## THAT NEW FACTORY

### SENTIMENT OF CITIZENS AT MEETING FAVORED IT.

Only Question Under Consideration Is Whether Stock Shall All Be Common or \$25,000 Shares of it Preferred.

The meeting of members of the Pendleton Commercial Association and citizens to consider the Rigby-Clove combined harvester proposition was called to order this afternoon. Mayor Hailey was elected chairman, and J. F. Robinson secretary of the commercial association, was chosen secretary.

Mr. Rigby explained that it was the purpose to organize a company with a capital stock of \$100,000, \$75,000 of which to be common stock, and \$25,000 preferred.

It was stated that practically all of the common stock had already been taken and the citizens of Pendleton and Umatilla county were requested to subscribe the \$25,000 for which preferred stock would be issued and draw interest annually at 8 per cent.

Mr. Rigby also stated that it was the purpose of the company to build a factory to cost \$100,000; that it would be the main purpose of the institution to manufacture the Rigby-Clove combined harvester, but farm machinery and implements also would be manufactured.

The merits of the invention were discussed and it was shown that it could be operated with less than half the number of horses used in operating the old harvesters and that only two men were required to operate the new harvester, while the number to operate the old harvesters was usually five.

The merits of the harvester have already been set forth in East Oregonian and there seems to be no question but that the invention is a success and a great labor and money saver.

A large number of representative business men and citizens were present and all practically endorsed the proposition.

It was agreed that Mr. Rigby should have time to consider with his partners to determine whether it would be better to make the entire \$100,000 common stock and solicit subscriptions along this line, it having been suggested that if it was a good thing that common stock would be better than preferred stock, as common stock holders would be entitled to share the profits instead of receiving 8 per cent on preferred stock.

Mr. Rigby also stated that a sufficient number of orders had already been received to keep the factory running two years.

The meeting adjourned subject to call, as soon as the owners of the patent should determine whether they would make the whole capital stock or attempt to sell \$25,000 shares as preferred stock.
