OLD NEWSPAPERS—TO PUT UNDER carpets, on shelves, walls, or for wrapping purposes. Old newspapers in large bundles of 100 each at 25 cents a bundle at the EAST OREGONIAN office, Pendleton, Oregon.

NEWS OF MILTON

WHEAT DAMAGED BY WARM DAYS AND FROSTY NIGHTS.

Personal Notes—A Paper Railroad From Milton to Wallula—Trouble in District No. 10 is Settled—Exercises at DeHaven School a Splendid Success.

Milton, Feb. 23.—S. A. Miller is in Portland on business.

This is examination week in the public school for promotion of pupils. Two young Miltonites, whose names we will not mention, paid \$5 a piece for their fun at the K. of P.'s banquet last Thursday night.

The warm days and the cold frosty nights have damaged the wheat some in this vicinity of late.

Charlie Williamson, of Weston, and Dallas Gerrard, of Walla Walla, spent Sunday in Milton.

Mrs. Dick Chastain went over to Weston Sunday evening on the train to see her father, who has just returned from the East.

Brown and Frazier sold the C. B. Stewart place in Milton last week to R. O. Hadley, of Huntville, Wash. There is a fine peach orchard on it and as good as any in the valley.

Clay Moss has his new house six miles east of town, nearly completed.

Mr. and Mrs. Jesse Michaels, of Genesee, Idaho, are here on a visit with Mrs. Michael's parents, Mr. and Mrs. W. W. McQueen.

Mr. E. K. Henry left last week for his old home in Tennessee, after visiting a few weeks among relatives and friends. He will return, bringing his mother along with him.

Born to Mr. and Mrs. Harvey Huber, February 17, a son.

E. A. Samuels, of Yakima, Wash., was in town Thursday on business.

Mr. A. T. Brewer sold his town property last week to a Mr. Hadley.

Mrs. Adkins, of Heppner, is with her daughter, Mrs. C. W. Toward, who is ill.

S. F. Harrington has returned from Altre, Wash., where he has been for some time with his two sons, who have had the measles.

David Ross, of Palouse, who has been sick at the home of his son for some time with pneumonia, was able to return home last Saturday.

Walla Walla has had a party out surveying a site for a power house on the Walla Walla river above Milton, for the last 10 days.

B. F. Oshorn says that he is tired of baching and paying \$16 a month for a house in Walla Walla and will move his family out on his ranch in a few days.

Kyle McDaniel was in town Saturday, buying wire to fence in a part of his ranch, preparatory to plowing as soon as his school closes.

Wheat Damaged.

The warm days and cold, frosty nights, have damaged the wheat some in this vicinity, and farmers are getting ready to reseed as soon as the weather will permit. The fruit here is all right, but should the weather continue as it has, there is danger of it being more or less damaged.

Paper Railroad.

Milton has a new railroad built on paper from here to Wallula. The enterprise was born last week and will be full grown (?) in only 22 miles from here to Wallula and a level grade all the way and it would be an easy matter to build a road. Further developments await our plan for a write-up.

School Trouble Settled.

The trouble over the location of another school house in district No. 10, has been settled and a new house will be built one mile south of the present building. This is a sad mistake and the day will soon come when not only a part of the district will see it, but all.

Wise Sky Pilots.

Some time ago Rev. D. C. Sander-son announced that the male members of the Epworth League would give an entertainment, and in a few weeks the female members would do the same. Just what object he had in view at that time, no one seemed to know, but since the "bachelors' banquet" and one can see. To cut a long story short, there are more "old bachelors" got girls and more "old maids" got beaux now than Milton ever thought of, and as a result there will be more weddings in Milton this spring than ever was dreamed of in our town and the preaches will have lots of "eagles" in their pockets, see?

Exercises at DeHaven.

The exercises at the DeHaven school house last Saturday evening were a success in every particular. The program as announced was rendered to a crowded house that showed its appreciation by throwing \$9.25 into the hat as it was passed around. After the contribution, two tables, 60 feet long, were quickly spread with—well, it isn't necessary to mention it, but after something over 200 had been filled there yet remained enough for 100 more. After spending an hour in social chat all repaired to their homes feeling that it was one of the best times they ever had.

Smiths Afflicted Again.

The Smith family, who have been afflicted with smallpox for the past 10 weeks, have two new cases in the family again. One boy is ready to be

released. The father will be able to be released in another week, but cannot on account of the last new cases. The boys are pretty sick.

WANT A RAILROAD.

Milton Citizens Appoint a Committee to Run a Preliminary Line.

Milton, Feb. 23.—Milton is out for another railroad, and its citizens and the farmers adjacent have held two meetings and appointed a committee to run a preliminary survey and set grade stakes.

At the last meeting, held Thursday, a committee composed of "Lucky" Shaw, William Goodman and William Nichols was named to carry out instructions.

The line as projected will traverse 30 miles from a point two and one-half miles above Milton to the Columbia River, to connect with the Northern Pacific railroad.

The interests behind the project will make the preliminary survey, and then if it shall fall to induce the Northern Pacific to construct the road, the farmers and citizens will endeavor to build it themselves.

The Irrigation Association formed at Milton about a month ago met in that town Thursday and appointed a committee to carry out a survey between Milton and William Goodman's ranch on Pine Creek. It is proposed to construct a barrel flume, and the area to be irrigated comprises 16,000 acres.

ARTESIAN WATER

MORROW COUNTY WELL IN THE OIL FIELDS.

Columbia River Development Company Discovers Strong Artesian Flow—May Prove to be a Solution of Irrigation in the Adjacent District.

Ros Beardsley, of the Columbia River Development Co., was in the city this week for the purpose of leasing more lands in the Castle Rock oil district on the Columbia river, says the Heppner Gazette.

Mr. Beardsley states that the company is very much encouraged over the oil prospects. An oil expert from Ohio, who recently inspected the district has made a very encouraging report.

The Columbia River Development Company, composed of Heppner and Arlington people, was organized last spring, and has been boring with a churn drill.

Two wells have been bored, the first one at Alder creek where a hole was put down 100 feet. The drill was moved to the mouth of Dead Canyon.

When the drill reached a depth of 114 feet at Dead Canyon, there was such a flow of water that drill operations were stopped. The water still continues to flow and in spouting out of the ground makes a noise that can be heard for quite a distance.

Drill operations will be commenced again in a few days.

Whether oil is found or not, the discovery of artesian water in this portion of the country along the Columbia, known as the sand country, is of no little importance. The application of water would transform this now barren waste into a rich and productive district that would support thousands of people.

Already the discovery of water has created quite an interest in this district. Several surveying parties are now on the ground and the land is being taken up.

Above Coyote and Long Island operations will be commenced in drilling for water. Arlington and Dalles parties will soon commence drilling about five miles south of Castle Rock.

The artesian water found shows a temperature of 69 degrees.

As the altitude is only from 200 to 300 feet above the sea level in a good portion of the sand country, it is thought there will be plenty of water on both sides of the river wherever wells are drilled deep enough to be on a level with the river.

Notice.

We, the undersigned, will be in Pendleton within a few weeks, for the purpose of purchasing three hundred (300) more or less head of horses, for the United States cavalry, therefore, would instruct owners in this vicinity, to get their horses in proper shape to conform to the following requirements:

Geldings—Roans, light and dark sorrel, and other hardy colors. They must be sound, gentle under the saddle, with free and prompt action at the walk, trot and gallop; without defect or blemish; of kind disposition, to weigh not less than 950 pounds, nor more than 1150 pounds, from 15 hands 1 inch to 16 hands high; from four (4) to eight (8) years of age; suitable for the United States cavalry.

We will notify you later, the date we want the horses brought in for inspection.

Yours truly,
HENRY OLDENSTADT,
HERMAN METZGER,
For further particulars, write to Herman Metzger, Portland Ore.

Ladies' half soles 40c. Teutsch.

Wasting Away.

Lack of fat in the food is the beginning of a wasting condition. So many people that we meet are thin and keep getting thinner. Perhaps there are some in your own family. Look for the cause and it is more than likely you will find that such people do not eat the fatty portions of their food. They either will not or cannot eat fat, and yet it is the absence of this element in their ordinary food that causes a wasting condition.

For such people we offer Scott's Emulsion as containing in the most palatable and easily digested form the element of fat they need. It supplies, and more than supplies, the lack of fat in ordinary food. A small quantity (a teaspoonful for a child and a tablespoonful for an adult three times a day) will enable the body to get the strength and proper fat supply that it needs.

Scott's Emulsion is cod liver oil so prepared that all of it is utilized by the system. Raw cod liver oil is not only repulsive to the taste but only a part of it is taken into the system the weakened organs being unable to digest it all.

The emulsion passes almost immediately through the stomach and into the blood. The stomach is scarcely aware of its presence there. It shows itself first in the nourishment it affords and the new strength that it gives. The weight gradually increases and the flesh becomes firmer. It is the return to health; the stopping of the wasting condition. Scott's Emulsion has supplied the elements of fat that the body needed.

It is not a question of how much you eat or can eat or even of appetite. It is rather what becomes of the food. Does it contain the proper nourishment and the right proportion of fat? If the food does you no good it does you harm, for digestion is work, and when the body is in a wasting condition the stomach must work to some purpose. Scott's Emulsion saves a great deal of this work, and what is more makes it effectual.

We place on every package of Scott's Emulsion our trade mark label of a man with a big fish on his back. It is our personal guarantee that the emulsion is right in every respect. If this label is missing you are not getting the genuine Scott's Emulsion, which means that you are not getting the full value of the oil or the kind of a preparation you need.

We'll send you a sample free upon request.
