

WE BELIEVE IN DOCTORS

We believe that every man when he is sick should call a doctor, and not try to "doctor" himself. We believe there would be far less sickness—far better health—if everybody would do everything possible to co-operate with doctors in taking better care of their health. We believe that the best way, always, is to have a doctor see what the matter is, and write a prescription for it, and then have a reliable druggist prepare the medicine according to the prescription.

Pendleton DRUGGISTS Oregon

East Oregonian

FRIDAY, MAY 1, 1903.

There are four kinds of readers. The first is like the hourglass; and their reading being as the sand, it runs in and runs out, and leaves not a vestige behind. A second is like the sponge, which imbibes everything, and returns it in nearly the same state only a little dirtier. The third is like a jelly-bag, allowing all that is pure to pass away, and retaining only the refuse and dregs. And the fourth is like the slaves in the diamond mines of Golconda, who, casting aside all that is worthless, retain only pure gems.—Coleridge.

OBJECTS TO HIGH VALUATION.

One meeting of the Eastern Oregon assessor, called at the instance of the O. R. & N. tax agent, for the purpose of discussing railroad property values failed to materialize.

Another meeting is now called, to be held at Arlington, next Thursday, for the same purpose.

For the first time in the history of Oregon, railroads, their property is being assessed this year, in Umatilla county, on a basis determined by their earning capacity, just as the farm lands and livestock of the county are assessed.

Heretofore, assessors have stood aghast at the complicated array of liabilities and resources presented by the paid tax agents of the companies. No effort has been made to arrive at a just and equitable basis of valuation for the reason that all the statements of the company's tax and land agents have been considered unanswerable. The result has been that the farm lands, merchandise, livestock and real estate of Umatilla county paid an unjust and unequal share of the county's tax. The levy has climbed up and up and the small property owner has paid the bill.

This year, following a program determined even before his election, Assessor Strain has made a tireless search among the records of the interstate commerce commission, and has reached a basis of valuation founded upon the sworn reports of the company. The earning capacity of the road, its capitalization, the rate of interest paid in dividends and all its manifold resources have been taken into consideration in reaching the basis of assessment which will be used in Umatilla county this year.

Mr. Strain has spared no time nor patience in searching diligently for public records by which to judge railroad values. His conclusions are that the O. R. & N. property is worth between \$14,000 and \$15,000 per mile, and he will assess it on this basis. At this rate of assessment this property will pay its just proportion of taxes. At this rate it will be on an equal basis with farm lands at \$50 per acre and if the tax agent of the company will take pains to go over Mr. Strain's calculations he will find that the valuation is extremely low, as compared to other property similarly situated.

Mr. Strain will decline to attend the assessors' meeting for the reason that the period of assessment is now too far advanced to put any new program in operation this year. Mr. Strain also notified each assessor in Eastern Oregon of his intention to raise valuations, early last spring and urged action at that time.

The Umatilla county assessment will be made upon the basis fixed by the assessor, and the people are perfectly satisfied with it. No amount of discussion at a conference will convince Mr. Strain that his valuations are too high, and Mr. Watts was cordially invited to discuss values in Umatilla county, last week, but absolutely denied having any knowledge of such things.

Just how the tool of the mining and railroad corporations, who is now touring Southern Oregon in opposition to the portage road, can expect to array the fraternal societies against the corporation tax law, is a

THE HOME IN 1925.

The mistress of the home in 1925 will be a chemist. She will be a trained scientist. She will regard her kitchen as a laboratory in which a thousand wonderful experiments will be tried. The idea that the kitchen is a place of drudgery, where only those enter who are forced by circumstances, will have disappeared; and there will remain only wonder that any one could ever have been ignorant enough of the marvelous processes of science to have taken so little interest in the subject.

The kitchen itself will disappear from the basement and from the home forever. In its place, adjoining the dining room, so that the transit from the fire to the table may occupy but a second's time, will be the "Household Laboratory." The mistress of the house and her daughters will find no more interesting period of the day than that which is spent in the well-lighted, well-ventilated, cleanly and comfortably arranged room given up to the constant surprises which science offers to those who will study with interest her wonders in the realm of combinations of food materials and the transformations brought about by varying degrees of heat.—John Brisben Walker in the May Cosmopolitan.

TREASURING DANGEROUS GROUND.

Portland is toying with a dangerous force when she tries to crush the labor unions. She can ill afford to arouse the indignation of her laboring men by refusal to listen to their just demands. She can ill afford to turn the workingmen against the Lewis and Clark Fair, for this is not a Portland enterprise, and its failure would effect the entire Northwest, very seriously.

A few of the large contractors of the city seem to be inclined to act as absolute dictators in the labor situation. There seems to be a determination to keep down wages during the preparations for the fair. While the contractors anticipate very busy and prosperous times for the next two years, they are unwilling to share the prosperity with the workmen.

The workmen declare that the cost of living is constantly advancing and that the fair will be an absolute injury to them unless their wages are advanced. They say that there is a constant advance in rents and this expense will largely increase during the progress of the fair, owing to the acute demand for houses, and that it will be impossible for them to remain in Portland, under the present wage rates.

Even now, there is an inclination among the labor unions to ask for a referendum vote on the appropriation. If Portland thoroughly arouses the labor forces of the state against the fair, by her unjust treatment, the fair appropriation will be jeopardized. There are now many antagonistic forces which would readily unite with the unions to defeat the fair.

Portland is walking on dangerous ground. She should make every reasonable effort to settle her labor troubles, not so much for her own sake, but for the reason that she stands sponsor for the entire Pacific Northwest, on the fair question, and must render an able stewardship.

MOTHER AND CHILD

Scott's Emulsion is cod liver oil made almost as palatable as milk. It is easy and soothing to the weak stomach; it checks the tendencies of children toward thinness.

Scott's Emulsion gives strength to weak mothers because it creates healthy flesh and new blood.

Nursing mothers will find a special value in Scott's Emulsion because it insures a flow of rich, nourishing milk for the baby. More and better than a medicine; Scott's Emulsion is a food.

HEADACHE

"Both my wife and myself have been using CASCARETS and they are the best medicine we have ever had in the house. Last week my wife was tormented with headache for several days, she tried some of your CASCARETS, and they relieved the pain in 200 head almost immediately. We can recommend Cascarets." —GRAS, 277 Broadway, N.Y.

THE BEST MANUFACTURING COMPANY

STEAM AND HORSE POWER
COMBINED HARVESTERS

As McCormick was the original inventor of the reaper and header, so was "Best" the original inventor of the first successful Combined Harvester.

We wish to call the attention of our friends who contemplate purchasing a Side-Hill Combined Harvester the coming season, that we are still in the lead in the way of improvements, in harvesting machinery, and which our farmer friends have rightfully named the "KING OF THE FIELD." After watching its work in the field the past sixteen years, and for the season of 1903 it will be still better, as we have made a number of valuable improvements.

The MACHINE is the strongest and most durable made.

IMPROVED DRIVE WHEELS—5 feet 4 inches high, 22 inch tire.

RUNAWAYS—are a rare thing with us. There is a brake on main drive wheel, which is controlled by the driver.

HEADER—is driven independently from the grain wheel of separator, and is arranged with a clutch for throwing in and out of gear when turning corners.

THE SEPARATOR—We wish to call your attention particularly to the separating qualities of our machine. We claim that no other combined harvester on the market can in any way compare with it for speed and thoroughness of work, in all kinds and conditions of grain, and will require less team to operate it.

AUTOMATIC GOVERNOR—Our patent wind governor on the fans governs the blast so that at any speed at which the harvester may be traveling, the wind is automatically regulated and prevents clogging the shoe and carrying the grain over in the straw.

We take pleasure in inviting you to call on Temple & Wilcox, Pendleton, and make a personal inspection of each and every part of our machines before placing your orders. Every machine warranted to do all we claim for it and to be first-class in every respect.

FOR SALE

100 head of heavy horses. I wish to sell the entire bunch and offer them for \$40 a head, spring colts thrown in, without charge. About 12 of these horses are broke to work and about 25 of them have been handled and are halter broke. All of the young stock have been sired by an imported Percheron, which weighs upward of 2000 pounds. The Clyde mares are heavy, low, blocky, solid animals. There are a number of splendid 5-year-old geldings in this bunch. This is a bargain for some one. Call on or address for further information.

CHARLES E. HOOVER, Alta, Oregon.
