THURSDAY, NOVEMBER 6, 1902.

GENERAL NEWS.

Japan is offering premiums for the development of the sugar industry in Formosa.

It is estimated that over 5,000,000 western sheep are fattened in the corn belt every year.

Advices from England state that attempts to introduce the beet-sugar industry are being continued in England, and especially in Ireland.

Final estimates of the 1902 crop of apples brought to market make a total of 43,000,000 barrels, as compared with 27,000,000 barrels for last year.

After having carried a knife blade an inch and a quarter in length in his brain for 22 years, a Chicago man has undergone a successful operation for its removal.

The report of H. M. Brooks, superintendent of foreign mails for the fiscal year shows that the total weight of mails dispatched by sea to foreign countries was 10,112,772 pounds.

To prevent the rice famine which is threatening many provinces in the Philippines, the commissioners have appropriated \$5,000,000 (Mexican) to purchase and transport rice to those districts.

The cost of the temporary work of the 12th census, according to the director's annual report, was \$11,819, or an average cost of 15.5 cents per capita of the population of the United States.

An informal combination of the rubber tire works of the United States has been made lately. The corporations will retain their individuality, but will be operated on a community of interests basis.

The State of South Carolina has only one creamery and farm lands there are worth from \$10 to \$20 per acre. The State of Iowa has 850 creameries and farm lands are worth from \$70 to \$100 per acre.

PACIFIC NORTHWEST NEWS.

Astoria collected \$512 in fines during the month of October.

Mrs. Sarah R. Philpott, an Oregon pioneer of 1854, died at Oakville, Or., November 4.

Over 2000 bales of Oregon hops have been purchased this season by London brewers.

The Oysterville Oyster Company, of Ilwaco, was incorporated November 5 with \$55,000 capital.

Henry Scheeland, a Portland pioneer of 1857, died in that city November 3, at the age of 47.

Portland business men will spend \$2000 on special entertainments for the coming irrigation congress in that city.

A. C. Campbell, a bookkeeper for a Snohomish meat company, has been bound over for sending obscene literature through the mail.

In a drunken row at Missoula, Mont., Private Tyler, colored, of the Twenty-fourth U. S. Infantry, was shot and fatally wounded.

Three sticks of yellow pine, 92 feet long, 58 inches thick at one end and 68 at the other, are being sent by Inman & Poulson of Portland, to Alameda, Cal.

Exports of apples from the United States in the fiscal year amounted to 459,719 barrels valued at \$1,628,886, against 883,673 barrels, valued at \$2,058,964 in the previous fiscal year. With one exception, the 1901-2 exports of this product were smaller than in any year since 1896-7, when the high record was established of 1,503,981 barrels, with a value of \$2,371,143. Exports of dried apples in the fiscal year 1901-2 were smaller than in any year since 1894-5, and amounted to only 15,664,468 pounds, worth \$1,190,593, against 28,309,023 pounds in the previous fiscal year, valued at \$1,510,581. The exports in 1894-5 were 7,085,946 pounds valued at \$461,214.

FROM OCEAN TO OCEAN.

Noted African Explorer On His Way On Horseback to Portland.

After covering many thousand miles of territory upon horseback and by carriage, through mountains, valleys, across rivers, lakes and swamps, Dr. A. Donaldson Smith reached the city Tuesday evening, having left Philadelphia during the middle of May. Dr. Smith is the famous African explorer and mapped out the trip from one coast to the other merely in the compilation of articles upon his return. He left this morning for Portland and from there he will visit coast points and depart for Philadelphia by modern transportation.

Dr. Smith, who by the way, is a lover of outdoor life, is a true sportsman and athlete, gave up the practice of medicine some years ago and has devoted his life to travel and exploration. He is a widely known character among scientists. Though but 36 years of age he has done much for the scientific world and has made two notable trips of exploration into Africa. The first expedition he headed was in 1894-5 and the second in 1899-1900. While upon the initial journey into the dark continent he made surveys in Senegoland and Gambia in the northwestern part, sections where had remained unsolved numerous geographical problems. The latter journey supplemented notable discoveries unearthed upon the occasion of the first.

Dr. Smith left the Pennsylvania metropolis with two sturdy ponies and made a good portion of the journey upon horseback carriages being used where practicable. The noted traveler is a modest, unassuming man with a retiring demeanor and appears to spend his time dodging newspaper men in a city. "I am not touring the country upon a wager nor for notoriety," declared the explorer. "My preparations for the outing were made after arriving at the conclusion that it would be an admirable way to spend the summer. I have camped a great deal, but during most of the time since leaving Philadelphia have been fortunate in procuring quarters in town. I spent a month fishing and hunting, otherwise I would have reached the coast much earlier. I am afraid the snows will interfere with the remainder of my sport to some extent, but will push on to Portland if possible. Being an outing, the trip was essayed at easy stages."

The start was made from the Country Club, Philadelphia, thence to Lancaster, through the Cumberland valley and then upon the old national road to Wheeling, and from there to Chicago. The traveler, accompanied only by his valet, Pierre Meyer, began the journey with but a light outfit but this was added to as they advanced and it became necessary to camp along the route. An average of 25 miles a day has been made. Dr. Smith is mounted upon a thoroughbred, while Pierre, a Swiss, whom the doctor picked up on one of his travels, rides a sturdy pony. The explorer is equipped with a handsome Mexican saddle, holsters, etc. He was a guest at the Geiser during his stay here, as was his trusty attendant, Pierre.—Baker City Herald.

Coyotes of the Desert.

"Those wild dogs are peculiar natives of the desert. They are called coyotes and are perfect cannibals, living on the defenseless animals making their homes on the arid lands of the West. Just at peep of day they set up a long howl that strangers often mistake for the war whoop of savages. If you throw them something from the train a fight ensues and some limp away badly crippled. They never become domesticated and are always the hungry looking animals you see on the sandy hills. At night they prowl about the camps of sheepherders and cowboys and steal everything possible. They kill lambs and calves and are a perfect nuisance to stockmen."—Tacoma News.

She—"He's very much in love with his wife. He says if she should die, he doesn't know what he'd do."
 He—"What's the matter hasn't he got money enough to bury her?"—Philadelphia Press.

Play Golf

A Large Onion Yield.

J. M. Bentley has one of the largest onion yields seen in Pendleton for many a day, displayed in his window. The onion was grown by H. C. Chessman, of Milton, and weighs almost two pounds. Mr. Chessman says he had one acre of these onions this season, which made just 654 sacks.

Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surface. We will give One Hundred Dollars for any case of deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Exports of butter continue to decline. In the fiscal year 1901-2 exports of this product from the United States amounted to 16,902,169 pounds, valued at \$2,885,609, against 23,243,526 pounds, valued at \$4,014,905, in the previous year. Twenty-two years ago the exports of this product also were at the maximum and amounted to 39,236,658 pounds, valued at \$6,690,687, constituting an export trade that in value was worth about half the like trade in cheese. In 1895 exports of butter had declined to the low record mark of 5,398,812 pounds, with a value of only \$915,533. As early as 1897, however, they had recovered to 31,345,224 pounds, worth \$4,493,364; but since that date they have declined steadily, excepting for the slight recovery in 1901. Exports of butter, as measured by values, exceeded exports of cheese in the last fiscal year by over \$140,000.

Deep Coal Mining.

It is thought that the mining of coal cannot be continued below the 4000-foot depth on account of physical barriers—the intense heat, besides the pressure of the overlying earth. At a 2500-foot depth in an English colliery circular supports of brick, four feet in diameter were crushed, while cast iron supports 12 inches square were snapped like pipe stems. The royal coal commissioners estimate there are 48,000,000,000 tons of coal below the 4000-foot limit in Great Britain.—Eugene Guard.

The Place to Live.

Weston is among the prettiest home towns in Oregon and has the only state educational institution—the Eastern Oregon State Normal School—in this part of the state. Weston is abundantly supplied with pure water and has granted free water for household purposes for 10 years to all persons who build houses prior to April 1, 1903. You can obtain a good building site on Normal Heights, with water, sidewalks, grading and shade trees free, at a low figure. If you are seeking a pleasant home at an educational center. Address the Weston Improvement Co., Weston, Or.
