### MORE ABOUT ELECTRIC LINE

#### PRESIDENT MELLMANN TELLS WHAT THEY ARE DOING.

#### Preliminary Work is Being Pushed and Eastern Capital is Being Interested.

H. Mellmann, president of the Washington & Oregon Electric Railway, Light and Power Co., and Hugh S. Young, connected with the company, are in town looking after the interests of the road.

Mr. Mellmann says everything in the way of preliminary work toward getting ready for the construction of the electric railway from here to Dayton, is being pushed and is fast nearing completion, so that actual development work will soon be in order.

#### Gets Eastern Capital.

Mr. Mellmann is interesting Eastern capital in the proposition and has already shown several moneyed men or their representatives over the line. "Invariably, these men are highly elated over the plan we are arranging and the proposition we have to lay before them," said Mr. Mellmann. "We could not wish for more success than we are having in our work."

#### Electric Light for Pomeroy.

President Mellmann added that he had already closed a contract with the people of Pomeroy to put lights there from the Tukanon water power plant, which they will install. "Pomeroy people are tickled to death over the prospect of electric lights," said Mr. Mellmann, "and we will probably string our first electric light wires from Tukanon to that city."

#### EXCURSION ON SUNDAY.

Walla Walla Enthusiasts Will Come to Pendleton to See Ball Game.

## A SCORCHING GAME

(Concluded.)

bags on Gatsch's first ball over. Probably the best pieces of field work were Adams' fine run after a high foul from the bat of Mulane, which he gathered in to help retire Walla Walla in the third, and Bradbury's sensational left-handed catch at second base, which shut off an earned run for Pendleton in the fifth.

#### Had a Chance to Win.

Pendleton had a chance to win in the last half of the ninth, when the bases were full and Schills was at bat. There were two men out and two runs needed to win the game, when Wilner, who was on second, played off too far, to draw a throw from the catcher, which he did, forcing Adams to try for home, where he was cut off at the plate, retiring the side. It was a desperate chance to tie the score and get another inning, in case no more tallies were made, and had it been made with a weak man at bat, it would have been a good play, but with such a hitter as Schills up and but one strike on him it certainly looked like a rank error of judgment.

The score tells how the runs were made.

#### La Grande Beat Baker.

La Grande pulled Baker City down from second to third place Thursday when the Beet Pullers went over to Baker City and skinned the Gold Diggers to the tune of 10 to 0. The Gold Diggers were crippled by the defection of Crawford and Feris, but that would hardly seem to be responsible for the terrible one-sidedness of the game. La Grande grit is beginning to win out.

### UNHAPPY COUPLES IN COURT

#### TWO WIVES WOULD SEPARATE FROM THEIR HUSBANDS.

One Woman Has Been Married 37 Years, the Other But Two Years, But Both Have Enough.

After being the wife of William A. Dozier for 37 years, Mrs. Elizabeth Dozier now asks the Umatilla county court to grant her a divorce. Mr. and Mrs. Dozier were married in Tennessee in 1865, and in her complaint Mrs. Dozier says that soon after their marriage defendant began a course of cruel and inhuman treatment, frequently cursing and calling her vile names. In 1890, 1891 and 1892 he became so bad that plaintiff left him, fearing for her life. She says he frequently threatened her life by shooting her and she feared he would carry out his threat and do it. Such indignities made life unbearable with him. They have four children, but all are now grown. H. E. Collier is plaintiff's attorney.

#### Failure to Provide.

On the ground of desertion and failure to provide, Mrs. Mary E. Tinker has asked the Umatilla county courts to grant her a divorce from Walter J. Tinker. They were married in North Yakima in 1900 and defendant deserted plaintiff a few months later. There are no children. J. H. Lawrey is attorney for plaintiff.

#### Somers vs. Wilbur.

Jim Somers has filed suit against E. J. Wilbur to collect \$235 alleged to be due for labor performed and other accounts. Ramsey & Oliver are attorneys for plaintiff.

#### Perhaps.

The Wife—Oh, George, I've lost my bathing suit! What shall I do?  
The Husband—Don't say anything about it and it won't be missed.

### LABOR DAY.

#### Question of Its Observance Will Be Settled Tonight.

The question of observing Labor day—September 1—will probably be settled at tonight's meeting of the various labor unions of the city. Several weeks ago it was announced that the local labor union members would observe the day appropriately, but since that time no arrangements have been made and it is now thought they will simply observe it as a day for rest and not attempt to give any parade or make any demonstration. The day will have to be observed, at least by some of the organizations, as the members will be fined \$5 each for turning their hand to perform any kind of labor.

### MORE WHEAT SALES.

#### Big Buys are Being Made by Local Grain Dealers.

Some wheat is being sold by the farmers at 50 cents and one lot went yesterday at 50 1/4. This was 3,900 sacks belonging to John Rothrock and was an extra good lot. It was bought by E. W. McComas for the Northwestern Warehouse Co. Mr. McComas and his representative have bought several other lots in the last 24 hours, paying 50 cents a bushel therefor. L. L. Rodgers, sold 3,000 sacks; H. H. Williams, 900; Ben Day, 700; D. A. Osborn, 1,400. Most of this grain was at Eastman, some at Warren and some at Echo.

#### Sheep Notes.

It is claimed that two teaspoonfuls of turpentine in five times that much milk every four or five days, will cure paper skin in lambs.

On many farms sheep should be looked upon as auxiliaries in keeping up the fertility of the land rather than one direct source of product.

Wool is the farm product which brings the most money in proportion to what it takes from the farm and with least labor to the producer.

Sheep eat so many different kinds of plants which cattle and horses refuse, that the addition of sheep by keeping down those plants which other stock refuse really increases the product of the pasture.
