Weekly Crop Bulletin.
 The past week was cool, with several good rains in the western section of the state. In the eastern section the rainfall was light and badly distributed. Frosts occurred on several mornings, but they did no injury of consequence.
 The grain crop is being rapidly hauled to the warehouses and it is now practically all threshed. Hopping is finished, and the crop, although lighter than expected earlier in the season, is a good one, and of excellent quality. Prune drying is in active progress, with variable yields, which are generally reported as light.
 The rains have started a new growth of grass and fall pastureage is rapidly growing. Range stock, as a rule, are not in as good condition as usual at this season of the year. Potato digging has begun and the tubers, while not large, are generally of good quality; the yield will be below the average. Late Potatoes have been greatly benefited by the recent rains. Corn and apples are the principal crops yet to be harvested.
 Corn was injured by the frosts of last week, but this week the weather was more favorable and it is probable very nearly an average crop will be secured. More rain is needed for fall plowing and for fall seeding on summer-fallowed land.
Columbia River Valley.
 Freewater, Umatilla County, Fred Freudig—Forepart of week warm, but nights cool; harvest and haying completed; fruit is all harvested, with the exception of winter apples, which will soon begin to be picked. Some rain fell Saturday.
 Enderly, Wasco County, G. W. Fligg—The past week has been favorable for all work; threshing is practically finished, and a large portion of the grain is in the warehouses. Fall sowing is nearly finished, and the grain is coming up well; the ground is in fine condition, owing to two good rains during the last two weeks; potato digging is all under way and the yield is good; apples only half a crop.
