Umatilla reservation, and the agent will be expected to confer with, and act in conjunction with the inspectors of the agricultural department, to the end that the disease may be blotted out."

The letter to Indian Agent Charles Wilkins, of the Umatilla reservation, a copy of which is enclosed, says in part:

"The matter has been taken in hand by the department of agriculture, which department, it seems, received several reports as to the existence of this skin disease among the horses on your reservation. It appears from the statement of the secretary of agriculture, that a preliminary investigation as to the nature of this disease, has resulted in the discovery of the fact, that said disease is of considerable gravity, and of a contagious character. Said department proposes to send an inspector to make an investigation as to the extent of the existence of this disease among the horses on the Umatilla reservation."

Wool Growers' Meeting.

The Wool Growers' Association will hold a meeting in Pendleton May 29, at 1 o'clock p. m. There will be a wool sale May 29th and 30th by the sealed bid method, officers of the association will be elected and other important business transacted.

The county seat of Jackson county will probably be moved from Jacksonville to Medford; as that has become the most important town and is more centrally located and convenient for the taxpayers.

THE Golconda Gold Mine

A Plain Statement of Fact:

The GOLCONDA MINE, in the Sumpter district, with its equipment, and ten other claims, was recently purchased by the Golconda Consolidated Gold Mines Company, principal office in Pendleton, which is now operating the mine. The full purchase price is paid, and all but the treasury stock disposed of those who advanced the purchase price.

There was left in the treasury for an operating fund 500,000 shares of treasury stock. Some of this stock is offered for sale, but not exceeding 200,000 shares of it will be sold; as will supply ample funds until the mine is more than self-maintaining. This stock is offered at 15 CENTS A SHARE for the next thirty days.

As an investment of this character nothing equals it. Prove its worth those at work in the mine, who are in a position to know what is in the Golconda, have bought stock at ten cents a share to the extent of their financial ability. Those who have a little money which they can spare for the purpose should take 1,000 or more shares of this stock, as they will most likely make it the very best investment they ever made in their lives.

Address all orders for stock with checks in favor of
