## CAMPBELL SYSTEM

WHAT IT IS AND HOW IT HELPS.

The Finest Piece of Winter Wheat in the County This Year Was Planted After That Most Excellent Plan—Much Used in Kansas.

The 10 acres of winter wheat a mile and a half from town, planted and treated by the "Campbell system," is said to be the finest piece of wheat in Umatilla county.

It is on the land of William O'Brien, who planted it and is determined to give the system a thorough trial. He is inclined to think that the trial part of it is over, and that what remains is to watch the development of the crop and reap a tremendous yield. At the present time the wheat, which is Red Chaff, stands from 10 inches to a foot high, is a deep green and absolutely thrifty and healthy.

His preparation of the ground was by the following method:

Immediately after harvest last year he plowed the ground thoroughly and immediately thereafter went over the ground with a float or clod smasher of the usual pattern, after thoroughly leveling the ground. Later, as soon as the weeds were up he cut them with a steel-bar weed cutter beneath the surface and followed that by immediately pulverizing with a slab float which made dust of every clod and also pressed down the earth. The wheat was then drilled in eight-inch rows, the rows being perfectly straight.

In the spring, when the wheat was two inches high, it was rolled to mash down all clods and inequalities and also to press down the dirt. With these crops which can be cultivated later the pressing is not done at all, and in any event is postponed until cultivation ceases.

This is the first experiment with the "Campbell system" in this part of the country. There are large districts in Western Missouri, Kansas and the Dakotas where it has been used for a number of years, and where the area in crop by this method is constantly increasing. The secret of the whole thing is no secret at all, but the recognition of the fact that the most effectual mulching ground can have for the retention of

moisture is a thick coat of perfectly dry dust.

Tens of thousands of farmers in the regions mentioned above have in the past seven years demonstrated this. The ground is not fertilized by this process, but on the other hand insects and mice are not harbored, and the system is known to be a great discourager of moles and gophers. It is much more effectually applied in the corn fields and vineyards and orchards, and in fact in the cultivation of any kind of crop where the rows of plants, trees or vines are farther apart, permitting the working of the ground later in the season.

The bare fact that the ground is free from weeds is no reason why such frequent working of the ground should not be done that will keep the surface a bed of dust. The necessity of ceasing all cultivation when a certain stage in the development of any and all crops is of course known to every farmer.

### JOHN GRIFFITH IN "MACBETH."

Large Audience Grets the Production of the Favorite Old Tragedy.

Frazier's opera house was filled to overflowing last night, with an appreciative audience, which was attracted by the irresistible charm of the Shakespearean tragedy in spite of the presence of Ellen M. Stone in the city.

Whatever of local coloring has been thrown into later plays, the fact remains that England's old master yet holds the reins over the hearts of the world.

The rendition of "Macbeth" has been going on nightly in some corner of the world, for three centuries, yet it is ever new. John Griffith played the leading role last night with superb art. His support was also strong, in every detail. As "Macbeth" Griffith was especially strong. He is an actor of intense powers. He imbued the spirit of his character and was living in the environment that made "Macbeth" what he was.

In the splendid climaxes of the tragedy he did not once relax his power nor intensity. In the banquet scene in the fourth act, where "Macbeth" is driven mad by the vision of Banquo's ghost seated with the company, Griffith was superb. This is the most trying point in the rendition of "Macbeth," a point on which Edwin Booth himself often stumbled, and always dreaded to pass. Griffith was equal to the passage and was roundly applauded.

The company supporting Mr. Griffith was strong and able throughout. The play was witnessed by an audience of Shakespearean students in a large degree, and the expression from every one is highly complimentary.

### VILLAGE OF ALTO IN ASHES.

Fire Causes Loss of \$20,000 Worth of Property in a Once Lively Town.

Walla Walla, April 29.—Fire destroyed almost the entire village of Alto, 30 miles northeast of here, early Tuesday morning.

The blaze started in one of the large grain warehouses, belonging to the Pacific Coast Elevator Company. It was quickly communicated to the O. R. & N. section house, and before it died out of its own accord, destroyed property valued at \$20,000.

The Pacific Coast Elevator Company is principal loser. One large elevator and two immense warehouses were destroyed, besides the O. R. & N. depot building, section house and buildings. Origin of the fire is unknown. There was no wheat stored in either warehouse or elevator.

Presbyterian General Assembly Meeting Los Angeles, Calif., May 23-June 2, 1903.

For the above occasion the O. R. & N. Co. will sell tickets from all rail stations in Oregon, Washington and Idaho as follows: One fare to Portland. From Portland to Los Angeles via steamer, from Portland to San Francisco, in connection with P. C. S. S. Co. in both directions, \$35.70, including meals and berth.

From Portland via rail in both directions \$38.00, or via ocean steamer to San Francisco, thence Southern Pacific to Los Angeles and return to Portland, or vice versa.

Dates of sale:  
Via steamer from Portland May 10, 11, 15 and 16th.

Via rail from Portland, May 13, 14, 15th.

Stop-overs will be allowed in California in either direction.

Located Timber Claim.  
Mrs. H. W. Andrews, of Spokane, returned to that city today after a time spent in our vicinity locating a timber claim. Mrs. Andrews is one of Spokane's physicians and said she enjoyed the trip in the mountains very much. She found a timber claim very much to her liking, but can't tell exactly where it is, as she was so turned around in the mountains that she was lost until she reached Pendleton again.

### Cow is Killed.

The cow with the lump jaw, which belonged to Mrs. Ulrich, has been killed by order of Stock Inspector Bean. When the item concerning the animal was printed in the East Oregonian, the state inspector had made no response to Dr. Smith's notification of the condition of the cow, although a week had then elapsed after his notification.

Have your shoes repaired at Teutsch's.

## COUNCIL MEETING

CITY'S SALARY LIST PRESENTED AND ALLOWED.

John Schmidt's Saloon License Renewed—Hose House to be Moved—City Has Opportunity to Sell Lots on Franklin Street.

There were present at the council meeting last night Mayor Halley, Councilmen Johnson, Howard, Somerville, Hartman, Clopton, Switzer and Dickson and Recorder Fitz Gerald, Marshal Scheerer and Fire Chief Withee.

John Schmidt's application for a renewal of his saloon license was granted.

The removal of the hose house on the north side was informally discussed. It seemed to be agreed that probably the best location for it in view of its necessary removal, would be almost directly across the street from its present location. No action was taken. Its removal is necessary on account of the sale of the lot where it now stands by T. F. Howard to August Zeoski.

It was stated that the city has an opportunity to sell two lots and a portion of a third from its holdings on South Franklin street, to C. B. Wade. It was considered by some advisable to not sell the lots as they contain rock which the city will ultimately need; also, the proposition was set forth that as it costs nothing to hold the lots that the city, not being in a position where it must sell, might just as well have the benefit of the appreciation in value which is sure to attach to them every year they are held. The subject was turned over.

The city recorder's salary list was presented and allowed. It is as follows: J. W. Scheerer, 15 days as night policeman, \$37.50; J. W. Scheerer, 15 days as city marshal, \$50; J. H. Armstrong, deputy marshal, \$75; D. Turner, 15 days as deputy marshal, \$37.50; J. D. Brown, 15 days as deputy marshal, \$37.50; Thomas Fitz Gerald, recorder, \$50; C. H. Carter, city attorney, \$25; W. R. Withee, fire chief, \$10; Samuel Osborne, janitor, \$4.50; Pendleton Savings Bank, rent, \$37.50; George Darveau, rent of pound, \$8. Total, \$372.50.

### Notice.

All wheelmen are hereby warned to discontinue riding on the sidewalks of the city under penalty of arrest. By order of city marshal, J. W. Scheer.

## FROM LAST TO FIRST

People used to take plain cod liver oil for coughs, colds, throat and lung troubles after other remedies had failed.

Scott's Emulsion is the modern idea of cod liver oil—the first instead of the last resort when such ailments appear.

The taste of the oil is not apparent and the oil itself is partly digested—makes it easy for the stomach. Scott's Emulsion is a quick, reliable help at all ages.

We'll send you a sample free upon request. SCOTT & BOWNE, 409 Pearl Street, New York.

## Medicines come and Medicines go

but lasting popularity can only be obtained by proved lasting benefits. Have you ever considered why Beecham's Pills are the greatest patent medicine and have outlived competitors? Nothing

but superior merit and usefulness, and that they have proved themselves unequalled for removing the common ailments of men, women and children. Year in and year out thousands of families throughout the world keep

## BEECHAM'S PILLS

on hand for minor ailments, which, if not at once checked, will lead to serious illness. Don't experiment with untried remedies so persistently and plausibly offered, but remember that Beecham's Pills will prove every point claimed and will

## Roll on Forever

If you would look well, feel well and keep well, use Beecham's Pills.

Sold Everywhere. In boxes, 10c. and 25c.

## THE BEST MANUFACTURING COMPANY

STEAM AND HORSE POWER  
COMBINED HARVESTERS

As McCormick was the original inventor of the reaper and binder, so was "Best" the original inventor of the first successful Combined Harvester.

We wish to call the attention of our friends who contemplate purchasing a Side-Hill Combined Harvester the coming season, that we are still in the lead in the way of improvements, in harvesting machinery, and which our farmer friends have rightfully named the "KING OF THE FIELD." After watching its work in the field the past sixteen years, and for the season of 1903 it will be still better, as we have made a number of valuable improvements.

The MACHINE is the strongest and most durable made.

IMPROVED DRIVE WHEELS—5 feet 4 inches high, 22 inch tire.

RUNAWAYS—are a rare thing with us. There is a brake on main drive wheel, which is controlled by the driver.

HEADER—is driven independently from the grain wheel of separator, and is arranged with a clutch for throwing in and out of gear when turning corners.

THE SEPARATOR—We wish to call your attention particularly to the separating qualities of our machine. We claim that no other combined harvester on the market can in any way compare with it for speed and thoroughness of work, in all kinds and conditions of grain, and will require less team to operate it.

AUTOMATIC GOVERNOR—Our patent wind governor on the fans governs the blast so that at any speed at which the harvester may be traveling, the wind is automatically regulated and prevents clogging the shoe and carrying the grain over in the straw.

We take pleasure in inviting you to call on Temple & Wilcox, Pendleton, and make a personal inspection of each and every part of our machines before placing your orders. Every machine warranted to do all we claim for it and to be first-class in every respect.
