MONEY IN HOGS.

Union County Farmer Advises Walla Walla to Feed Wheat.

A forceful demonstration of what diversified farming will do, was given at Walla Walla a few days ago, by W. J. Townley, of Union, Or., a hog-raiser of note, who says that the farmers of the Walla Walla valley who now sell wheat at from 50 to 75 cents a bushel, can get half as much again by feeding it to hogs. Mr. Townley follows this method himself, and says it is a winner. His fine 2,200-acre ranch in Union county is known all over Eastern Oregon.

Mr. Townley gave while here a resume of feeding experiments he conducted on his ranch last winter. For 40 days he fed a band of 160 hogs with crushed wheat, moistened with cold water, the feed being weighed daily by the man in charge.

One dollar and ten cents a bushel was realized for all the wheat fed during that time. Had this wheat not been disposed of in this way it would have brought but 75 cents a bushel.

It would even pay to buy wheat at the market price and feed it to hogs, Mr. Townley claims. He advises maintaining well-bred hogs and in using alfalfa in conjunction with wheat.

Driven to Desperation.

Living at an out of the way place, remote from civilization, a family is often driven to desperation in case of accident, resulting in burns, cuts, wounds, ulcers, etc. Lay in a supply of Bucklen's Arnica Salve. It's the best on earth. 25c, at Tallman & Co., drug store.

HOW TO GAIN FLESH

The life of food is the fat within it—the more fat the more real benefit from the food; that is why cod liver oil is a powerful builder of flesh.

Scott's Emulsion of pure cod liver oil solves the problem of how to take cod liver oil. That is one reason why doctors have been prescribing Scott's Emulsion for all wasting diseases, coughs, colds and bronchitis for almost thirty years.

What Others Say About the Underwood

walla Walla, Wash., April 16, 1903.

J. S. Kees, Pendleton, Oregon.
Dear Sir—Re lying to your enquiry, I beg to say that I purchased an Underwood typewriter in 1896, and it has been in continuous hard use ever since.

I have not seen any of the new models, but this is a specimen of the work done by my machine after nearly seven years usage. I would not exchange it for any other make.

The only repairs I have had to the machine is to have the platen renewed twice during the time I have had it.

This was rendered necessary by the large amount of tabulating work, and the hard usage it was subjected to in manufacturing.

Signed—Yours Truly, S. B. CALDERHEAD.
