WORK AT GOLCONDA MINE

THE PROGRESS OF DEVELOPMENT AND THE RESULT

Large Amount of Ore Outlined for Mill Operation; Nearly a Year's Run for Twenty Stamps.

In the Golconda there has been a steady progress of successful ore strikes. Since the strike of the rich pay shoot on the tunnel level, which is over 200 feet vertically above the second level, development has been to further prove and outline the ore there. On the 100-foot level the north drift is entering the zone of the shoot, as good values are rapidly coming in, and the grade of ore is of the same general nature as the shoot. On the 500-foot level it is apparent that the north drift is entering a large shoot, as steady increase in values is noted with all work.

The upper portion of the shoot found on the tunnel level is not in the big east vein, where it is found on the second level, but in the little converging vein, which formed the shoot. Finding this vein a few feet from the east vein at this point is the last proof necessary to establish the pitch of the shoot. It also illustrates how thoroughly the former management missed the shoot. It has been picked up 300 feet south of the shaft on the tunnel level, which demonstrates that its angle is a drop of 200 feet in 200 ahead. This little vein was cut by the former management on the tunnel level, but nearer the shaft, where it was not near the east vein. Superintendent Meikel's cross cut was at a point where he expected a convergence, and he struck within a few feet of it. Work is being continued to reach the east vein on that level, when drifts on it and the smaller vein will be run.

A short distance south of where the two veins are opened in the prospector's tunnel is a bold outcrop that has always assayed high. As the two veins dip east and west, and down where the shaft begins are but a short distance apart on the surface, further up the hill on the more elevated grounds, the dip would bring them together. It is apparent that they meet about the point where the outcrop stands forth, and that is the surface evidence of the shoot.

Of greatest importance to the Golconda company at present is the large amount of ore outlined for mill operations. Rough estimates place the quantity at nearly a year's run for the twenty stamps. That is about the 200-foot level. All of the shoots between the second level and prospector's tunnel is virgin ground, as stoping went but a few feet over the second level drift. With this great quantity of ore above the second level, and good ore coming in on the fifth level, and also good milling ore being opened on the levels of the west vein, the future of the property at the present time is particularly bright. The date for opening the mill is not set by the management, but will undoubtedly be in a short time.

Saves a Woman's Life.
 To give up would have meant death for Mrs. Lois Cragg, of Dorchester, Mass. For years she had endured untold misery from severe lung trouble and obstinate cough. "Often," she writes, "I could scarcely breathe and sometimes could not speak. All doctors and remedies failed till I used Dr. King's New Discovery for Consumption and was completely cured." Sufferers from Coughs, Colds, Throat and Lung Trouble need this grand remedy, for it never disappoints. Cure is guaranteed by Tallman Co. Price 50c and \$1.00. Trial bottles free.

Good Prospects for Coal.
 The Oregon Railroad and Coal Company's coal mine near Heppner promises well. George Wells, an eastern coal expert, in the interests of the O. R. & N. Co., and Thomas Brokey of Spokane, a man who has had experience in coal mining, have been looking over the proposition during the past week, and from reports sent in by these experts, it is stated upon good authority that the O. R. & N. Co. is now interested in these mines.

If a Man Lie to You.
 And say some other salve, ointment, lotion, oil or alleged healer is as good as Bucklin's Arnica Salve, tell him thirty years of marvelous cures of Piles, Burns, Boils, Corns, Felons, Ulcers, Cuts, Scalds, Bruises and Skin Eruptions prove it's the best and cheapest. 25c at Tallman & Co., drug store.

Notice to Contractors.
 Sealed proposals will be received at the office of T. F. Howard, architect, up to 12 o'clock noon, of Saturday, July 12th, 1902, for the erection of a two-story dwelling house with attic and stone basement, for Leon Cohea, according to plans and specifications prepared for the same by T. F. Howard, architect. Separate bids will be received up to noon of Saturday, July 5th, 1902, for all stone work of basement and chimneys. The right is reserved to reject any and all bids for the work.
 June 28th, 1902.

Lawns, percales, dimities, closing out sale. Teutsch's store.

Good enough for anybody!
