MONDAY, JANUARY 19, 1903.

GENERAL NEWS.

A boiler explosion at Bell's mills, West Newton, Pa., wrecked a saw-mill, killed two men and injured two others, one probably fatally, Saturday.

Forty indictments have been voted by the special grand jury which, during the last week has been investigating the causes of the shortage of coal in Chicago. No names were given out.

Five men were killed and four others were wounded, one of them fatally, by the explosion of a powder charge of an eight-inch gun on board the United States battleship Massachusetts, Friday, while at target practice.

By a new Dutch process, it is claimed that a moist hide can be turned into leather ready for the saddlers and shoemakers's use in from two to three days, while by following the usual method of preparation, it takes about six months.

At the end of a struggle which prolonged the day's session until after 6 o'clock Saturday, the house passed the substitute to the senate bill to establish a department of commerce and labor. All the republicans and 29 democrats voted for the bill.

The most powerful gun ever built in America—a huge 16-inch coast defense rifle—was successfully tested at the government proving grounds, Sandy Hook, Saturday. The gun was fired three times in the course of the afternoon, in the presence of several hundred army officers.

Owing to loaded trains being robbed of fuel and to guard such trains being held up by people rendered desperate because of the coal famine existing in nearby places in the agricultural belt, policemen guard loaded trains while in transit to market through the districts where the famine is the worst.

PACIFIC NORTHWEST NEWS.

August St. Pierre, aged 41, foreman of the Great Northern stone quarry at Baring, Wash., was killed Friday while attempting to couple cars. His family lives in Salem, Mass.

The Oregon state land board has prepared a very complete report relative to desert lands granted the state under the Carey act, and the operations under the law of 1901 accepting the same.

The record price for blue stem wheat on the local market at Walla Walla, was reached Saturday, when approximately 50,000 bushels changed hands, the price paid being 75¢ f. o. b.

Rather than be held a prisoner for burglary, John Lee, of Spokane, a junkman 52 years old, hurled himself to his death Saturday night down the cliffs of the Spokane River, and into the mainstem below the Monroe street falls.

A tremendously rich strike, the magnitude of which has never been equalled since Bob Henderson told his wonderful story of the Klondike, has been made 18 miles north of a point on Tanana River, 300 miles from its source.

Former United States Senator Edward O. Wolcott, who is a candidate for election as successor to Henry M. Teller, of Colorado, has issued an appeal to the republican members of the house to unite and expel 17 democratic members whose seats are contested. Otherwise, he declares, a democrat will be elected senator.

The Lewis and Clark fair bill, appropriating \$500,000 for the great 1905 exposition, is now before the legislature for its consideration. It is on second reading in each house, and is in the hands of special committees. It will be urged for early passage, and it is likely that a final vote will be reached during the present week.

Catarrah Cannot Be Cured

With local applications, as they cannot reach the seat of the disease. Catarrah is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrah Cure is taken internally, and acts directly on the mucous surfaces. Hall's Catarrah Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrah. Send for testimonials free.

CHARTER CHANGES

PUBLIC SENTIMENT WIDELY DIVIDED ON THE ISSUE.

Petitions Being Signed by People From All Classes—No Partisan Feeling Apparent on the Surface—Will be Difficult to Determine Which Side is Stronger. When Issue Goes Before Lawmakers.

The petitions for a change of the city charter, making the office of marshal and recorder elective instead of appointive are being very generally signed by some members of every class of people in the community. The movement does not seem to be confined to any one class. The business men consulted upon the subject by the East Oregonian are as widely divided in their opinions as the laboring people.

No two men in the same business, look at the different phases of the issue, in the same light.

Sentiment is now in a formative period, with many of the leading citizens. They seem averse to making a change before the present method has had a thorough test. They recognize the right of every man to vote for every officer, and yet they recognize the necessity of some means of holding public officers under the direct supervision of the people, through a city council. In case a public officer is unsatisfactory, under the elective system, he cannot be replaced until his term expires, unless his actions warranted severe measures. Under the appointive system the council is the medium between the official and the people and any complaint from the citizens of disobedience of ordinances or carelessness in the performance of duty by the officials would result in an investigation and removal, if the charges were found to be well founded.

It is the current opinion that a longer period for the trial of the present system should elapse before a change is made. Many men have refused to sign the petition who believe in the right of the people to select their officers, but who are very desirous of seeing the present law fully tested before making a change.

There is no partisanship in the movement, apparent on the surface, at least, as men of all political parties are fighting on all sides of the question. The aim of every fair-minded citizen is to make conditions just as good as possible, no matter where the burden falls.

La Grande is trying to change her charter to make these officers appointive, believing it to be the surest way to get good government.

Many business men of Pendleton are non-committal on the subject, and public sentiment is divided, so it will be difficult to determine which side prevails, when the petitions are sent to the legislature.

The Secret of Long Life.

Consists in keeping all the main organs of the body in healthy, regular action, and in quickly destroying deadly disease germs. Electric Bitters regulate stomach, liver and kidneys, purify the blood and give a splendid appetite. They work wonders in curing kidney troubles, female complaints, nervous diseases, constipation, dyspepsia and malaria. Vigorous health and strength always follow their use. Only 50¢, guaranteed by Tallman & Co., druggists.

To Attend Board Meeting.

Colonel J. H. Raley left last night for Salem to attend a meeting of the board of directors of the Lewis and Clark fair, which will be held at the capital today. Colonel Raley says he believes there is no doubt about the passage of the fair appropriation bill, which has been introduced and is now in the hands of a special committee.

W. J. Lewis, the Seventh Day Adventist, who refused to work in the postoffice department Saturdays, will have that day off without pay.

OFFICE SUPPLIES

Typewriter paper—Large assortment direct from the factory.

Book and Stationery Store

A Monstrosity.

The Portland Telegram of Tuesday printed a sketch of some imaginary man—at least we suppose it was from imagination as we never saw anything like it—then labeled the monstrosity "L. T. Harris."—Eugene Guard.

FEELING POORLY—RUN DOWN.

When our appetite lags, when we want to be unnaturally quiet, when the body responds slowly and rather painfully to the demands upon it, we say we are "run down."

We're all of that and more.

Our reserve force is at a low ebb; we're at the dividing line between health and the first ailment that happens along. The system is just in a condition then to take on sickness. It's altogether too common a condition, but it need never last long; it can often be avoided altogether.

Is it a simple matter? Very.

Within the means of everybody? Yes. Easily understood? By everyone of ordinary intelligence. What should be done? What common sense advises for the most part. Rest? Yes; more than under ordinary conditions—much more, all that is possible without giving in to the attack. Air? Plenty; get out into the sunshine; walk; think of something cheerful; keep out of the night air; avoid dampness. And as to food? Your good sense ought to direct you. Whatever will be likely to give real strength. Much depends on proper nourishment, some authorities say all.

And whatever your diet, combine with it Scott's Emulsion; nothing will cause the tired body to respond more quickly. There is in Scott's Emulsion a peculiar element of nourishment that acts directly on exhausted forces, repairs waste and restores worn-out energy. Scott's Emulsion works quickly and without effort, yet one very soon feels the effects of the new force it brings. There is nothing better for the "run down" system.

These claims are not made off-hand. We know from nearly thirty years contact with such cases that Scott's Emulsion will do just what we say it will do. We will be glad to send you a sample free so that you can judge for yourself.
