IMPORTANT RULING

STATE LAND BOARD IS
BRANCH OF GOVERNMENT.

The Supreme Court Says the Decision of the Land Board Cannot Be Appealed.

The Oregon supreme court rendered two important opinions Tuesday. Dr. C. H. Robertson, of Salem, loses his mandamus suit against the state land board, the appellate court holding that the land board is a co-ordinate department of the state government, and its decisions are not reviewable in the courts. The only real question involved in the Robertson case was the right of the state land board to make a ruling granting an extension of 30 days' time in which purchasers of property who had become delinquent in their payments, might make the deferred payments, and avoid the cancellation of their certificates of sale. The court holds that the board is authorized by law to make such rules as are deemed necessary for the transaction of its business. This decision is of great interest locally, as there are a number of other mandamus cases pending against the board, in which the identical question is involved.

Exclusive Right to Fish.

The second case decided was that of R. D. Hume against 20 citizens of Curry county, in which Hume sought to restrain defendants from fishing below his fishery in Rogue River. Hume has owned a fishery five miles above the mouth of Rogue River since 1877, and has used it continuously since that time. The defendants, for a number of years, have attempted to establish fishing headquarters on the river below his plant, and he sued for exclusive right to use both banks of the river, and obtained a verdict in the Curry county courts, sustaining his contention. The case was appealed and the supreme court sustained the lower court. Hume now has exclusive right to fish on both banks of Rogue River five miles from the mouth.

ACTION OF CAREY LAW.

Wyoming, the Home of Ex-Senator Carey, Finds the Law Most Satisfactory.

Portland, Nov. 19.—Governor DeForest Richards, of Wyoming—the home of ex-Senator Carey, father of the Carey irrigation law—wires as follows of the operation of the law in that state:

"In cases where those appropriating water and having lands segregated under the Carey act have been supplied with sufficient means, energy and ability, the working of that law has been successful in this state.

"I do not think that it would be wise, in view of the new irrigation law passed recently by congress, to repeal the Carey law, as both can be used in the same state without conflict. One can be applied to such sections of the country where there is an abundance of water in the streams, whereas the lands intended to be watered under the irrigation act are such as will require the construction of reservoirs or dams, in order that the surplus and waste waters of our streams may be used in their reclamation.

"In all the larger and more difficult projects under the Carey act in this state, \$10 per acre has been the maximum amount charged for water rights."

INDIANS VS. HIGH SCHOOL.

Will Kick the Pigskin on the Local Gridiron Saturday.

Next Saturday the Pendleton high school will play football with the Indians from the reserve. The local high school team has been contemplating playing the Indians, and a few days ago a challenge was sent them. This was accepted and Saturday afternoon was set for the game. This will be a game worth seeing. The Indians are many pounds heavier than the local boys and they are all said to be old football players. Motonic, the famous Indian athlete, will play with the team and several others almost as large and athletic as he will be lined up against the little high school team. However, Coach Bryson is confident of winning the day even against strength. The Indians play good football, but they lack in efficiency and speed. Here is where the school team expects to out-class them far enough to win. The Indians are said to be practicing for the fray and when this game is pulled off it will attract a large crowd.

IT HAS CLEARED OFF.

And Looks as Though a Few Days of Good Weather is Certain.

Will we have a few days of fair weather? It now looks like it as the sun came out bright and clear this morning and all indications are toward a few days of fair weather. However, the weather man says no. He predicts snow, but this would be welcomed with wide open arms, as anything which would be a change from rain would be acceptable just now. The rain has continued for nearly two weeks in, santly and people are getting tired of wading through the mud and slush. Even

cold weather which would freeze the ground, would be met with joy by every one.

YOUNG MEN DETERMINED.

Plans to Be Presented for the New Club House—A Good Site in View.

The proposition to build a clubhouse by the young men of Pendleton is being agitated and the matter will assume a definite head within a few days.

Architects are now at work drawing plans to be presented to the committee to see just what the cost of the building will be and to determine just what kind of a building the young men will want. One or two sites are now in view for this building, but none have been settled upon yet, although there is a likelihood of it being erected on Water street.

Although some of the unprogressive have been trying to throw cold water on the scheme to organize and erect a club building, the ardor of those back of the move has not cooled in the least, and they are receiving the support of all the young men and the majority of the business men, especially those who wish to see the town grow and advance, are putting their shoulders to the wheel and pushing.

Umatilla County Pioneer.

In a private letter to his brother at Weston, Taylor Green, of Woodward, O. T., writes that he has been elected county commissioner of his county. Taylor Green came from Missouri to Umatilla county in 1862, and settled at Weston, on Pine Creek, where he lived for 15 years. He then removed to Union county, where he resided until 1893, when he went to Oklahoma Territory at the opening of the Cherokee strip. He is engaged in the cattle business extensively and is well pleased with that country.

No Council Tonight.

There will be no council meeting tonight on account of Mayor Halley and several of the councilmen being in Portland attending the irrigation convention. It was expected that the matter of a sewerage system would be taken up tonight, and the time set for the election, but now the matter will have to rest another week unless a special meeting is called.

No Golf Tournament.

Owing to the prevailing bad weather of the past two weeks the golf tournament which was to have been pulled off, has been indefinitely postponed. It is said now that no tournament will be held until spring, as it is now too close to the holidays.

Arbitration Board Proposed.

Detroit, Mich., Nov. 19.—The annual convention of the Stove Founders' National Defense Association began in Detroit today with members present from St. Louis, Cincinnati, Pittsburg, Chicago and other cities of the country. The convention will consider and act upon a proposition from the Metal Polishers', Buffers', Platers', Brass Molders', and Brass Workers' Union looking to the establishment of a joint arbitration board for the adjustment of all disputes arising in the trade. The proposition is in most respects similar to the arrangements existing between the stove founders and the iron molders which has prevented strikes in that branch of industry for the past 16 years.

WILL BE REPAIRED

CITIZENS WILL RECOMMEND
COUNTY ROAD IMPROVEMENT.

Section of Road Near This City Needs Graveling, and a Move is on Foot to Secure Needed Repairs.

A move is now on foot which will be presented to the county court at its next session to have the road down the river graveled. It is said for two miles down the river, on the north side, the public road is the worst of any section of road, so heavily traveled, in the county. The bed is low and holds the water, in many places great pools standing for weeks at a time. This makes travel very difficult during the wet season and it is stated that this two miles of road is traveled by more people one day than any other road coming into town. The ground is soft and gets very muddy, making hauling very difficult. Those advocating the repairing of the road claim that with a very small outlay this road could be made comparatively good. It is only a short distance from the river where there is ample gravel for treating the roadbed. This being the case, it would cost little to haul the gravel to the place wanted and the work could be done very rapidly. The bed would have to be raised in places and ways made for the water to drain off instead of standing in pools as it does now.

This is a commendable move and with proper presentation to the county commissioners the matter will no doubt be taken up by them and the road improved.

River is Up.

The Umatilla River is said to be higher now than it has been in many years at this time of year. There is a large volume of water coming through town and the banks of the river are full to overflowing in many places. This is caused by the heavy rains of the past week, which are almost unprecedented.

They Were Married

the other night. The beautiful in her white and the groom looked his best in conventional black. After dining the guests were seated at wedding presents. There were exquisitely decorated silver new school designs, a large bread tray with filigree gold and elaborate scrolls; a plate with cut-out corner center richly decorated with spray, and six small match. Other equally creations in china were over the table. We can help but notice that the wrappers were marked
