NOTES OF DIAMOND

PROPOSED TO ORGANIZE AN INTER-STATE LEAGUE.

Plan for Combination of Three Teams From Washington and Three From Oregon for a Three Months' Season—Dayton and Stanford to Play Here.

Commencing Next Friday, June 6, the re-organized and greatly strengthened Dayton, Wash., baseball team will cross bats with the Pendleton Indians in a series of games, to be played that day, Saturday and Sunday. The Dayton team, since its re-organization, is reported as one of the strongest in the lower part of the state of Washington and will undoubtedly make the Pendleton boys get in and sift to get their paring knives under the Dusters' scalp locks.

Another important announcement made by the management of the ball team is that the Indians have succeeded in arranging a series of three games with the University of Stanford team, which is touring this section at present. This series will be played on Wednesday, Thursday and Friday, June 18, 19 and 20. The University boys are said to have this season one of the snappiest teams on the coast and their games here will give the Pendletonians an opportunity of seeing the work of the Redskins in fast company.

The local management also has under consideration a scheme for the organization of a new league after July 4 to be composed of Colfax, Dayton and Walla Walla, Wash., La Grande, Baker City and Pendleton, Or., three cities in each state, to play a three months' season, at the rate of four games a week.

The organization of such a league would, of course, depend largely upon whether or not Baker City can be induced to make up the Athena team, which disbanded on July 1, but it is thought this can be arranged for and in this event the other clubs will undoubtedly fall in line and the league will be organized.

IRRIGATION MADE EASY.

The Plan Adopted by a Farmer in the Grande Ronde Valley.

G. W. Ruckman has nearly completed a pumping plant for irrigation purposes near Alceel, says the La Grande Chronicle. This undertaking is principally for the insurance of producing a good yield of sugar beets on a tract of several hundred acres.

The pumping station is located over the state ditch, and by use of a flume three-quarters of a mile in length 27 feet is overcome. The pump to be used is an eight inch centrifugal which will deliver 1600 gallons per hour. The pump is operated with two twenty-horse power engines. This plant will cost about \$1000, a trival investment when taken in connection with the fact that it will make a section of land worth \$100 per acre that is at present valued at \$50.

A four-inch centrifugal pump is also being installed at the Rhul place and similar methods for obtaining water for irrigation are to be in operation at Nible.

Methods similar to this are in operation all over California for irrigation purposes and it was the recommendation of G. H. Heisinger and also of personal investigation of the California methods by Mr. Ruckman's son that led to the undertaking in Grand Ronde. If this plan works with the success anticipated, it practically solves the problem for irrigation for all the Sand Ridge country, and establishes the beet industry beyond all chances of failure, whether the season is wet or dry.

THE SPORTS WERE OUT.

Shooters Were Trying Their Hands on Sunday.

The local Sportsmen's Association held a practice shoot Sunday afternoon in preparation for the approaching tournament of the Sportsmen's Association of the Northwest at Portland, June 26, 27 and 28. Some excellent scores were made, and the association is gratified at the practice showing.

Nine local men are to take part in the Portland tournament representing Pendleton. They are: H. J. Stillman, J. M. Spence, A. D. Stillman, Fred Waite, Will Hoch, Sam Thompson, Asa Thompson, D. C. Clark and W. A. Sewell. In addition, Dorsey Burgess, of Omaha, who belongs to the Pendleton association, and is one of the best trap shots in the northwest, will accompany the club as a member. Burgess won the Anaconda trophy this season.

The town association has 90 members and is one of the strongest organizations in the state. It works in close harmony with the Oregon Fish and Game Association, which is so strong numerically in Umatilla county. H. J. Stillman is its secretary and Fred Waite vice-president. The shooters will go to Portland the night of June 25. Until then practice will be held every Sunday and at intervals during the week.

"NO CLINKERS."
"Cokes the Coal and Burns the Coke"
—A Testimonial From Some of Pendleton's Business Citizens.
Mr. W. G. McPherson, Portland, Oregon.
Dear Sir:—After having given the "Perfect" Hot Air Blast Furnace a thorough test in the last two years we can truthfully say that we have never seen its equal for economy. Your statement that it "cokes the coal and burns the coke," we have found to be correct, for we find that after burning a fire continuously, there is left only a very small quantity of ashes, and no clinkers, the ashes being as fine as flour. The splendid results we have attained with this furnace have truly surprised us. Yours very truly,
F. E. JUDD,
C. S. JACKSON,
T. C. TAYLOR,
F. B. CLOPTON,
H. L. HEXTER.
