The timepieces are operated and regulated by electricity and will be connected with the Western Union office and will keep observatory time.

Although many local sports have been out trying their luck with the rod and reel, no unusual fish stories have begun to float around as the result, but from now on it is expected to be different. The weather has been a little cool and the river too high for phenomenal catches, but it is now warming up and the waters are getting down so the trout will begin to bite. Several large crowds have been made up and are getting their tackle ready for an early start in the morning, and when they return look out for something unusual.

"Whereas, The spread of tuberculosis could be largely controlled by proper care of such sputum and the enforcement of comparatively easy methods; therefore, be it

"Resolved, by the American Congress of Tuberculosis, That the health authorities be urged to disseminate to the widest extent possible through the press and otherwise correct information as to the manner in which this disease is produced and the means to be employed for its prevention.

#### Virulent Cancer Cured.

Startling proof of a wonderful advance in medicine is given by druggist G. W. Roberts, of Elizabeth, W. Va. An old man there had long suffered with what good doctors pronounced incurable cancer. They believed the case hopeless till he used Electric Bitters and applied Bucklen's Arnica Salve, which treatment completely cured him. When Electric Bitters are used to expel bilious, kidney and microbe poisons at the same time this salve exerts its matchless healing power, blood diseases, skin eruptions, ulcers and sores vanish. Bitters 50c, Salve, 25c, at Tallman & Co's.

#### Most Effective Advertising.

That advertising is the most effective which attracts the eye and appeals to the brain. Strong adjectives may be as much out of taste in an advertisement as in a bit of more aspiring literature. Exaggeration is always to be avoided. People nowadays demand sincerity in all matters of business. Their success came of their jealous regard for their work
