WORK OF THIEVES

SPALDING PEOPLE COMPLAIN OF BURGLARIES.

Charles Parrish, Under Arrest, Said to be at Head of an Organized Band Whose Numerous Depredations Have Aroused Citizens.

Spalding, Idaho, April 21.—The taking of testimony in the preliminary examination of George Campbell of Spalding, charged with burglary, was held Saturday. Judge Reese will announce his decision later. Charles Parrish, who was arrested for the same offense, waived examination and is also being held to await the decision of the court.

There is considerable excitement here over these arrests, and rumors are current that a number of warrants have been issued for other men who are suspected of being implicated in a number of burglaries and thefts which have occurred here during the past few months. It is said an organized band of thieves and burglars is in existence, with Parrish at the head, and that numerous depredations can be traced to the organization.

The present arrests resulted from the theft of 600 pounds of hams and bacon from Joseph Ziver. A month before this, about the same amount had been stolen from C. T. Stranahan, who had been keeping close watch of Parrish and some other men. When the Ziver burglary and theft occurred Mr. Stranahan explained his suspicions and on Thursday night it being learned that Parrish had driven out of town, the officers at Lewiston were warned and captured Parrish as he was delivering the meat stolen from Ziver.

WORK ON THE GOLCONDA.

A Long Tunnel Being Driven Under Big Body of Ore—Great Shoot of Ore.

The Sumpter American, of the 18th inst., has the following to say of the Golconda mine and the work being done thereon:

It is not generally known that the Wide West claim, adjoining the south end line of the Golconda claim, belonging to the Golconda company, has never been explored, although all of the outcrop of the big lode on the Golconda property occurs on the for-

mer claim. On the Golconda claim, where is found all of the development work heretofore done on this property, there is no outcrop whatever, while the boldest and the best body of surface quartz on the great lode is found on the Wide West, standing forth prominently throughout almost the entire length of this claim. It was this great outcrop of mineralized quartz, showing good surface values, that first attracted the mining men of the district to the values of this ground. This outcrop, occurring on the apex of the hill, could not be explored by tunnel without driving through the Golconda claim, to the north end line of the Wide West.

At the present time the Golconda management is just entering upon this important stage of development. During the past year it has developed to the south of any ore disclosed by the former management, two good ore shoots one of them being the best in values, longest and widest of any ore shoot heretofore disclosed by this or any other company operating the property. This has quickened the conclusion formed because of the outcrop, that the best part of the Golconda mine might yet be revealed in the Wide West claim, under the outcrop mentioned. Accordingly, development has been pushed in that direction as speedily as the same could be done, and in the meantime continue development of the ore bodies heretofore disclosed near the shaft on the tunnel level is now past the south center end-stake of the Golconda and is entering West Side ground, and within 200 or 300 feet of the present face of this tunnel the great outcrop will be reached. Fair values are being obtained from this drift as work progresses, the management stating that the vein is better in place, the walls are more clearly defined, and the gangue of better appearance than at any other point since leaving the big ore shoot on this level some 200 feet back, and that confidently expect great results from this new line of development. If experience gained by development in other mines of this district is borne out in this instance, the largest and best ore shoots ever discovered in the Wide West claim, as every good producer has found its richest and largest ore bodies under the most prominent groups.

The Golconda has driven the 400 level to within 300 feet as far south from the shaft as the face of the tunnel level drift described. It is the intention to finish the development work under the outcrop by means of

this has located and demonstrated the tunnel level drift first, and after the ore bodies there, drop down to the 400 level of the shaft and push that drift under the same shoots with all possible speed.

This new line of development work will in no wise curtail the development of the ore shoots heretofore disclosed in the Golconda claim, as work will be continued at points there with the same vigor as before. The great shoot of ore exposed on the tunnel level, which was first encountered about the beginning of this year and has been proved for a length of 250 feet and for a width of six to eighteen feet, continues just as good in the stopes as on the tunnel level where first located, and holds forth indications of holding out to grass roots, a distance of 160 feet above the highest present stope. Assays taken across eight feet and for a distance of 70 feet in the highest part of the stope Thursday, gave an average value of \$54.40. This is the shoot that is also opened on the 100 level, and the 150 level, and is being driven for on the levels below.

TO SETTLE DISPUTED POINTS.

President Mitchell to Meet Miners' Executive Boards.

Wilkesbarre, Pa., April 21.—President Mitchell of the United Mine-workers, on his arrival here Monday met the executive boards of the three anthracite districts and assisted in settling the disputed points regarding the award of the strike commission. The miners and local coal companies interpret the award in several instances from different points of view, and a conciliation board will be appointed by both sides to reach a definite understanding. Mr. Mitchell will assist the local union officials in selecting the members of this board.

Bids Wanted.

Sealed bids will be received at the county clerk's office of Umatilla county, until 2 o'clock p. m., May 6th, 1903, for the west half of block 85, and all of block 86. Reservation addition to Pendleton, known as the County Hospital property.

Bids for single lots, quarter, half, whole block or the entire tract (21 lots) will be entertained, reserving the right to reject any and all bids.

The right to occupy the buildings will be reserved until about July 1st, 1903. Terms cash.

W. D. CHAMBERLAIN,
County Clerk.

OFFICER IN TROUBLE

WALLACE OFFICER ACCUSED OF BATTERY ON PRISONER.

Michael Malley, Saloon Man, Arrested On Charge of Indecent Exposure, Says Policeman Burton Handled Him Roughly and Stepped on Him—Jury Can Not Agree.

Wallace, Idaho, April 21.—Night officer Burton is having trouble of his own these days. He was tried before a jury in Probate Judge Riddle's court Saturday afternoon on the charge of battery, the complaining witness being Michael Malley, whom the officer arrested Thursday evening on the charge of indecent exposure. The jury failed to agree and a new trial will be given the officer a week from next Wednesday.

Mr. Malley, who is interested in a saloon here, was tried on his charge Saturday noon before Justice Featherstone, but no decision has been given.

In the case of Officer Burton Mr. Malley testified that while he was in the Ryan hotel on Thursday evening Burton followed him into the building. "When the officer came in," said Mr. Malley, "he accused me of being guilty of the charge on which I was arrested. I said to him that if I was guilty why did he not arrest me. The officer said, 'Well, d—n it, I will arrest you.' He took me by the collar, pushed me to the door and threw me, face first, onto the sidewalk as hard as he could throw me. When I was down he stepped on me. He then took me to the city jail."

Burton testified that the arrest was nothing but a usual arrest and that he had no been violent. Other witnesses testified that Malley had been drinking. It is understood that the jury took three ballots and that each time they were three for "guilty" and three for acquittal.

Alabama Sunday Schools.

Huntsville, Ala., April 21.—Several hundred delegates and visitors are in the city attending the twentieth annual convention of the Alabama Sunday School Association. The opening session was held today in the First Methodist church. The reports of the various officers and committees show great gains in the number of Sabbath schools and membership throughout the state.

HIGHLAND STOCK

WILL BE ADVANCED IN PRICE

MAY 15th, 1903

Development at the Highland Mine Justifies an Advance in the Price of Stock. It is Much More Valuable Now Than When We Placed the First Allotment on the Market Some Two Months Ago.

CONSTANT DEVELOPMENT AND RESULTS

A crew of men have been constantly at work ever since we acquired this property and the Glasgow crosscut has now encountered and fully crosscut the ledge. In this crosscut we have opened up a body of ore sixteen feet in width carrying good commercial values.

In speaking of commercial values we mean ores which have a sufficient value to pay for the extraction milling and all other incidental expenses thereto, with enough of a margin left over to pay good dividends to the stockholders.

This large body of ore was not in the nature of a surprise, we simply expected it, as the surface developments showed this same large body of ore, and there was no reason why it should not be encountered in this crosscut and at this depth.

FUTURE DEVELOPMENT

We are now turning to drift on the ledge to the west from the crosscut in order that we may open up the richer ores at a greater depth which are found on the surface throughout the Bannockburn claim.

This line of development, we believe, will prove very interesting to all who are interested, or may become inter-

ested in the Highland mine, as it will certainly open up ore bodies rich in quality and in large quantities.

It will demonstrate that the Highland will rank as one of the largest producers in the district.

From now on the development work will be comparatively easy and not very expensive, as we will be drifting along the ledge where the ground is much easier to work than in the country rock which encases the vein. Every month will show a large increase in our ore reserves.

FREE TRIP TO THE HIGHLAND

To any one who wishes to invest a reasonable sum of money in the Highland mine, we will pay all traveling expenses to and from the mine for the purpose of his making a personal examination.

In offering you a free trip to the Highland we feel that this is proof within itself of the value of this property as it stands to reason that if we did not have a good mine there and all that we claim for it we could not offer you such an inducement.

We would be only too glad to have each and every one who contemplates the investment of money in mines, come out and look over this property and the district in general. In offering to pay your expenses out here and back we feel that we are not running any risk whatsoever as we know positively that no one, no matter how great

or conservative an expert or mining engineer he may be, could possibly, roughly speaking, "turn it down."

POOL YOUR INTERESTS

If you have not sufficient money yourself to justify you in coming to the Highland to look it over before investing, we would suggest that you and your friends make up a small pool and send one of your number out here to look over the Highland. In this way we believe you would get absolute information as to the value of the property you invest your money in, and you will also have an opportunity to learn all about the reputation, standing and ability of the directors of the Highland company.

OUR REFERENCE

We take pleasure in referring you to any bank, business man, or mining man in our own community.

SECURE STOCK NOW

If you wish to secure any of this stock while it is selling at the low price you should send in your order as quick as possible. Those who have not all the money on hand to pay for as much stock as they wish to purchase, may send us a portion of it and we will set the stock aside for you and you can pay the balance later.

THE PRESENT PRICE OF STOCK IS SIX (6) CENTS PER SHARE

NOTICE

In case all the stock we wish to sell you at this price should be sold before your order is received, we reserve the right to return your money.

Address all communications, and make your checks, drafts and money orders payable to
