THE CAMP MEETING BEGINS

BYERS' GROVE IS ALIVE WITH MANY PEOPLE.

Over 100 Tents Now Up and More to Be Pitched—Sermons Will Be Delivered in Three Languages.

The Adventist camp meeting begins in earnest tonight. Byers' grove is now a living mass of human beings and has very much the appearance of a city, although instead of houses the people are living in tents and the grove is full of these white places of abode.

Over 100 tents are now up and quite a number of these are occupied, although the largest number of Seventh Day Adventists and friends of this denomination are yet to come from the various parts of Washington, Idaho and Oregon represented in this conference territory.

For two weeks work has been progressing on the grounds, getting them ready for this "great gathering of the faithful," and every train brings crowds and the baggage cars are in adequate to hold the baggage that is coming in. Every stone and stump that was in the way has been cleared from the grounds and it presents a much neater appearance than ever before in the history of the grove. The tents were arranged in streets and blocks to represent a real city, and in each block are 10 tents, with an alleyway between each set of five. Each tent has a four-foot wall and the floor is 12x14 feet. In some cases lumber

RICH ORE STRUCK

ASSAYS AS HIGH AS \$100,000 TO THE TON.

The Strike Is Made In the Golconda Mine, Which Was Recently Purchased by a Group of Pendletonians.

Sumpter, May 15.—It is rumored here that a strike of very rich ore has been made in the Golconda mine, recently purchased by a group of Pendleton men. Pieces of the ore assays as high as \$100,000 to the ton. The average assay of the ore body is above \$1000 to the ton. Little can be learned of the strike or the extent of it, but a rich strike has been made is certain as extra precautions are being taken to guard the rich deposit. A quantity of the rich ore is being sacked for immediate shipment to the Selby works in San Francisco.

News received in Pendleton from the superintendent of the mine corroborates the above message. A very rich ore body has been located, but it is a little too early to ascertain the extent of its richness. Enough is known to justify the directors in withdrawing the stock from the market at the prices at which it has been offered and sold. The stock at the present time would appear to be cheap at 25 cents, but whether any more of it is to be sold even at this figure is to be determined later, as the sale of the treasury stock has been made only to secure funds to operate the mine until the output would meet the expenses and provide a surplus for dividends.

The many horses of the Umatilla reservation have been giving the government authorities some trouble and every effort is being made to find a remedy that will cure and prevent it.

People Who Live Longest.

From statistics it is learned that the longest-lived people of the world are the Norwegians. They are temperate and simple in their habits and preserve in great vigor their digestive powers, which is most necessary in the maintenance of good health. The American usually lives so fast that the stomach is neglected until his health is completely undermined, and he finds himself gradually getting weaker and weaker. If you are one of these sufferers we offer you a medicine that will strengthen your stomach and start you anew on health's pathway, and that is Hostetter's Stomach Bitters. It will cure flatulency, indigestion, dyspepsia, constipation, insomnia, chills and malaria, fever and ague. Don't fail to try it. For sale by all druggists.

MISS NIGHTINGALE'S BIRTHDAY.

The Famous Crimean War Nurse Reaches Her 79th Birthday.

London, May 15.—Congratulations poured in today upon Miss Florence Nightingale, the famous Crimean war nurse, the occasion being her seventy-ninth birthday: There were a number of callers at her residence all of whom were received and welcomed, although the health of the venerable heroine has been very poor for several years. The congratulations of the king and queen, in the form of autograph letters, were delivered to Miss Nightingale by special messenger. Dispatches couched in felicitous phrases were received also from Miss Clara Barton, the Czar of Russia and other notables.

It is known that for years Miss Nightingale has been an invalid as a result of her experiences in the Crimea a half century ago. It is not so well-known, however, that her sick room has been the scene of the most arduous and constant labor for the improvement of the health of the soldier. Although confined to her bed a large part of the time, she always accorded a welcome to any one who seeks advice on a question affecting the interests of the sick or those who nurse them. She is always cheerful and spends most of her time reading.
