SPRAYING ORCHARDS.

Prospects for Good Crops Were Never Better and Work is Being Pushed Rapidly.

Walla Walla, March 17.—Orchard men in the vicinity of Walla Walla have started spraying and the work will be pushed as rapidly as possible till it is finished, weather permitting. The heavy fall of rain and snow in the past week has resulted in no damage to spraying operations, with the exception of delaying them.

Very few pests have made their appearance yet, but it is not expected that the Walla Walla valley will be free from them this season, though it is admitted that the number of pests and the damage they will do will not be as great as it was last season. The codlin moth, the most dangerous of all, does not make its appearance until late in the spring, and a determined effort will be made to exterminate it.

Thousands of new fruit trees are being planted this season by those owning orchards, 4,000 alone having been set out at the Blalock Fruit Farm, west of the city. The amount of fruit to be raised this season is expected to be greater than ever before and the prospects for a good crop were never better.

Notice is hereby given that all taxes for the year 1902 are now due and payable at the sheriff's office. Taxes unpaid become delinquent on April 1. No rebate after March 15. By order of county court.

A COMMON ERROR.

The Same Mistake is Made by the Majority of People.

It's a common error To plaster the aching back. To rub with liniments, rheumatic joints.

When the trouble comes from the kidneys.

Doan's Kidney Pills cure all kidney ills.

Here is positive proof. A. Ammann, shoemaker, of 1024 Santa Fe avenue, Denver, Colo., says: "When Doan's Kidney Pills stopped an aggravated case of kidney complaint in the summer of 1899, I made that fact known to the residents of Denver so that others who had kidney trouble in any of its various forms might know what course to pursue to get relief. The opinion I then expressed is the same today, as it was when Doan's Kidney Pills were first brought to my notice. I have had no occasion to use any medicine for my kidneys since. When Doan's Kidney Pills affected a cure in my case that cure was permanent."

AN EXPERIMENT

Is sometimes a costly experience for the man who makes the experiment or for the person, animal or object experimented upon. Some experiments are necessary for the advancement of civilization; and though frequently money is lost by the experimenter, the ultimate benefits often result in great good to humanity and this has been the case with the many successful experiments in

IRRIGATION

In the Columbia and Snake River Valleys. Farming under irrigation anywhere in this region has passed the experimental stage to grand success, has stood the tests of the Western Farming Public, a most critical judge, is growing in favor every day and has fully substantiated the claims of the Experienced Irrigator "that the application of water to our desert lands would render them equal in value to

ANY IRRIGATED LANDS ON EARTH."

The lands under our system of irrigation canals, earlier springs, later falls, better transportation facilities, easier access to markets and are capable of a wider range of production than any other lands in the great Columbia and Snake River Valleys.

A vivid and realistic train of care rounding a curve, and crossing a bridge in view of the audience, is one of the many startling devices employed in this truly great production.

Wanted to Mob "Chink."

The young ladies of Reynolds hall yesterday morning were treated to the brutal spectacle of two Chinamen beating a horse near the hall until the animal could hardly stand. Some of the more adventuresome wanted to go out and mob the Celestials, but more sober-minded ones finally telephoned to the sheriff's office. An officer is investigating the case today, which is reported to have been a brutal exhibition.—Walla Walla Statesman.
