ITS FIRST MATINEE

PENDLETON DRIVING ASSOCIATION HOLDS FIRST MEET.

No Admission Will Be Charged—Association Will Forbid Poolselling and Gambling—Track in Good Condition and List of Entries Will Be Large.

The Pendleton Driving Association will give its first matinee Sunday May 24 at 2 p. m. on the Simpson and Perringer track, east of town. The object of the association when it was formed was to keep the roads in good condition for driving and the dust laid by continual sprinkling.

In order to create an added interest and for the pleasure of those who wish to attend, the meet is held on Sunday next. It was the wish of the association to hold the meet on a week day, but so many were the requests that it be held on Sunday, that the date was changed. Many people could not attend during the week who would be present on Sunday afternoon.

The management wish to state that no betting of any kind will be permitted, neither will poolselling or gambling in any form be tolerated on the grounds. No intoxicants of any nature will be permitted to be brought to the track.

It is simply to be a meeting of good horses for the pleasure of people who admire them. The list of entries is given below. No admission will be charged and as the track is in excellent condition a good meet is expected:

First Race—Boy, sire, Chehalis, owned by Gus La Fontaine; Miss Thompson, sire Westfield, owner Tom Thompson, and Alton B. full brother to Chehalis, by Altamont, owned by Frank Frazier.

In the second race will be entered the following: Nancy Cole, by Westfield, owned by George Peringer; Kitty Clover, by Price Mont, owned by Martin Lynch; Little Willie, Cuvetis, owned by A. E. Heller.

Third Race—Little Girl, sired by Caution, owned by Gus La Fontaine; Prince, by Mt. Vernon, owned by Lester Swaggart.

Fourth Race—Nellie, by Mt. Vernon, owned by William Roach; Mack, Chehalis, owned by Thomas Thompson; Lady Memo, by Membrino Patchen, owned by T. W. Ayres; Brigham, by Silas, owned by Ole Olson, and Lady Goldfield, by Westfield, owned by J. F. Robinson.

Fifth Race—Oveta, by Caution, owned by Charles Baddley, of Weston and Ollie M. Westfield, and owned by James Irvin.

PRIMITIVE TRAVEL.
In Madeira the common public conveyance, or "cab," is a basket-like affair on wooden runners, furnished with a canopy or curtains, and drawn by oxen that make a record of a mile and a half, or at the most, two miles an hour. The wheeled vehicles on the island are so rare that they are brought out only on fete days as curiosities. The reason for this scarcity of wheels is that the hills are too steep to make their use safe, and yet it is so hot that one quickly tires of walking. The thick white dust makes traveling on runners almost as smooth as through snow, but for a long journey a hammock is generally preferred. This is slung between poles which rest on the shoulders of muscular natives, who think nothing of carrying their burden for 15 or 20 miles.

"I suppose," said Mrs. Oldcastle, "that your husband gets a great deal of enjoyment out of his new automobile." "Oh, yes," replied her hostess. "Josiah claims he's one of the best amateur chauffeurs in this part of the country now."—Chicago Record-Herald.

Five years' abstinence is said to be required if the inebriate's cure is to be absolutely permanent.

THE BEST MANUFACTURING COMPANY

STEAM AND HORSE POWER
COMBINED HARVESTERS

As McCormick was the original inventor of the reaper and binder, so was "Best" the original inventor of the first successful Combined Harvester.

We wish to call the attention of our friends who contemplate purchasing a Side-Hill Combined Harvester the coming season, we are still in the lead in the way of improvements, in harvester machinery, and which our farmer friends have rightfully named "KING OF THE FIELD." After watching its work in the field for past sixteen years, and for the season of 1903 it will be still better as we have made a number of valuable improvements.

The MACHINE is the strongest and most durable made.

IMPROVED DRIVE WHEELS—5 feet 4 inches high, 22 inch

RUNAWAYS—are a rare thing with us. There is a brake main drive wheel, which is controlled by the driver.

HEADER—is driven independently from the grain wheel of the separator, and is arranged with a clutch for throwing in and out of when turning corners.

THE SEPARATOR—We wish to call your attention particularly to the separating qualities of our machine. We claim that no combined harvester on the market can in any way compare with us for speed and thoroughness of work, in all kinds and conditions of grain, and will require less team to operate it.

AUTOMATIC GOVERNOR—Our patent wind governor on fans governs the blast so that at any speed at which the harvester may be traveling, the wind is automatically regulated and prevents clogging the shoe and carrying the grain over in the straw.

We take pleasure in inviting you to call on Temple & Wilcox, Pendleton, and make a personal inspection of each and every one of our machines before placing your orders. Every machine warranted to do all we claim for it and to be first-class in every respect.
