### WILL YOU PLAY BALL?

SENTIMENT NOT FAVORABLE TO PROFESSIONAL TEAM.

Four or Five Local Teams Should Be Organized—Interest in Sport Great as Ever, But Other Duties and Expenses Are Heavy.

There seems to be a decided sentiment against Pendleton maintaining a salaried baseball team this year.

This sentiment is not the result of any diminished love for the national sport, but the cost of keeping such a team at a salary ranging from \$80 to \$100 per month and the arduous task of managing the affairs of a regular team form the principal objection.

So far as is now known, none of the Eastern Oregon towns will support a professional team this season. La Grande is just now paying up an old debt contracted in last year's baseball season, and Baker City sports are not yet evincing any willingness to dig up for a professional team.

The general sentiment on baseball in this city seems to be in favor of the maintenance of three or four local teams, made up of citizens of the

town who live here and have an interest in the city's welfare.

Four good teams could be organized here at least, among which would be some of the best players in the Northwest and the games would excite as much or more interest than a game of professionals.

The clerks could select one good team, the high school and academy one, the railroad men one, the draymen one and the barbers an excellent team, and from this number an excellent game could be furnished once each week, and money spent would remain at home.

So many important events are now booked for Pendleton that the cost of the season's amusements will draw heavily upon business men, and the professional ball team seems to be doomed.

There is strong sentiment in favor of home teams. Many good players are to be found in this city and every citizen who is interested in the sport would gladly patronize the games played by these boys.

It is time to begin the season. If a professional team is wanted, the movement toward securing it should be begun. If the professional team is not wanted, let the local teams organize and be in shape to furnish a fast game once or twice a week, from now until snow flies next fall.

Ladies' half soles 40c. Teutsch.

### WOMAN TRIES WOMAN.

Female Justice of the Peace Presides at the Trial of One of Her Sex.

Welser, Idaho, April 3.—Probably the first case state of a woman being tried before a justice of her own sex, occurred at Salubria Thursday. Mrs. E. L. Cole is justice of the peace at that place, and Mrs. Eva Ladds, a resident, was arrested on complaint of John Swan, charging her with assault and battery. The trouble arose over the boundary line of their ranches, they owning adjoining quarter sections. They have had trouble several times. Wednesday they had another racket, when, according to Swan, she swatted him under the ear with her fist, knocking him out in one round.

The case was tried before a jury who were too gallant to convict a woman, and she was found not guilty. The costs were assessed to Swan. Hon. Frank Harris defended the lady and County Attorney Rhea prosecuted. Attorney Harris kept the spectators roaring with laughter. The justice presided with becoming dignity.

Master (gently to new boy)—Smith my boy, can you tell me what a noun is? New Boy (anxious to please)—No, sir; but I'm sure my father could.—Punch.

**HERPICIDE**

**Dandruff and Falling Hair** vanishes before the magic touch of Newbro's Herpicide, the latest scientific discovery. It kills the dandruff germ. Destroy the cause, you remove the effect. Kill the dandruff germ, and your hair will grow abundantly.

For Sale at all First-Class Drug Stores.

The Oregon Daily Journal can be found on sale at Frazier's book store.

### SITUATION

The properties of the HIGHLAND GOLD MINES COMPANY, consisting of twelve claims, (240 acres), and known locally as the KNAPP GROUP OF MINES, are situated on the famous MOTHER LODE system of the Sumpter district, in Baker county, state of Oregon, and on the great Elkhorn divide at the head waters of Rock Creek flowing to the east and Cracker Creek flowing to the west, through that renowned Cracker Creek district of Eastern Oregon, where are situated upon the MOTHER LODE system the North Pole, E. & E., Columbia, and Golconda mines, known the world over as the "Big 4" of Eastern Oregon.

### MEMORANDA OF SAMPLES TAKEN FOR THE PAST THREE YEARS.

BY COL. M. L. LOHMIRE

1899—Glasgow drift west side creek, heavy sulphides, ore from rich streak	\$330.00
From crosscut east side of creek on Eldorado, 16 feet wide, taken in 5-foot sections, north wall	5.78
Six feet in center vein, large sample	2.59
Five feet south side, large sample	5.28
The Bannock Burn tunnel, 7 feet on foot wall large sample	8.25
Bannock Burn tunnel, 10 feet, 6 inches width large sample	7.70
Back 8 feet from face and 2 feet next to hanging wall, large sample	15.90
Same body 14 feet back from face, 4 feet of ore	22.32

From Glasgow drift west of creek, from ore on dump in boxes	398.33
From same point in Glasgow drift, 11 inches wide, 20 feet back from face, 9 inches wide, same drift	491.88
East side of creek, in crosscut next to shaft on Eldorado, 15 feet wide	430.00
Float in and around open cuts half way up the mountain from east end of Bannock Burn tunnel, general sample	4.70
At open cuts near west line, values obtained ranged from	\$28.00 to \$29.00
Small streak in open cut near west end line of Bannock Burn	360.00
Sample from surface near creek east side, 8 feet wide	2.43
JULY—1900.	
Bannock Burn tunnel face, 6 feet in width, tunnel having been driven ahead a few feet	4.10
General sample, 6 feet of ore 8 feet back from face of Bannock Burn tunnel	10.82
General sample of 4 feet of ore, 30 feet back from face of Bannock Burn tunnel	5.70
General sample, 8 feet of ore in open cut 250 feet west, further up the mountain from Bannock Burn tunnel	5.53
General sample next to foot of wall, same place, General sample 2 feet in width, hanging wall 250 feet west of Bannock Burn tunnel	2.56
Bannock Burn claim near west end line 2 1/2 feet ore	9.25
	9.64

Bannock Burn claim, general sample, from large boulders of ore half way up the mountain	16.01
Sample from 14 inches in face of Glasgow	27.10
Sample of lot of float 1000 feet west of Bannock Burn tunnel	4.39
Sample of sulphide ores from Glasgow drift, west of creek	219.00
General sample, open cut 700 feet west of Bannock Burn tunnel	13.22
Memoranda of sampling and results for the fall of 1901 misplaced or lost, but results were good.	
Sampling this fall from the Eldorado tunnel in the face, general sample ran from	\$3.76 to \$15.76 per ton.
Sample of 18-inch gouge or selvage	4.58

### WIDTH AND LENGTH OF VEIN

The vein is traceable the entire length of the claims, thirty-five hundred (3500) feet, and the ore shoots are known to be of immense length, and the values in the same evenly distributed throughout.

The width of the vein varies from ten (10) to forty (40) feet, and has a northeasterly and southwesterly strike of course; the permanency of which has been demonstrated by the development of the other mines on the now famous MOTHER LODE of the Sumpter District.

The vein on this property has been explored thoroughly on the surface by means of shafts, tunnels and open cuts, and is known to carry commercial values the entire length of the claims.

### FREE TRIP TO THE HIGHLAND MINE

If you seriously consider an investment in the Stock of the HIGHLAND GOLD MINES CO., and wish to make a personal examination of the MINE, and personally learn the facts, you may do so without cost to yourself. We will pay your expenses from your home to the
