TAKING UP HOMES

SETTLERS POURING INTO PARTS OF EASTERN OREGON.

Land heretofore considered valueless because arid is being eagerly seized upon as the result of well-boring operations now in progress in that section.

"Vast tracts of land heretofore considered worthless are being rapidly taken as homesteads by settlers in Umatilla and Morrow counties," said Industrial Agent R. C. Judson, who has just returned from a trip to Eastern Oregon.

"A number of those taking up land," he said, "come from points in the Northwest from Yakima, Spokane and the Willamette valley. But the most of them are coming from the East. The arid land is being reclaimed by means of artesian wells, and around Coyote, Castle Rock, The Dalles and other places water has been struck at a depth of 50 feet. Four townships have been taken up already and the rush is assuming a veritable boom.

"Last Saturday 25 intending settlers got off the train at Echo, and 13 at Umatilla, and they are coming into Castle Rock and Coyote at the rate of four or five a day. Back of Castle Rock, in one artesian well water was struck at a depth of 52 feet, but boring will be continued until artesian water is struck. Other wells being bored have produced water at the same depth. The soil is the same as that which has made parts of Eastern Oregon famous as an agricultural district, and will prove equally valuable when water is turned upon it. People here have no idea of the rapid improvements now under way. A good many settlers are headed for the section to be covered by the government ditch.

"This morning I met Mr. Michael, of North Carolina, who is looking over Oregon with a view to finding a tract of land for a colony from his home. At the present time in Portland is a friend of mine who has \$25,000 to invest in a stock farm, and another who wants to invest \$15,000. So you see that a number of the settlers now coming to Oregon have money, and will help to increase the state's wealth right from the start.

Mr. Judson said that the weather was fine in Eastern Oregon. Men were going around "in their shirt sleeves."—Telegram.

SHOCKS THE METHODISTS.

Lyman Abbott Declares That the Bible is Only a Record of Human Religious Experience.

Rev. Dr. Lyman Abbott somewhat startled his hearers at a Methodist ministers' meeting in New York lately, by propounding some of those religious theories that he has elaborated in his book "The Theology of an Evolutionist." The bible, according to Dr. Abbott, is merely a record of human religious experiences.

"I have a respect for the old theology," he said, "and today I can not doubt that the change from the old to the new method of thinking in religion is important, radical and revolutionary. The typical departure is the recognition of what was once called the 'carpenter theory of God's creation of the world,' the belief of the religion that the earth was turned out in a lathe.

"The bible is not a book in which 50 or 60 writers tell what religion is, but it is a record of their religious experiences, a record of their consciousness of God. They were human, they were imperfect men, those who wrote the bible. They stumbled as we stumble."

She Wanted a Change.

A group of young girls were on their way home from the park, where for several hours they had been enjoying the excellent skating. All but one of them were experts. That one was a beginner, and her afternoon had not been wholly devoid, says the Philadelphia Telegram, of the beginner's usual experiences. The girls, looking the picture of health, boarded a homeward-bound car. With a single exception, they all managed to secure seats. The exception was the girl who had just had her first experience on skates. She had stood only a moment, however, when a gallant youth rose and politely offered her his seat. She acknowledged the courtesy with a pleasant bow. "Thank you, sir," she said, "but I have been sitting all the afternoon."

Now that the protocols have been signed, Venezuela steps from the center of the stage and Macedonia comes into the radius of the limelight.

HOUSEHOLD CARES

Tax the Women of Pendleton the Same as Elsewhere.

Hard to attend to household duties. With a constantly aching back. A woman should not have a bad back.

And she wouldn't if the kidneys were well. Doan's Kidney Pills make well kidneys.

Here is a Pendleton woman who endorses this claim:

Mrs. George Hays, living at No. 223 Lillith street, corner West Bluff street, says: "I can recommend Doan's Kidney Pills to all sufferers from backache and other kidney troubles, with utmost confidence, that they will do everything that has been claimed for them by those who have used them as well as by the makers. The trouble for which I used them was principally backache, with which I had been troubled for a long time. It hurt me badly when I stooped to do any housework that caused a strain on the back. I read an advertisement about Doan's Kidney Pills and decided to try them, feeling that they could do no harm, even if they did no good. I got a box in the store of Brock & McComas Co. and used only one box, as that was sufficient to relieve the backache and I have not felt it since."

For sale by all dealers. Price 50 cents per box. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States.

Remember the name—DOAN'S—and take no other.

A New Breakfast Food.

"Do you know the 'Autocrat of the Breakfast Table,' Mr. Tinkham?" asked a lady of her host at a rural dinner party.

"Well, really, now, I don't know," he replied. "We've tried so many of them breakfast foods I can't keep track of 'em. Maria," he called to his wife across the table, "have we ever tried the water-cracker of the breakfast table?"

"I have heard that Miss Chopelin married young Flanders with the idea of reforming him." "Well, she succeeded. He says he'll never marry again if he lives to be a thousand years."—Chicago Tribune.

BIG BOSTON STORE

AN EXPERIMENT

Is sometimes a costly experience for the man who makes the experiment or for the person, animal or object experimented upon. Some experiments are necessary for the advancement of civilization; and though frequently money is lost by the experimenter, the ultimate benefits often result in great good to humanity and this has been the case with the many successful experiments in

IRRIGATION

In the Columbia and Snake River Valleys. Farming under irrigation anywhere in this region has passed the experimental stage to grand success, has stood the tests of the Western Farming Public, a most critical judge, is growing in favor every day and has fully substantiated the claims of the Experienced Irrigator "that the application of water to our desert lands would render them equal in value to

ANY IRRIGATED LANDS ON EARTH."

The lands under our system of irrigation canals enjoy earlier springs, later falls, better transportation facilities, easier access to markets and are capable of a wider range of products than any other lands in the great Columbia and Snake River Valleys.
