

## The best at one-half price

It takes five of the ordinary "quarts" to make a gallon, but a HAYNER QUART is a full quart, an honest quart of 20 ounces, four to the gallon. Now, you pay your dealer at least \$1.50 a bottle for whiskey that cannot possibly be any better than HAYNER, if as good, or \$2.50 a gallon. If you buy HAYNER WHISKEY, you save at least \$1.50 on every gallon. We sell two gallons for about the same as you pay for one gallon of probably poorer whiskey. Just think that over and remember that HAYNER WHISKEY goes direct from our distillery to you, carries a UNITED STATES REGISTERED DISTILLER'S GUARANTEE OF PURITY and AGE, and saves you the dealer's enormous profit. That's why it's so good and so cheap. That's why we have over a quarter of a million satisfied customers. That's why YOU should try it. Your money back if you're not satisfied.

### DEFOREST WIRELESS SYSTEM FOR THE PACIFIC.

Stations to Be Erected in Hawaii, the Philippines and Near Hong Kong.

Washington, Feb. 14.—Wireless telegraphic communication between the United States and the Philippines, via Honolulu, is promised within the next 18 months by Dr. DeForest, with whose wireless telegraph system the navy department has been experimenting at Annapolis. Speaking of the projected work, the doctor said:

"Long before the success of the trans-Atlantic wireless telegraph was publicly demonstrated, the officials of the American DeForest Company had completed plans for an elaborate system of gigantic power stations for spanning the Pacific. By next June there will be two trans-Pacific cables, and it is safe to say that there will be no more cables laid across that ocean. Several months ago the company placed large orders for high power transformers and generators with several large manufacturers of electrical apparatus. Two of the stations (sort) to be begun by the company will far exceed in power those in existence today for Atlantic work. One of these stations is to be in the Philippines, at a point not far from Manila, and the other on the northernmost part of the Hawaiian group.

"This range from Manila to Honolulu is the longest and most difficult in the world, and plants for generating 50 kilowatts are laid out for these two stations. Three towers, each 250 feet in height, are to be erected as near to high water mark as possible at each station, with the buildings for power-house, receiving station and relay offices erected in the triangular space among the towers. The power at these two stations is to be generated by steam—a full plant of boilers and turbine steam engines being provided. These latter will be coupled direct to three 20-kilowatt generators of 40-circle frequency and of a design to furnish a peculiar form of wave. In addition to the stations at Manila and Hawaii, the company will erect a small station at Hong Kong, to connect with the Manila station. The American station is to be erected near the southern end of Lower California Peninsula."

### Has a Fortune Hidden.

Austin, Texas, Feb. 14.—Charles Beeler, who robbed the Wells, Fargo Express Company of \$52,000 at San Antonio, four years ago, will be released from the state penitentiary within the next day or two, when he will have served out his sentence of five years, with time allowed for good conduct deducted. Beeler still has about \$50,000 of the stolen money. At least he is supposed to know where it is, as only \$70 which was found on his person when arrested was ever recovered. The money is supposed to be safely hidden or in the hands of some unknown accomplice, who will turn a big share of it over to Beeler when the latter gains his liberty. It is known that the express company has engaged detectives to watch every movement of Beeler from the time he leaves the prison doors with a view to locating the stolen money or some part of it. Since Beeler's imprisonment the company has sued him and obtained judgment in the sum of \$50,000.
