WEEKLY CROP BULLETIN.

Report of Department of Agriculture

for State of Oregon, United States department of agriculture, climate and crop bulletin of the weather bureau, Oregon section, fro the week ending Monday, Aug-

Except a few light showers last Wednesday and Thursday in the northwestern portion of the state, no rain has fallen during the week. The temperatures have been seasonable, and there has been an abundance of bright sunshine, making alharvesting excellent together,

The fall wheat harvest is nearly completed in Southern Oregon, well advanced in the Willamette Valley, and making good progress in the eastern sections of the state. Threshing will be general this week. Spring wheat is filling and ripening nicely. The oat crop promises to be above the average. In the Umatilla district, wheat will probably turn out better than expected a few weeks

All Number One.

Yet, the loss of yield will somewhat be evened up by the fact that all the wheat this season will pass for No. 1. It is said that hardly a crop in the county will be sold for anything less than first class. This means the top notch price all the season. If a man has good, No. 1 wheat and his neighbor has wheat almost as plump, but with a little shriveled grain—just enough to make it second class—the fellow with the hardly a fall other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it to be a does disease, and prescribed local remedies, and by constantly falling to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional disease, and therefore requires constitutional disease, and therefore requires constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surface of the system. They offer one hundred dollars for any case it falls to cure.
