Digging Irrigation Ditch.

W. T. Shaw, president of the Milton, Freewater & Hudson Bay Irrigation Company is in town on business connected with the company. He states that the surveys to establish levels and determine the exact course of the main ditch will be made at once, and that the work of digging the ditch will proceed immediately thereafter. The company has secured rights of water enough to irrigate 6,000 acres without infringing in the least upon any prior rights of private individuals or any other company. Mr. Shaw was unable to state just how much will be put under water from this ditch this season. It depends upon the demand and upon when the ditch will be finished. The ditch will be six miles long, 10 feet wide on the bottom and 14 feet wide on top, and three feet deep. The Freewater city council has just voted a franchise to the company to run the main ditch for one-half mile on Monroe street, in that place.
