Many log rafts from the small streams flowing into the lower Columbia have been washed away by the recent high waters.

TO USE IRON PIPES

THE COUNTY ROADS TO BE PROPERLY DRAINED.

Commissioners Return From Portland Where They Inspect Iron Piping to Replace Wooden Culverts.

While no action has yet been taken it is the intention of the Umatilla county commissioners to buy a car load of iron piping to use instead of wooden culverts along the county roads.

This was one object that took Judge Hartman and County Commissioners Walker and Gilliland to Portland this week, although they went as delegates to the irrigation convention. The county court had been talking of some feasible scheme to get rid of the old wooden culverts along the roads and the iron piping having been suggested to them they went to Portland to look at samples and get prices.

In building county roads where the road crosses a draw in many instances it is necessary to fill in and to do this an outlet has to be provided for the passage of water which runs down all the draws in this country during the wet season. These have been made with wood heretofore and as the wooden culvert will only last a few years when buried in the ground, they have to be dug out and new ones put in every few years. This is not only a continual expense to the county, but is a source of annoyance to the road workers and those who have to travel them.

The iron pipes are intended to do away with this trouble and worry as when once put in there will be no rotting and repairing. In many places these wooden culverts have been put in in draws where they have been covered up several feet with dirt to level up the road. When these rot and have to be removed it is considerable work to replace them. The new pipes will be 16 and 24 inches inside. In most places it is thought that 16-inch pipe will be ample, but at other places where a larger volume of water passes the 24-inch will be used.

TWO MORE FOREST RESERVES.

New Tracts in Eastern Oregon Withdrawn From Entry.

On recommendation of the geological survey, the secretary of the interior today ordered the withdrawal of two additional bodies of land in Eastern Oregon, with a view to the creation of forest reserves. The one tract embraces the Powder river mountains and contiguous country, about 250 townships in all, and extends from the Snake river on the east to a point a few miles east of Union and Cove on the east, the withdrawal being bootshaped and with the toe turned north. The towns of Cornucopia and Medical Springs are about four miles south of the southern extremity of the withdrawal, while the city of Enterprise, as well as Wallowa lake, have been excluded on the north from the original recommendation of the geological survey. Many private entries have been excluded. This withdrawal is also recommended by Congressman-elect Williamson.

The second withdrawal embraces about 14 townships lying along the northern end of the Blue mountain range, following the Union and Umatilla county line, embodying all unoccupied public timber lands, and the headwaters of many small streams tributary to the Grande Ronde and Umatilla rivers. This withdrawal also extends into Washington, where it embraces about 13 townships in Asotin and Columbia counties, being the northern extremity of the Blue mountain range. Practically all of the land included within those withdrawals is unsurveyed. None of the low lands valuable for agricultural purposes have been included, and, as far as possible all lands, covered by entries, of one form or another, have been excluded. It is probable that the presidential proclamation which will finally create these reserves will eliminate all but public lands from

It's Our Treat

the final reserves, which are contemplated as much to preserve the water supply as to preserve the timber.

Our Gunboats Built in Japan.
The United States government has ordered six gunboats to be built in Japan for coast protection in the Philippines. The receipt of an order of this kind is the best evidence of the wonderful progress made by the Japanese in the last half century. The best evidence of the progress made by Hostetter's Stomach Bitters during that time is found in the un-equaled record of cures back of it. Hundreds of people, including many prominent physicians, have voluntarily testified that the bitters cured them of stomach, liver and kidney complaints when other medicines had failed. You will therefore make no mistake in trying it for heartburn, nausea, headache, indigestion, dyspepsia, constipation or biliousness. One bottle will convince you of its value.

Delay in Sale of Road.
Africa, N. Y., Nov. 20.—This was the date set by the United States circuit court for the sale of the New York and Ottawa railroad, but as an appeal has been interposed no further steps in the direction of disposing of the property will be taken until the supreme court has passed on the question. It is said that the Delaware and Hudson Canal Company and the New York Central Company are both anxious to get control of this road, which touches many Adirondack points and has a valuable right of way through other sections of the mountain region.

Chinese pheasants are now on the Willamette valley markets. The open season for this bird is from November 15 to December 1.
