Letters received in London from English and American missionaries at Fez, dated December 30, saying there was little anxiety at that time for the safety of the missionaries, even in the event of the pretender entering Fez.

Now that the United States supreme court has decided that Russia does not pay a bounty on export sugar, and that the countervailing duty is lawful, there is no probability that Russia will remove the retaliatory duty on American machinery, agricultural implements accepted.

The wholesale price of anthracite coal in Chicago has been advanced \$2 at one jump. The increase makes the present wholesale price \$11.50 a ton. Dealers could give no particular reason for the rise in price further than the "condition of the market." They declare the supply of hard coal is still small, and that there is little prospect of more for some time.

The workhouse board of Toledo, O., has issued an order setting at liberty all prisoners held for stealing coal from the railway yards and tracks. The order included directions to the superintendent to receive no prisoners from any court sending them in for petty coal thefts. It is explained that no prosecutions for coal thefts will be recognized by the board during the coal famine.

#### A High-Priced Ride.

The highest-priced ride ever taken on the railroad out of Eugene was indulged in last Saturday when K. McKroskey, a student of the university, jumped on the train and rode about 100 feet down the platform and jumped off again. This was pointed out to him as being a breach of the ordinance prohibiting the same and he appeared before the recorder this morning. The recorder figured out a mild mileage rate for the student and the ride cost him \$6.50. This is at the rate of about \$260 per mile. Mr. McKroskey says he will not indulge in many more such expensive rides.—Eugene Guard.

## FAVOR PRESENT LAW

### PENDLETON BARBERS AGAINST THE REPEAL.

Only One Approves the Bill in Any Form—Barbers Need a Day of Rest.

The proposition to repeal the law compelling the barber shops to remain closed on Sundays meets with the approval of but one Pendleton barber, and he qualifies his disapproval of the present law considerably. A reporter for the East Oregonian last evening interviewed the fraternity in this city and the following is the consensus of opinion as expressed:

J. H. Pace—"I believe in one day of rest for the barbers as well as for other people. I am very glad of an opportunity to get into a state where I can work as hard as I want for six days and rest on the seventh day just as hard."

Lipscomb & Curry—"If it is a barber who has instigated the movement to have the law repealed take him out and kill him."

Lipscomb—"I have no words that will properly express my feelings on the subject, when a repeal of the present law is proposed. My partner and I are both opposed to a repeal of the law."

M. Patton—"All barbers ought to have an opportunity to close their shops on Sunday and go fishing. Six days is enough to work and the barber, same as anybody else, ought to have one day with his family. Six days' labor from 6 a. m. to 8 p. m., with one day's work lengthened until 11 p. m., on Saturday, is all that any man ought to have even a chance to work. Of course I favor compulsory closing."

S. Jones—"Not only ought the barbers to close on Sunday, but they should have an opportunity to close at 6 o'clock every evening, every day in the week. Nearly all laboring men work too long hours. If it is right that ordinary labor should work but eight hours per day, it is certainly not unreasonable that the barbers should not work over 10 hours per day, which would give the eight hour people plenty of opportunity to be barbered."

W. E. Rose was absent from his shop at the bedside of his sick wife, and could not be seen. His son, however, stated what he believed to be his father's opinion, to the following effect: "My father favors Sunday opening for about three months in the year, for the accommodation of the sheep-shearers and the harvesters especially." E. B. Blue, who had charge of the shop, expressed himself as follows: "I don't want to work Sunday unless I have to. I believe in a day of rest. Six days' labor is enough. At the same time I am not disposed to be contrary, and am ready to stand pat with the wishes of a majority of the barbers." Billy Krassig being ill could not be seen.

J. W. Privett—"There is some loss entailed upon the barbers by the Sunday closing law, that is, during the summer. But certainly I do not want the law repealed on that account. Individually, I favor the retention of the present law. Every man needs a day of rest—for mind and body. The barbers need Sunday for rest and recreation as badly as other people do."

#### Finds Way to Live Long.

The startling announcement of a discovery that will surely lengthen life, is made by Editor O. H. Downey, of Churubusco, Ind. "I wish to state," he writes, "that Dr. King's New Discovery for Consumption is the most infallible remedy that I have ever known for coughs, colds and grip. It's invaluable to people with weak lungs. Having this wonderful medicine, no one need dread pneumonia or consumption. Its relief is instant and cure certain." Tallman & Co. guarantee every 50c and \$1 bottle, and give trial bottles free.

## That Third Year

The second important stage in a child's life is reached about the third year. It has begun to walk then and there are greater demands on its bones, muscles and tissues. A great deal depends upon proper nourishment right at this time. The utmost care is necessary in the matter of feeding, particularly if the child has been brought up on the bottle.

The majority of children with rickets either are or were bottle-fed, hence their food should be reinforced by something to make them less liable to this distressing disease. Years of experience prove that Scott's Emulsion is the most effective food-medicine for children who are of the rickety age.

The symptoms of this disease manifest themselves in the slow and imperfect growth of bone and muscle. The teeth are delayed in appearing and cause unusual trouble. The bones of the legs yield when walking and bow-legs are the result. The spine is weak and tends to curvature. The bones of the head are soft and the whole framework of the body is affected. Even prolonged nursing will cause rickets as well as breathing impure air, unsanitary apartments and improper care generally. But in spite of these numerous causes it is a simple matter to avoid and cure rickets. Scott's Emulsion is the easiest, most effective remedy known. It makes new bone, new flesh and rich blood. It puts children on the right path to healthy growth and vigor. It is always a reliable help.

These claims are not made off-hand. We know from nearly thirty years contact with such cases that Scott's Emulsion will do just what we say it will do. We will be glad to send you a sample free so that you can judge for yourself.
