THE MODERN DRUGGISTS . . . PENDLETON

THURSDAY, AUGUST 28, 1902.

Miles' trip to the Philippines is now said to be one purely of business.

Between the hold-ups and suicides there is scarcely any room in the newspapers for any other black letter head lines.

Poor old Spain! She ran against Uncle Sam, then her boy king went crazy, and now she has been struck by a cyclone.

Teddy is speaking all the same as Bryan used to speak. Bryan said too much. Now will Teddy not profit by Bryan's experience.

Porto Rico is taking on Southern civilization at a rapid pace. Several people were killed there in an election brawl yesterday.

The Nevada democrats and silver advocates will try the old silver chestnut another round. They hope to make it a local go.

Pardee got the persimmon and Gage passed into oblivion. It is a question of whether it was the defeat of corruption or the installment into power of a greater quantity.

The death of Mrs. Blackman, of Walla Walla, was a sad one. It is presumed that she was toying with a gun under the old idea that it was "not loaded" and accidentally shot herself. The small revolver has done but little good and much harm.

Edward is also touring the country. With the heads of nations and popular navy and army officials traveling about the country in show parade the rabble has fine opportunities to give vent to its lungs. Napoleon had the rabble down about right. Having his attention called to a great oration that was being given him, he said with contempt: "That same rabble would join the other side tomorrow to mob me if they had a leader."

The withdrawal of the public lands in the arid districts from acquisition for a time was a good move. It was done for the purpose of preventing speculation while irrigation experimental work is going on. Should this not have been done the wily land shark would have watched his opportunities and as soon as experimental work at a given point would indicate a success he would have proceeded to gobble all of the available surrounding country. There are no laws or conditions now wherein the man with capital cannot corral anything he wants. He has formed a merger on about everything but air, and he is using a great deal of this element in a "heated" form.

The reduced transportation rates to be in effect in September are expected to bring the largest immigration ever brought to this section of the country in a given length of time. The irrigation bill has attracted new interest in the country and home-seekers will be here from every place. They will also stop in the country where irrigation is to take place. It opens an entire new country for the visits of the tourists. Heretofore they have only looked to the scenery and the cities, but now they will be looking for homes. What is known as the arid country will be their greatest object of interest, and the business men in the towns of this country will have an opportunity to deal with them. Hotels, livery men

and all classes of business will be benefited by their visit. And later, many of them will become citizens of the country. It is only a question of time until the Inland Empire will be the most important section of the state, and the man who does not get in on the ground floor will regret it.

Importing Japs to do construction work on the new Washington railroad is another straw that shows the way that the winds of future labor are blowing. It will only be a question of time until the Orientals and other lower types of the foreign element will do all of the heavy work in this country. The American is being more convinced every day that he is not made for "hard work." He is already unreliable for many kinds of work. Only a certain element will do railroad construction work and the majority of these will only work until they get a few square meals and some beer money. The realm of speculation is broad on the subject of future labor in this country. And down the vista of time, the social question will cause more trouble and more excitement throughout the United States than it is now causing in the South. When the negro, the Chinaman, the Jap, the Filipino, and the what nots, demand social equality and the right to marry whom they please, there will be a long list of objections. Constant association will bring all of these nationalities together until the lower race will not become so repugnant to the higher and will think it has just as good rights as the white man, without regard to color national birth or "previous condition of servitude."

CHANGED IMMIGRATION.

For the past year the total immigration was 648,743, which was an increase of 160,822 over the previous year. The number of immigrants arriving into the country in 1883 was 603,322; and in 1892 was 623,934. While last year was record breaking in numbers, it was likewise a record maker in another respect. It shows a startling increase in the number of immigrants from undesirable quarters—Italy and Austria Hungary, as appears from the subjoined table.

	1902.	1892.	1883.
Italy	178,375	62,127	31,792
Austria Hunga-ry	171,989	80,136	27,625
Russia	107,347	84,393	9,909
Sweden	30,894	43,247	38,277
Ireland	29,138	55,467	81,486
Germany	28,304	130,753	194,786
Norway	17,484	14,462	23,398
Japan	14,270		
England	13,575	49,770	63,140

The immigration from Southern Europe, from among the unsteady Latin nations, has increased six times that of 1883, and that from Russia is 11 times as great. At the same time the decrease from the steady, desirable north of Europe races, out of which come good citizens, has materially fallen off. Norway and Sweden have made a heavy decline. Ireland has fallen off one-half as compared with 1883. From Germany, the best of all, the immigration is only one-seventh as great as in 1883.—Exchange.

MAKING AND BREAKING INJUNCTIONS.

There are injunctions and injunctions. There is, for example, Federal Judge Grosscup's injunction against the meat packers' combine, issued at Chicago, which enjoins the defendants from: "Entering into, taking part in, or performing any contract, combination or conspiracy, the purpose or effect of which will be, as to trade and commerce in fresh meats, a restraint of trade or commerce among the several states."

In direct disobedience to that injunction the meat packers are openly organizing a new combination in the form of a "merger." To disobey

an injunction is contempt of court and can be effectively punished.

For examples in point, there are the injunctions issued by Federal Judges Jackson and Keller forbidding—and, as the World has previously said, very properly forbidding—men from interfering unlawfully by violence, threat or any form of coercion with the right of other men to work for whom and on whatever terms they please. For disobeying these injunctions several striking miners have been sent to jail for terms of from 60 to 90 days.

Contempt of court must be punished or the reign of law ends and anarchy begins. Equal laws and equal enforcement of laws are nevertheless essential elements of public justice. Injunctions must be obeyed by meat packers as well as by miners. Contempt of the courts or their orders should mean jail for all offenders alike—or for none.—New York World.

After September 1 the price of logs on Puget Sound will be advanced to \$5.50 per 1000 feet.

Sideache,
Back-
ache,
Head-
ache,

And many other aches to which women are peculiarly subject are generally the result of a diseased condition of the womanly organism. When this diseased condition is cured, sideache, backache, headache, etc., are cured also. Doctor Pierce's Favorite Prescription establishes regularity, dries the drains which weaken women, heals inflammation and ulceration and cures female weakness. When these diseases are cured the aches they cause are also cured.

"I will drop you a few lines to-day to let you know that I am feeling well now," writes Miss Annie Stephens, of Belleville, Wood Co., West Va. "I feel like a new woman. I took several bottles of 'Favorite Prescription' and of the 'Golden Medical Discovery.' I have no headache now, no backache, and no pain in my side any more. No bearing-down pain any more. I think that there is no medicine like Dr. Pierce's medicine. I thank you very much for what you have done for me—your medicine has done me much good."

The People's Common Sense Medical Adviser, a book containing 1008 pages, is given away. Send 21 one-cent stamps for expense of mailing only, for the book in paper covers, or 31 stamps for the volume bound in cloth. Address Dr. R. V. Pierce, Buffalo, N. Y.
