GREAT IS OREGON

PROFESSOR OF AN EASTERN COLLEGE IS CAPTIVATED.

W. L. Carlyle, of the University of Wisconsin, a Visitor Here—Says Stock, Climate and Future Excel Other Countries.

W. L. Carlyle, who spent yesterday visiting his cousins, Thomas and Sam Thompson, left this morning to resume his journey over the country, visiting the experiment stations and agricultural schools. Mr. Carlyle is professor of animal husbandry in the University of Wisconsin, and has been making a tour of the country.

He visited the state fair at Salem, and says he never saw finer stock, especially sheep, than were displayed there. He also spoke very encouragingly about this state and climate, which was as follows:

"This is one of the finest climates I ever saw. The days get quite warm but the nights are cool and a man can sleep and get up in the morning refreshed.

"I have traveled quite extensively and inspected the stock interests of many states, but I never saw a more promising country for stock industry than Eastern Oregon. Especially do I think this is a wonderful country for sheep. I saw the finest sheep at Salem I ever saw anywhere and that is saying a great deal. The sheep were not only fine animals, but the wool cannot be beat in the world for length and fine texture. I am taking several samples back with me to the Wisconsin University and it will be a revelation to our people. Other stock exhibits were also fine.

"I do not think there is a place on earth that is a more ideal sheep country than Oregon. For my part, I think the sheep business is only in its infancy and will develop into much larger proportions as the people see the profits therein. Many more will turn their attention from other stock to sheep entirely.

"I think this is the garden spot of Eden. The only thing needed to make it develop is water. This is not needed in many sections of course, to raise wheat, but there are many other places which would grow anything if they had water. This will be remedied in time. The government will come to the aid of the people sooner or later and arrangements will be made to get water on all of the desert lands of the West. There is plenty of water in the mountains and all that is needed is to store it and let it out as needed.

"I was greatly surprised at this country when I began to traverse it. To see these bleak hills growing the large wheat crops they do is wonderful.

"What you call the 'Inland Empire' is not only great now, but its future is immeasurable by speculation."

Gallingo, Russell Reed and Edward Johnson. During Miss Hale's engagement at Portland, the Oregonian of February 20th, says: Miss Hale proved herself to be an actress of really great ability from the moment of her first appearance; she is possessed of much personal charm and attractiveness of manner, and to this is added a sweet sympathetic voice which she knows how to use as only an experienced actress can; her acting throughout is quiet, but nevertheless effective and without a shadow of rant or apparent striving for effect. She held the interest of her audience whenever she was on the stage."
