IMPORTANT DECISION.

The State Superintendent of Schools Decides That Children Enumerated in One District Can Be Admitted to Another.

School Superintendent J. F. Nowlin has received the following decision which has been handed down by State Superintendent Ackerman in regard to children being enumerated in one district and attending school in another:

"School boards shall admit free of charge to schools of their districts all persons between the ages of 6 and 21, whose parents or guardians reside in such districts at the time of making the appropriation for free admittance to such schools, even though such persons may have been at the last enumeration legally enumerated in some other district."

The above ruling has been made because of the universal dissatisfaction which has been caused by some of the school boards trying to force parents to pay tuition for their children whose enumeration was made in other districts. The law was changed recently making the taking of the school census in June instead of March. In March many people who live in town and send their children to the city schools have removed to the country to oversee their farm and are enumerated there. When they come back in the fall the question is raised as to whether or not they have the right to send their children to the city schools without first paying tuition as the appropriation has been made in another district. The above decision settles the question.
