SCALE AND APHIS

MANY TREES AFFECTED IN UMATILLA COUNTY.

Byron Murch, Tree Expert, Gives Some Timely Advice on Care and Treatment of Trees.

Byron Murch, the tree expert, has noticed a great deal of scale and aphid on the fruit trees throughout this part of the state this spring. The condition is not confined to Umatilla county by any means, but prevails all over Eastern Oregon.

There are here and there areas of limited extent where there is little evidence of either affection. Hundreds of fruit raisers are spraying and whitewashing and using all the devices they have ever heard of for mitigating the trouble. Mr. Murch calls attention to a remedy for both the scale and aphid that he claims is extremely effectual, although there is the widest kind of difference in the character of the scale and the aphid, the former being fungoid and the latter a parasite.

His Remedy. The remedy consists in boring a quarter or a half inch hole in the affected tree, or rather several holes, the number depending upon the size of the tree and the severity with which it is afflicted. The holes may be bored directly toward the center of the tree (but should not touch the core) or they may be bored more nearly parallel with the side of the tree. Then fill the holes with sulphur, plug tightly and pay no more attention to them. This should be done in the early spring, just after the sap has begun to flow freely.

In 12 or 14 days the scale will become dry and almost ready to fall off of its own weight—its capacity for propagating itself and destroying the vitality of the tree will be entirely gone, and it can be removed from the tree with the thumb nail like a streak of whitewash. In case of aphid the parasites swell up, turn yellow and drop off in about the same length of time—from 12 to 14 days.

Does Not Hurt Fruit. Doping the tree for the living parasite is on the principle of feeding a horse sulphur or other remedies for the removal of ticks; the blood of the horse is unwholesome for the insect as soon as the sulphur becomes absorbed into the animal's system. The sulphur in no wise affects the growth of the tree deleteriously, nor does it affect the flavor of the fruit.

EASTERN STAR SOCIAL.

The Masons Are Given Enjoyable Reception—Nice Supper Spread.

Bushy Chapter, Order of the Eastern Star, held a social Tuesday night attended by almost the entire membership of both the Star and the A. F. and A. M. of this place. The occasion was in every sense a most enjoyable one.

The program was limited on account of the failure of some of those to be prepared who had been expected to participate, and was comprised of two numbers. The first was a quartet by Messrs. Rader and Owen and Mesdames Owen and Gavitt. Miss Chloe Stanfield recited.

A portion of the evening was spent at progressive crokinole, William Ingram winning the first prize and Mrs. Wyrick the booby prize. A very nice supper was spread and greatly enjoyed.

ACADEMY PUPILS.

Will Debate the Subject of Public Ownership of the Means of Transportation.

The following is the program for the regular Friday afternoon exercises tomorrow at the Presbyterian Academy:

Recitation, Francis Jackson. Charade, Glen Sturdivant and Stanley Yates.

Dialogue, Elmer Yates. Comic speech, Earl Yates.

Debate, "Resolved, That the United States should take and operate the railroads." Affirmative, Snapp, Penland, Wetzel, Negative, Kennedy, Holder, Johnson.

Talk, Professor Forbes.

The above is a special program in the sense that only boys will participate in tomorrow's exercises.

IN POLICE COURT.

Vagrants Sentenced to Five Days in City Jail.

The following is the police court record for the day: Edward Hayes and J. A. Davis were each sentenced to five days in the city jail for vagrancy. For peddling without a license James Fay was sentenced to seven days in the city jail, which he is now serving. The charge of vagrancy is held against him.

Huggins-Gibbs.

Married, on Wednesday at 7 o'clock p. m., in the parlors of the Golden Rule hotel, James D. Huggins to Miss Eva L. Gibbs, both of Umatilla county. The wedding was a very quiet affair, there being present only a few personal friends of the contracting parties. The ceremony was performed by Rev. E. B. Jones, pastor of the M. E. Church, South, of this city. The bride's mother resides in Athena, as does also the groom, and the wedded pair will make this their home also for the present. The bride was charmingly attired in a suit of dark blue, trimmed with white satin, while the groom was dressed in the conventional black. The many friends of the newly wedded pair wish for them a prosperous and happy voyage on the sea of matrimony.

Kennison-Dunn.

Loran Kennison and Miss Nellie Dunn were married last evening at the Golden Rule Hotel, Rev. N. H. Brooks officiating.

From Indian Territory.

J. F. Grimas, J. W. Grimes and G. W. Grimes, brothers, with their families, arrived this morning from Chelsea, Indian Territory, with the intention of making their permanent abiding place in this county. G. W. Grimas has already engaged himself to work on the Buzz sheep ranch.

One hundred and seven thousand tons of American peanuts were bought at Maracilles in 1902 for use in making olive oil soap.

THE BEST MANUFACTURING COMPANY

STEAM AND HORSE POWER COMBINED HARVESTERS

As McCormick was the original inventor of the reaper and binder, so was "Best" the original inventor of the first successful Combined Harvester.

We wish to call the attention of our friends who contemplate purchasing a Side-Hill Combined Harvester the coming season, that we are still in the lead in the way of improvements, in harvesting machinery, and which our farmer friends have rightfully named the "KING OF THE FIELD." After watching its work in the field the past sixteen years, and for the season of 1903 it will be still better, as we have made a number of valuable improvements.

The MACHINE is the strongest and most durable made.

IMPROVED DRIVE WHEELS—5 feet 4 inches high, 22 inch tire.

RUNAWAYS—are a rare thing with us. There is a brake on main drive wheel, which is controlled by the driver.

HEADER—is driven independently from the grain wheel of separator, and is arranged with a clutch for throwing in and out of gear when turning corners.

THE SEPARATOR—We wish to call your attention particularly to the separating qualities of our machine. We claim that no other combined harvester on the market can in any way compare with its forspeed and thoroughness of work, in all kinds and conditions of grain, and will require less team to operate it.

AUTOMATIC GOVERNOR—Our patent wind governor on the fans governs the blast so that at any speed at which the harvester may be traveling, the wind is automatically regulated and prevents clogging the shoe and carrying the grain over in the straw.

We take pleasure in inviting you to call on Temple & Wilcox, Pendleton, and make a personal inspection of each and every part of our machines before placing your orders. Every machine warranted to do all we claim for it and to be first-class in every respect.
