GREAT GOLD OUTPUT

WONDERFUL RECENT INCREASE IN UNITED STATES.

Wall Street, New York, is Now the Gold Center of the World—Two Pounds of Gold Dug Out Every Day—Colorado Leads in Production.

New York city has become the gold center of the greatest gold country in the world—the United States.

We have more gold than we know what to do with, and still it flows into our treasuries in a steady stream.

Every ribbon of smoke off the Grand Banks means more gold for Uncle Sam. Every donkey engine hauling and puffing in the Western mines means additional riches for a country whose wealth is already the marvel of the world.

For a century or more we garnered and lived our products for the coffers of Europe. Our prosperity fluctuated at the will of Thread-needle street or the bourses of Paris and Berlin.

Great indeed must the European convulsion be which can now shake the solid foundations of our prosperity.

Because, in the treasury of the United States there are more than a thousand tons of gold—enough to make a vast yellow cube over which a tall man could not look without a step-ladder. Its value is \$638,000,000.

Moreover, Europe is in debt to us. While the countries of the world are squeezing and taxing their peoples, we are going to take some of this gold from our strong boxes and dig a big ship canal across the Isthmus of Panama and build a great navy to keep the peace.

It is no marvel that men of financial genius like Morgan, Yerkes, Gould, Rockefeller and the heavy Wall street bankers, taking advantage of the enormous increase in this country's wealth, have won a victory over foreign rivals and have made us the credit nation.

For years New York has been shipping gold to London. Now as a result of the war for financial supremacy, the bank of England has been forced to pay the remarkably high interest of 4 per cent to keep gold from being shipped from England to America.

The struggle between Wall street and the great trans-Atlantic powers has been like a tug of war with a rope of gold.

First the rope would slip toward Europe. Then our captains of industry would lie down to it and heave, metaphorically, until they grew black in the face, and the gold

rope would trail into our treasuries again.

And now, to use a sporting expression permissible under the circumstances, we have Europe "out of the cleats."

They are out of the race and are apparently in a rage about it. They even threaten to quit playing in our yard. They are not going to give us any part of the new African loan.

When the \$150,000,000 Khaki loan was floated in March, 1900, a very large part of it was taken by American banking houses. More than half of the 5 per cent exchequer bonds of \$50,000,000 were taken in New York. Of the \$300,000,000 consols issued in April, 1901, 35 per cent were taken by J. Pierpont Morgan & Co., Barings, Magoun & Co., Kidder, Peabody & Co., and other American banking houses.

During 1902 this country produced \$80,858,070 in gold, a large output than that of any other country, and the government now possesses a larger quantity than was ever before under one control.

There is enough gold in the treasury to give \$14 apiece to every man, woman and child in the country.

If you do not possess your pro rata it is not the fault of Uncle Sam. Thirty years ago the amount was only \$3.33. Four years ago it was a little over \$10.

Two Pounds of New Gold Every Day But while you have been sleeping and eating and living your life in the non-producing states the miners in the West have been digging out gold at the rate of two pounds a day for every day of the year.

Beside this enormous amount the riches of Solomon were insignificant. In 1 Kings it is recorded that in one year he received "sixteen hundred and three score and six talents of gold"—about \$14,000,000.

Because of the vast amount that has been written about South Africa, the impression is general that it is the chief gold-producing country. Its output was only \$36,000,000 worth last year, and \$9,000,000 in 1901. But the war cut down the production in those years. However, in 1900, when there was no war, the total output was \$73,000,000, or \$8,000,000 less than that of the United States last year.

The increase in the gold production in this country has been tremendous. In 1883 the output was \$30,000,000 in 10 years it had increased only \$3,000,000. Then it began to bound upward, but it never touched the \$80,000,000 until last year.

Colorado led the gold-producing states and territories with a total of \$27,502,429, while California was second with \$17,124,914. Alaska's output was \$7,823,793. Montana produced \$4,134,365; South Dakota, \$3,398,057; Arizona, \$4,155,039; Nevada, \$3,514,412; and Utah, \$3,720,930.

There are in the Union not fewer than 22 states that produce gold, according to the statistics of the mint.

A Great Sensation.

There was a big sensation in Leesville, Ind., when W. H. Brown of that place, who was expected to die, had his life saved by Dr. King's New Discovery for Consumption. He writes: "I endured insufferable agonies from asthma, but your New Discovery gave immediate relief and soon thereafter effected a complete cure." Similar cures of consumption, pneumonia, bronchitis and grip are numerous. It's the peerless remedy for all throat and lung troubles. Price 50c and \$1. Guaranteed by Tallman & Co., druggists. Trial bottles free.

BRILLIANT EMBASSY.

Charlemagne Tower is Fitting Up One of the Finest in Berlin.

Much criticism has been heard in diplomatic circles because the embassies of the United States in Europe were not housed in accordance with the importance of the country.

It has been explained that pretentious houses were not leased because the ambassador had to pay the rent from his own pocket, but it has been hard for Europe to understand that the United States makes no allowance for its diplomatic corps to entertain.

For the first time the embassy of the United States at Berlin is to be in a palatial residence belonging to a nobleman of high rank, in reduced circumstances. The new ambassador, Charlemagne Tower, because of his great wealth has been able to have fitted up an embassy worthy of his country.

Ambassador Tower's new home is one of the finest private buildings in Berlin. It is being decorated in a most artistic manner under his supervision. He is planning to make the embassy at Berlin the most brilliant in all Europe.

His palace windows overlook the stately Reichstag building and the colossal Bismarck statue. The new ambassador intends to entertain on a most lavish scale. He regrets that the reception and dining rooms are not large enough for entertainments on a scale to meet his ambition.—New York World.

They say he's a trifle close. Close? Why, he won't run his 'auto' on a road where the fines are over \$5.—Puck.

FOR SALE

100 head of heavy horses. I wish to sell the entire bunch and offer them for \$40 a head, spring colts thrown in, without charge. About 12 of these horses are broke to work and about 25 of them have been handled and are halter broke. All of the young stock have been sired by an imported Percheron, which weighs upward of 2000 pounds. The Clyde mares are heavy, low block, solid animals. There are a number of splendid 5-year-old geldings in this bunch. This is a bargain for some one. Call on or address for further information
