Washington, April 3.—There is a general surprise here at the harsh criticism of Sternberg because he was the only foreign representative to bid Roosevelt good-bye. There were many similar precedents during McKinley's administration. The facts are that Sternberg and Roosevelt are old friends and the former had asked Secretary Hay if it would be improper for him to go to the depot. Hay cordially invited him. Sternberg was there unofficially merely in the prerogative as a friend.

CHICAGO CITIZENS WELCOME THE NATION'S PRESIDENT

PENDLETON, UMATILLA COUNTY, OREGON, FRIDAY, APRIL 3, 1903.

Auditorium Filled to Overflowing to Hear Roosevelt's Address on the Monroe Doctrine.

Chicago, April 3.—Six thousand in the shape of an outright and avowed a hall, the standing capacity of which seizure of territory or of the exercise upon the stage of the Auditorium last night. The great building has held for any man than the crowd that filled it last night. From the first floor to the roof it was packed to its ut-

most capacity. When the president, escorted by the members of the local committee, appeared on the platform he met great enthusiasm ,the vast crowd ris-ing to its feet and supplementing its hearty cheers with the waving of programs and the fluttering of handker chiefs

The president spoke on the Monroe doctrine as follows: Mr. Chairman, Ladies and Gentle

Today I wish to speak to you not merely about the Monroe doctrine, but about our entire position in the Western hemisphere—a position so peculiar and predominant that out of has grown the acceptance of the Monroe doctrine as a cardinal feat-ure of our foreign policy; and in particular I wish to point out what has been done during the lifetime of the last congress to make good our posi-tion in accordance with this historic policy

Ever since the time when we definitely extended our boundaries west-ward to the Pacific and southward to the Gulf, since the time when the old Spanish and Portuguese colonies to the south of us asserted their independence, our nation has insisted that because of its primacy in strength among the nations of the western hemisphere it has certain duties and responsibilities which oblige it to take a leading part thereon,

Our Interests Great.

We hold that our interests in this hemisphere are greater than those of any European power possibly, can be. and that our duty to ourselves and to the weaker republics who are our neighbors requires us to see that none of the great military powers from across the seas shall encroach upon the territory of the American republics or acquire control there-

This policy, therefore, not only forbids us to acquiesce in such territorial acquisition, but also causes us to object to the acquirement of a control which would in its effect be equal to territorial aggrandizement. This is why the United States has steadily Berlin, April 3.-Leading papers believed that the construction of the great isthmian canal which is to stand as the greatest ma-terial feat of the twentieth century greater than any similar feat in any preceding century-should be by no foreign nation but ourselves.

The Panama Canal.

The canal must of necessity go through the territory of one of our smaller sister republics. We have smaller sister republics. been scrupulously careful to abstain from perpetrating any wrong upon any of these republics in this matter. do not wish to interfere with their rights in the least; but, while carefully safeguarding them, to build the under provisions canal ourselves under provisions which will enable us, is necessary, to police and protect it, and to guarantee its neutrality, we being the sole guarantor. Our intention was stead-fast; we desired action taken so that the canal could always be used by us in time of peace and war alike, and time of war could never be used to our detriment by any nation which was hostile to us. Such action, by the circumstances surrounding it, was necessarily for the benefit and not the detriment of the adjacent Ameri-

can republics.

These treaties are among the most important that we have ever negotiated in their effects upon the future weifare of this country, and mark a memorable triumph in American dip-lomacy—one of those fortunate triumphs, moreover, which redound to the benefit of the entire world.

The Venezuelan Affair.

About the same time trouble arose in connection with the Republic of Venezuela because of certain wrongs alleged to have been committed, and debts overdue, by this republic of citizens of various foreign powers, notably England, Germany and Italy. After failure to reach an agreement hese powers began a blockade of the Venezuelan coast and a condition of quasi-war ensued. The concern our government was, of course, not to interfere needlessly in any quarrel so far as it did not touch our interor our honor, and not to take attitude of protecting from co ercion any power unless we willing to espouse the quarrel of that but to keep an attitude of watchful vigilance and see that there was no infringement of the Monroe Doctrine—no acquirement of territorial rights by a European power at the expense of a weak sister republic—whether this acquisition might take

is but 5,000, gave encouragement to of control which would in effect be President Roosevelt when he stepped equivalent to such seizure.

Both powers assured us in explicit terms that there was not the slightest many throngs, but never one that intention on their part to violate the was more unstinted in its applause principles of the Monroe Doctrine, and this assurance was kept with an honorable good faith which merits full acknowledgment on our part. At the same time, the existence of hos-tilities in a region so near our own borders was fraught with such possibilities of danger in the future that it was obviously no less our duty to ourselves than our duty to humanity to endeavor to put an end to that.

Resumption of Peace.

Accordingly, by an offer of our good services in a spirit of frank friendliness to all the parties concerned, a spirit in which they quickly and cordially responded, we se-cured a resumption of peace—the contending parties agreeing that the matters which they could not settle among themselves should be referred to The Hague tribunal for settlement. The United States had most fortunately already been able to set an example to other nations by utilizing the great possibilities for good con-tained in The Hague tribunal, a question at issue between ourselves and the republic of Mexico being the first submitted to this international

court of arbitration. The terms which we have secured as those under which the Isthmian canal is to be built, and the course of events in the Venezuelan matter, have shown not merely the ever growing influence of the United States in the western hemisphere, but also I think I may safely say, have exemplified the firm purpose of the United States that its growth and influence and power shall redound not to the harm but to the benefit of our sister republics whose strength is less.

Our Growth Beneficial.

Our growth, therefore, is beneficial to human kind in general. We do not intend to assume any position which can give just offense to our neighbors. Our adherence to the rule of human right is not merely profession. The history of our dealings with Cuba shows that we reduce it to performance.

The Monroe doctrine is not interna tional law, and though I thing one day it may become such, this is not necessary as long as it remains a cardinal feature of our foreign policy and as long as we possess both the will and the strength to make it ef-

feetive. This last point, my fellow citizens, is all important, and is one which as people we can never forget. lieve in the Monroe doctrine with all my heart and soul; I am convinced that the immense majority of our fellow-countrymen so believe in it; but I would infinitely prefer to see us abandon it than to see us put It forward and bluster about it, and yet fail to build up the efficient fighting strength which in the last resort can alone make it respected by strong foreign power whose interest it may ever happen to be to violate

For Strong Navy. There is a homely old adage which runs: "Speak softly and carry a big stick; you will go far." If the Amer-ican nation will speak softly, and yet build and keep at a pitch of the high navy, the Monroe doctrine will go far, est training, a thoroughly efficient do, you will come to the conclusion that it is mere plain common sense, so obviously sound that only the blind can fall to see its truth and only the weakest and most irresolute can fail to desire to put it into force
