NEWS OF MILTON

SOMEONE TRIED TO BURN WAREHOUSE TUESDAY.

Spraying Trees Now in Order—"Bobby" Brown Died Saturday—A. M. Elam and Daughter Return From East—Excellent Program for the Teachers' Institute Saturday.

Milton, Or., March 25.—Spraying fruit trees and making garden are the order of things in this section this week.

Rev. Shangle, the presiding elder of the M. E. church, South, is moving into his property, recently purchased of Clay Moss, at the northern end of Mill Street.

Harry Hubbers has sold his ranch on the mountain east of town and moved to Wammucca, Wash.

A little child of S. Nellis, who lives near the depot, died Tuesday after an illness of several weeks.

An old gentleman, whom everyone knows as "Bobby" Brown, died at his home on Basket Mountain last Saturday and was interred in the city cemetery Sunday.

A. M. Elam and daughter, Bertie, who have been visiting in the East since the first of last November, returned home last Sunday evening. They say that they had a pleasant time, and enjoyed their visit very much, but prefer Oregon to anything that they saw while gone.

The program prepared for the local institute, to be held here Saturday, if carried out, will be interesting and a good time is expected.

J. N. Stone has conducted nine funeral services at this place in two weeks.

The Bowls school, taught by Miss O'Hara, of Dry Creek, closed today.

Merlin Whiteman, in North Milton, is convalescing after a severe tussle of scarlet fever. The Williams family are about well and the quarantine will be raised in a few days.

Fighting for Water.

The two irrigation companies who have headquarters at Freewater, met in joint convention at that place Tuesday, to consider the matter of getting water out in the new ditch of which W. T. Shaw is president, but could not decide on anything as the old company told the new that they owned the river below Milton and would not let them have any water. They will meet again soon with some legal talent present, when they hope to come to some conclusion.

Fire at Depot.

A few minutes after the Spokane-Pendleton train passed through, on Tuesday evening, smoke was seen coming out from under the Walla Walla Produce Company's warehouse near the depot. At first it was thought that a spark from the engine had ignited in the trash, but on closer investigation it certainly appeared like the work of an incendiary. Where the fire was set, was found a handful of newly-made shavings whittled from a board that had not all burned up. A boy was seen to untie a horse from the railing a few minutes before the fire was discovered, and ride away as fast as the horse could run. What the motive was is a mystery, as Mr. Mumford, the manager here, has not an enemy around. Quick help and willing, soon extinguished the fire before any damage was done.

THE GRANDE RONDE.

(Concluded.)

ton Irving speaks, was for many years the "Big Medicine" of the Indians.

A Large New Sanitarium.

Several years ago a small building was put up at the site of this spring and a stone retaining wall built around the lake. From this small beginning has come the present commodious and popular resort.

It is owned by W. M. Pierce, of this city, and Dr. G. W. Tape, who manages the sanitarium. The water boils forth at a temperature of 192 degrees. About 2,000,000 gallons of water a day is the flow from this spring. The buildings are heated without expense by a system of hot water pipes piped from the spring. A line of green houses is to be heated in the same manner thus ensuring flowers and fresh vegetables the year around. It is destined in time to have a more than local or state reputation.

Cove's Rich Resources.

Cove is another point of especial interest. It is located in a sheltered cove as its name implies and is in what is known as the thermal belt. Some of the largest, firmest and best flavored cherries to be found anywhere are grown here. Other fruits and vegetables also do well. Most of its cherries and fruit are marketed in the Central or Eastern states. The Grande Ronde valley with its splendid climatic conditions, beautiful scenery and varied resources, embracing lumber, hay, fruit, livestock, sugar, etc., is a little empire within itself.

FRED LOCKLEY, JR.

DOCTORS ENDORSE HERPICIDE.

Because its Formula is Submitted to Them.

Alexander McMillan, M. D., a prominent physician of Lansing, Michigan, writes: "On three cases I have tested Herpicide for dandruff and the result has been all that could be desired."

Herpicide is made upon an entirely new principle, that is, that dandruff and falling hair are caused from a microbe that infests the hair bulb, and by destroying the microbe one's hair is bound to grow luxuriantly. Herpicide is the only hair remedy that claims to, and really does, destroy the dandruff germs. Sold by F. W. Schmidt & Co. Send 10 cents in stamps for sample to The Herpicide Co., Detroit, Mich.

A man who advertised for a cook and a music teacher received nine answers to the former advertisement and 389 to the latter.

We Want a BRIGHT BOY to work after School Hours

Any boy who reads this advertisement can start in business on his own account selling
