THE "JOURNAL WAGON."

Unique Soliciting Outfit Now in the Interior of Oregon.

The Oregon Daily Journal advertising wagon is now rolling along somewhere in the interior of Oregon, where roads are often dim and postoffices scarce.

This unique scheme has attracted great attention, as almost every Central Oregon exchange has reprinted the story of the Journal wagon, as it first appeared in the East Oregonian three weeks ago.

It left Shaniko last week in charge of Paul DeLaney as correspondent, and A. E. Puterbaugh as solicitor. They expect to remain in the field for at least three months, perhaps ending their remarkable trip at Pendleton some time in August.

All the famous battlefields of Central Oregon, all the early settlements, old mining camps, places of historic note and prominent pioneers will be visited and written up.

The Journal will make use of the data gathered in a great harvest or holiday edition this fall.

ONE WAY OUT.

A Resident of Pendleton Shows the Way.

Only one way to cure a bad back. Liniments and plasters may relieve it.

They won't cure it. Backache means sick kidneys. Doan's Kidney Pills cure all kidney ills.

Pendleton people prove this. Read a case of it:

Mrs. J. Brynk, who lives on Star street, says: "Doan's Kidney Pills are a grand medicine, as I know from experience, and I have no hesitation in saying that any sufferer from backache or other kidney troubles who will give them a fair trial, will be more than well satisfied with the results. I suffered from three or four years with sharp pains in my back which became acute when I attempted to bend over, or to lift anything. Besides, I had rheumatism or lumbago in my left arm so bad that I could not raise it above my shoulder without assistance from my left hand. I saw Doan's Kidney Pills advertised and got a box at the Brock & McComas Co. drug store. When I had used three boxes the backache had vanished and with it the rheumatic pains through my arms."

For sale by all dealers. Price 50 cents per box. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States.

The Migratory Sheep of Spain.

There are in Spain pretty close to 10,000,000 migratory sheep which are every year traveled something like 200 miles from the plains to what is called the "delectable mountains," where they are fed until snow falls. These sheep are known as "transhumantes" and their migrations are regulated by ancient laws dating from the fourteenth century. In certain seasons of the year no other stock is allowed to travel on the same route as the sheep, they having a right to graze on all open land on the way, which consists of a road 90 yards wide for the whole distance. The flocks are accompanied by mules and large dogs; the farmers carry the necessary provisions and the dogs act as guards against wolves.

Delightful Summer Res-rt.

Where are you going to spend your vacation this summer? Before you decide this question, investigate Lehman Springs. It is beautifully situated. Plenty of shade, splendid water, excellent accommodations, phone connections with Pendleton and other points, and it is easy of access. A few weeks spent at Lehman Springs will put new vim and vigor into you. The waters of its various hot springs have curative properties. There are 25 cabins, a large hotel and plenty of camping room. You will find it a delightful summer resort. Address C. R. Dutton, Lehman Springs.

Change in Time of President's Special Train.

On request of various business people of the city, the O. R. & N. Co. has changed the time of the special train leaving Pendleton May 25th for Walla Walla to leave Pendleton at 12 o'clock, noon, instead of 10 a. m., as advertised heretofore. Make a note of this and bear in mind the special train leaves at 12 o'clock noon. This change in time no doubt will be appreciated by the business people, and public generally, as it will only be necessary to be absent from the city one half day.

For the trip to Walla Walla. Those desiring to leave earlier in the day can do so by using the regular train at 8:15 a. m.

RAILROADERS' CONVENTION.

Brotherhood of Trainmen in Session at Denver.

Denver, May 18.—The sixth annual convention of the Brotherhood of Railway Trainmen, met here today and probably will continue for two weeks. Matters of routine character were discussed at the opening session. Changes in the constitution and matters affecting the insurance branch of the order are the principal questions before the convention, the sessions of which are secret. More than 1,000 delegates and visitors are in attendance. Buffalo and several other cities are bidders for the next convention of the order.

The report of the secretary and treasurer shows the organization to be in a flourishing condition. During the last fiscal year there was an increase in the membership of 9,000, making a total of 60,000 in round numbers, scattered over all the prominent roads of the United States and Canada. During the year 32 new lodges were organized, making a total of 670 lodges.

Largest Order of Railroad Men.

The Brotherhood of Railway Trainmen is the largest order of the kind in existence and was organized for the purpose of lending mutual aid to the members of that vast army of workers who handle and care for the trains of the various roads of America. It organized at Oneonta, N. Y., September 23, 1883, taking for its model the large and successful order, the Brotherhood of Locomotive Engineers. Not only does the order work for the temporal interests of the trainmen, but it has attached to it as an auxiliary an insurance order, wherewith to provide for those who are left when the far too common switching, ditching or wrecking accident takes away the head and support of the home; when the unannounced crash tells of trouble ahead, and the cars are piled in telescoped heaps on and around the track and beneath is the mangled bodies.

In the beginning the name of the order was the Brotherhood of Railroad Brakemen, but as the order grew, the others of the train crew evinced a desire to associate themselves with the order, and its title was broadened to suit the broadened conditions.

THE BEST MANUFACTURING COMPANY

STEAM AND HORSE POWER
COMBINED HARVESTERS

As McCormick was the original inventor of the reaper and binder, so was "Best" the original inventor of the first successful Combined Harvester.

We wish to call the attention of our friends who contemplate purchasing a Side-Hill Combined Harvester the coming season, that we are still in the lead in the way of improvements, in harvesting machinery, and which our farmer friends have rightfully named "KING OF THE FIELD." After watching its work in the field for past sixteen years, and for the season of 1903 it will be still better as we have made a number of valuable improvements.

The MACHINE is the strongest and most durable made.

IMPROVED DRIVE WHEELS—5 feet 4 inches high, 22 inch tire

RUNAWAYS—are a rare thing with us. There is a brake on main drive wheel, which is controlled by the driver.

HEADER—is driven independently from the grain wheel of separator, and is arranged with a clutch for throwing in and out of gear when turning corners.

THE SEPARATOR—We wish to call your attention particularly to the separating qualities of our machine. We claim that no other combined harvester on the market can in any way compare with for speed and thoroughness of work, in all kinds and conditions of grain, and will require less team to operate it.

AUTOMATIC GOVERNOR—Our patent wind governor on the fans governs the blast so that at any speed at which the harvester may be traveling, the wind is automatically regulated and prevents clogging the shoe and carrying the grain over in the straw.

We take pleasure in inviting you to call on Temple & Wilcox, Pendleton, and make a personal inspection of each and every part of our machines before placing your orders. Every machine warranted to do all we claim for it and to be first-class in every respect.
