DOGS FOR PRIZES

SEVERAL FROM PENDLETON AT PORTLAND'S SHOW.

Bummer, the Mascot of Company D, Will Enter Again—Oregon Jessie After the East Oregonian Prize.

Among the number of fine dogs not yet mentioned by the East Oregonian, the following may go to Portland to compete for prizes in the fourth annual show of the Portland Kennel Club:

"Bummer," a giant yellow mastiff, weighing 145 pounds, 7 years old, owned by T. T. Nelson, will compete for the championship prize in his class. "Bummer" was the "mascot" of Company D for two years in the Philippines, and is a beautiful specimen. He has taken three prizes at the former meetings of the Portland Kennel Club, and Mr. Nelson will enter him in this contest with hopes of carrying off still more honors.

"Mark," an English pointer dog, owned by J. W. Sewell, may compete for honors. "Sir Daniel," a Scotch collie, owned by Charles Ferguson, and "Cour de Leon," whose week-day name is "Jack," a Scotch collie, half brother to "Sir Daniel," may also enter the contest.

There is every probability that the East Oregonian special prize cup, offered for the best pointer bitch, will come to Pendleton, as "Oregon Jessie," owned by F. F. Wamsley, stands at the head of this class in the state. The Oregon Daily Journal special prize cup for the best pointer dog, should come to Pendleton also.

The show opens on Wednesday, April 15, and lasts for three days.

MORE GUNS FOR MILITIA.

Requisition Will Be Made on the War Department.

Salem, April 13.—The military board of the Oregon national guard, at its last regular quarterly meeting at Salem, decided in view of the increased membership that will be required for light Battery A, to recommend that requisition be made on the war department for two additional breech-loading guns. The requisition will call for two 3.2-inch breech-loading guns of the latest model, similar to the two already in use by the battery. At the present time the battery consists of about 60 men, but in case the request of the board is granted

ed the additional guns will require 20 additional men, thus increasing the battery enrollment to a regular four-gun battery. The new guns will of course be complete with caisson, limbers and harness. They will require 12 horses to the gun, increasing the present number of horses necessary from 24 to 48, in addition to the horses required by the officers. In case the new guns are granted, the two galling guns at present in the hands of the battery will very likely be turned over to a company of infantry specially assigned to take charge. The proposed increase in the strength of Battery A will make it as large as the city could well support. It being difficult to secure horses for the service when needed, the battery having no horses of its own.

Out of Cattle Business.

J. S. Holmes, who lives eight miles south of the city, reports all crops, including his 200 acres of wheat, as being in fine condition. The principal crops out there are wheat and barley, and the outlook for both is very promising. All livestock is in good condition and entirely free from disease. Mr. Holmes has about completed the disposal of his cattle with a recent sale of 80 head and intends to go out of the cattle business altogether on account of the rapid shrinking of the range, which is going on now. He will hereafter pay more attention to raising mules and horses. Mr. Holmes' experiences are a detail in the transformation of the methods of stock raising in this county, of which the system of intensive sheep raising by the development of cultivated forage, and so raising more sheep on a given area than heretofore is another detail.

Robbed the Grave.

A startling incident is narrated by John Oliver of Philadelphia, as follows: "I was in an awful condition. My skin was almost yellow, eyes sunken, tongue coated, pain continually in back and sides, no appetite growing weaker day by day. Three physicians had given me up. Then I was advised to try Electric Bitters; to my great joy, the first bottle made a decided improvement. I continued their use for three weeks, and am now a well man. I know they robbed the grave of another victim." No one should fail to try them. Only 50 cents, guaranteed at Tallman & Co.'s drug store.

Wanted—Two or three dozen chickens; Plymouth Rocks preferred. Address Box 124.

Two passengers were injured seriously Friday at Battle Creek, Mich., when a Grand Trunk train smashed a trolley car.

A LINGERING COUGH

The cough that holds on in spite of all remedies needs energetic and above all thorough treatment. A mere cough mixture won't do. Root out the cold that causes the cough.

How? Scott's Emulsion. Why Scott's Emulsion? Because it stops the irritation, soothes the tissues and heals the affected membranes. When? Right away. Scott's Emulsion begins to help with the first dose.

We'll send you a sample free upon request. SCOTT & BOWNE, 409 Pearl Street, New York.

Going to Improve

Repair your homes or places of business by having them painted or papered.

THE BEST MANUFACTURING COMPANY

STEAM AND HORSE POWER
COMBINED HARVESTERS

As McCormick was the original inventor of the reaper and header, so was "Best" the original inventor of the first successful Combined Harvester.

We wish to call the attention of our friends who contemplate purchasing a Side-Hill Combined Harvester the coming season, that we are still in the lead in the way of improvements, in harvesting machinery, and which our farmer friends have rightfully named the "KING OF THE FIELD." After watching its work in the field the past sixteen years, and for the season of 1903 it will be still better, as we have made a number of valuable improvements.

The MACHINE is the strongest and most durable made.

IMPROVED DRIVE WHEELS—5 feet 4 inches high, 22 inch tire.

RUNAWAYS—are a rare thing with us. There is a brake on main drive wheel, which is controlled by the driver.

HEADER—is driven independently from the grain wheel of separator, and is arranged with a clutch for throwing in and out of gear when turning corners.

THE SEPARATOR—We wish to call your attention particularly to the separating qualities of our machine. We claim that no other combined harvester on the market can in any way compare with it for speed and thoroughness of work, in all kinds and conditions of grain, and will require less team to operate it.

AUTOMATIC GOVERNOR—Our patent wind governor on the fans governs the blast so that at any speed at which the harvester may be traveling, the wind is automatically regulated and prevents clogging the shoe and carrying the grain over in the straw.

We take pleasure in inviting you to call on Temple & Wilcox, Pendleton, and make a personal inspection of each and every part of our machines before placing your orders. Every machine warranted to do all we claim for it and to be first-class in every respect.

HIGHLAND STOCK

WILL BE ADVANCED IN PRICE

MAY 15th, 1903

Development at the Highland Mine Justifies an Advance in the Price of Stock. It is Much More Valuable Now Than When We Placed the First Allotment on the Market Some Two Months Ago.

CONSTANT DEVELOPMENT AND RESULTS

A crew of men have been constantly at work ever since we acquired this property and the Glasgow crosscut has now encountered and fully crosscut the ledge. In this crosscut we have opened up a body of ore sixteen feet in width carrying good commercial values.

In speaking of commercial values we mean ores which have a sufficient value to pay for the extraction, milling and all other incidental expenses thereto, with enough of a margin left over to pay good dividends to the stockholders.

This large body of ore was not in the nature of a surprise, we simply expected it, as the surface developments showed this same large body of ore, and there was no reason why it should not be encountered in this crosscut and at this depth.

FUTURE DEVELOPMENT

We are now turning to drift on the ledge to the west from the crosscut in order that we may open up the richer ores at a greater depth which are found on the surface throughout the Bannockburn claim.

This line of development, we believe, will prove very interesting to all who are interested, or may become inter-

ested in the Highland mine, as it will certainly open up ore bodies rich in quality and in large quantities.

It will demonstrate that the Highland will rank as one of the largest producers in the district.

From now on the development work will be comparatively easy and not very expensive, as we will be drifting along the ledge where the ground is much easier to work than in the country rock which encases the vein. Every month will show a large increase in our ore reserves.

FREE TRIP TO THE HIGHLAND

To any one who wishes to invest a reasonable sum of money in the Highland mine, we will pay all traveling expenses to and from the mine for the purpose of his making a personal examination.

In offering you a free trip to the Highland we feel that this is proof within itself of the value of this property as it stands to reason that if we did not have a good mine there and all that we claim for it we could not offer you such an inducement.

We would be only too glad to have each and every one who contemplates the investment of money in mines, come out and look over this property and the district in general. In offering to pay your expenses out here and back we feel that we are not running any risk whatsoever as we know positively that no one, no matter how great

or conservative an expert or mining engineer he may be, could possibly, roughly speaking, "turn it down."

POOL YOUR INTERESTS

If you have not sufficient money yourself to justify you in coming to the Highland to look it over before investing, we would suggest that you and your friends make up a small pool and send one of your number out here to look over the Highland. In this way we believe you would get absolute information as to the value of the property you invest your money in, and you will also have an opportunity to learn all about the reputation, standing and ability of the directors of the Highland company.

OUR REFERENCE

We take pleasure in referring you to any bank, business man, or mining man in our own community.

SECURE STOCK NOW

If you wish to secure any of this stock while it is selling at the low price you should send in your order as quick as possible. Those who have not all the money on hand to pay for as much stock as they wish to purchase, may send us a portion of it and we will set the stock aside for you and you can pay the balance later.

THE PRESENT PRICE OF STOCK IS SIX (6) CENTS PER SHARE

NOTICE

In case all the stock we wish to sell you at this price should be sold before your order is received, we reserve the right to return you your money.

Address all communications, and make your checks, drafts and money orders payable to
