NO LOG-ROLLING FOR FAIR

Senator Williamson Goes on Record Against Log-Rolling

"I have heard intimations that Eastern Oregon would hold up the legislature for a lot of special favors before letting the appropriation for the Lewis and Clark Fair go through," said Senator Williamson, of Crook county, last night. "Now, I wish to say that I know of no such disposition on the part of Eastern Oregon, and I wish to go on record as being emphatically opposed to it. I want the Lewis and Clark appropriation to stand squarely on its merits, and I, for one, will not consent to yoking it up with extraneous matters. There should be a liberal appropriation for the exposition, and I do not believe the other parts of the state will regard it as a local matter to be bought with log-rolling."

"I have also heard that an attempt will be made to subject the Lewis and Clark appropriation to trading for votes for United States senator; that outside candidates might demand support from the Multnomah delegation in return for votes for the fair appropriation. If I should know of a candidate taking that course he would forfeit my support. I should do all I could against any candidate adopting those methods."

"I do not believe in log-rolling practices, anyway. Whatever matters I shall have to present to the legislature, I shall put upon their merits and expect them to be treated accordingly. I hope there will be nothing to mix up with the Lewis and Clark appropriation, and that it will be dealt with squarely and above board. At any rate, I give notice now that I will not be a party to any act that will put that enterprise upon a plane of a purely local project. You cannot make this too emphatic."—Oregonian.

Obtains Lease of Life

Salt Lake City, Utah, Oct. 17.—This was the date set for the execution by shooting of Peter Mortensen, convicted of the murder of James R. Hay, secretary of the Pacific Lumber Company, on the night of December 16, last. The appeal to the supreme court granted a short time ago by Judge Morse, acts as a stay in the case and the condemned murderer passed the day quietly within the state prison walls instead of facing the bullets of his executioners. It is probable the case will not be reached by the supreme court before next January.

Kahlotus, Wash., Oct. 17.—Sheep are beginning to return to the Washtucna Lake country, their winter feeding grounds, and before frosts grow severe over 100,000 head are expected in this district. The Washtucna lake winter quarters are considered among the finest in the Northwest. The encroachments of settlers, however, is rapidly narrowing the winter pasture and gradually reducing the number of sheep which can be wintered there. The sheep feeding industry tributary to Kahlotus and Washtucna has always been one of the most important of Franklin county. Demand for Soft Coal Stoves

Chicago, Ill., Oct. 17.—Stove manufacturers of the Central West are swamped with business. The demand for soft coal stoves and oil and gas heaters is the greatest ever known. Dealers predict a serious shortage of soft coal stoves if the anthracite strike should continue. The demand for hard coal stoves is scarcely large enough to warrant manufacturers in placing them with jobbers and retailers. The demand for soft coal stoves is equalled by the demand for oil heaters. The Chicago manager of the Standard Oil Company doubts the ability of the company to meet the demand.

Big Demand for Oil Stoves

New York, Oct. 17.—There has been such a demand for oil stoves for cooking and heating within the last few days that the manufacturers are unable to fill the orders that have come to them. Many of these orders are from out of town. Any kind of an oil stove is acceptable, whether it is up to date or the kind used at the time oil stoves were first invented. And in a majority of cases those who are buying them are paying 30 per cent more to the manufacturers than they paid last year, when there was no coal strike.
