OPEN THE COLUMBIA

SEVERAL REASONS WHY PORTAGE SHOULD BE BUILT

Will Save the Farmers of the Inland Empire \$1,500,000 Annually—Rates of Arlington and The Dalles Compared.

Why the state should open the Columbia River with a portage road: First—The railroad merger has been and will continue to fight the opening of the river by locks or boat railway.

Second—A state portage will solve the problem.

Third—It will save the producers \$1,500,000 annually.

Fourth—It will increase the population of the state more than any one thing, not excepting the Lewis and Clark fair.

Fifth—The country effected by an open river produces, according to carefully prepared statistics, 10,000,000 bushels of grain, 80,000 head of cattle and horses, 521,330 head of sheep and hogs, 3600 cars of fruit, 16,000,000 pounds of hides, 367,000 tons of hay, all valued at \$30,000,000. In the above country there is 11,000,000 acres of tillable land and but 3,500,000 acres now under cultivation.

Sixth—An open river will save to the producer or above tonnage, \$1,500,000, and in five years, double that amount.

Seventh—The Mississippi River handles wheat a distance of 700 miles for 10 cents per hundred pounds, while the Illinois Central railroad charges 20 cents for the same service.

Eighth—Compare the following rates between The Dalles and Portland and see if you need an open river.

Wheat.
Arlington to Dalles, 54 miles, 11 1/2 cents per Cwt.
Dalles to Portland, 88 miles, 7 1/2 cents per Cwt.

Wool.
Arlington to Dalles, 54 miles, \$1.60 per Cwt.
Dalles to Portland, 88 miles, 25c per Cwt.

Portland to Boston, 3500 miles, \$1 per hundred pounds.

Cattle, hogs and sheep, Arlington to Dalles, 54 miles, \$24 per car.
Dalles to Portland, 88 miles, \$36 per car.

The four class rates are:
Arlington to Dalles, 54 miles, 53c, 48 1/2c, 42c, 36c.

Dalles to Portland, 88 miles, 25c, 20c, 15c and 10c respectively, showing 150 per cent more for an equal distance.

The saving to the farmer is beyond computation. Portland and Astoria will share in the prosperity incidental to the opening of the great stream, the exports will trebble and instead of 14,000,000 bushels of wheat Portland will have 40,000,000 to 50,000,000 for export.

The amount necessary to construct this portage is a mere trifle compared with the savings, and the state owning and operating the same, will get their money back in a very few years. The state portage around the obstruction at Cascade Locks will corroborate the above.

This is not legislation for the benefit of any particular class or section. Every dollar saved to the products of the soil of Oregon is distributed equally to its entire population. Every dollar saved in the transportation of Oregon's products, extends the boundaries of its developed territory.

Is this opportunity to be passed by allowing the railroads to divert the business of another state?

The opening to navigation of the eight miles of the Columbia River between Big Eddy and Celilo, would therefore give an unbroken length of about 540 miles of the Columbia and Snake Rivers that could be navigated and thus provide water communication with tide water and furnish transportation facilities in regions that now have practically none.

HAD HISTORIC BIRTHPLACE.

Sister of State Senator Daly Born on Island of St. Helena.

The sympathy of all who knew him has been generously extended during the past few days to the popular and influential member of the upper house from Benton county, Senator John D. Daly, upon the bereavement occasioned by the death of a dear and favorite sister, Mrs. Mary Fee, at Stockton, California, on last Friday evening. Mrs. Fee's birth makes her name historical. She was born in 1832 in the very room in which Napoleon Bonaparte died, at Longwood plantation on the island of St. Helena. She came to the United States in her early childhood and the greater part of her life was spent in California, where she was highly respected as a wife and mother and a valuable member of society.—Salem Statesman.

To Buy Governor a Home.

Patton Bros., as heirs of the Cooke estate, are making a decided impression on the minds of legislators in favor of selling the historic E. N. Cooke mansion, built by State Treasurer Cooke, on Court street, next to the state house, for a governor's mansion. The residence and grounds cost over \$30,000, and they are willing to sell the same to the state for \$12,000. This would be a great bargain to the state from a real estate point of view and the residence is one that would be a credit to the commonwealth. The governor of Oregon is a democrat, and the action of a republican legislature in providing him with a home would be a graceful compliment. The matter will be presented to the ways and means committee.—Salem Journal.
