COST OF RAISING WHEAT.

One of the most interesting and vital facts in relation to western farming brought out by Rinaldo M. Hall, in the new edition of "Oregon, Washington and Idaho," issued by the O. R. & N. Co., and the Southern Paeffic lines in Oregon, is the compatative cost of producing wheat in the Inland Empire and in the famous Red River valley

These two sections of the United States are representative wheatgrowing districts and the facts are gathered from farmers who are farming on land and not in books.

The special character of the climate and the great diversity of industries that is possible on the farm in the Inland Empire, aside from the greater yield and the reduced cost of production of wheat, make this section the most favored farming country in the United States today.

Wherever this valuable book goes it will attract the best and thriftiest class of people to the West, by its authentic and detailed array of figures and facts on the matchless resources of the "Oregon country." Following are Mr. Hall's compari-SODE

The cost of wheat production in the Inland Empire is relatively so much less and the yield so far ahead. of many much-advertised and boasted sections of the United States, that actual returns from harvest fields are often discredited by those who have not visited the region.

Under date of November 8, 1902, Mr. John Carpenter of Forest River. N. D., writes that the yield in the Red River valley for the year 1902. was from five to 35 bushels per acre: that the cost of raising a 35-bushel bumper crop was \$7.50 per acre, and that wheat at that date was worth his spare time on a device which 60 cents per bushel, which means that the net profit from an acre on wheat land in the Red River valley that yielded 35 bushels in 1902, was \$13.50.

"In the great Inland Empire, the cost of raising an acre of wheat ready for market is between \$5 and \$7. Assuming that it is \$7.50 per acre, which, according to Richard McGahey, or Walla Walla, authority on the subject never exceeds that amount, in the case of Samuel Drumheller, who, in 1902 from the uplands of Eastern Washington, raised 10,560 bushels from 160 acres, an average of 66 bushels per acre, at the market price, 65 cents per bushel, means a net profit of \$5,664, or \$35.40 per acre, nearly three times the profit of that from an acre in the Red River valley. To Bruce Ferrell, in the same county, who threshed 23,250 bushels from 420 acres, an average of 56 bushels per acre, it means a net profit of \$11,962.50, or \$28.25 per

"In Eastern Oregon and Northern Idaho, where the cost of production is about the same and the yield equally as large, similar profits are made. Scores of authenticated yields of

from 40 to 681/2 bushels per acre could be cited for the Inland Empire, 1902, and when it is known that the average wheat yield of the entire United States is only about 17 bushels per acre, the profit of wheat raising in Oregon, Washington and Idaho is readily seen

"A. B. Conley, of the Grande Ronde valley. Eastern Oregon, threshed from his 7,000-acre wheat field, 1902, enough to add \$100,000 to his bank account. Robert Jamieson, who has farmed near Weston, Umatilla county, for 32 years, does not remember when his wheat made less than 4 bushels per acre and it has often averaged 65 bushels.

It is possible that the entire cam paign in favor of the initiative and referendum will have to be fought over by the friends or direct legislation, in this state. The enemies of the people have made a start toward the destruction of the law, and are going to use every means to annul it. It now depends upon the supreme court to say whether the wishes of the people or the politicians shall be unheld.

The Milton Irrigation district which is to be voted upon July 21, is the first district to be formed in the state under the law of 1895, and should be established, by all means. It is the beginning of a new era in Umatilia county and in Eastern Oregon, and is an organized and systematic manner of handling the subject of irrigation in the community

The unpleasant features accompanying the city election in Walla Walla should drive the thought of political division in municipal camnaigns from the minds of all voters, a litter of fine plgs. The contest is always resolved into a struggle between the forces of right and wrong in the end, and all lovers of good government belong on one side

The Telegram asks "Why will the negro persist in committing crimes that invite such horrible fates?" That is easy. For the same reason that each succeeding generation of mountain lion lies in wait on the forest path for the defenseless deer. It is the unreasoning nature of the animal, and always will be

The alarming increase of suicide will drive the insurance companies to raise rates, in self-defense. Antisuicide provisions will be made in policies, just as anti-soldiering clauses are now inserted by many of the leading companies

EDISON'S FIRST INVENTION.

A statement that has been going rounds of the press of the state of late, relative to the great number of inventions patented by Thomas A. Edison makes no mention of his first labor-saving device, which, though though it cost him dearly, was never sent to the patent office or placed upon the market, though it did the work for which it was designed, perfectly,

This invention, forgotten by all ave a few old telegraph operators and the wizard himself, was thought out in the days when Mr. Edison his daily her the Boston-New York night wire of what is now the Western Union Tel-egraph Company The nav egraph Company. The pay was not particularly large, but the work was his official call and sign, it being arder to make sure that the man at the Hub end of the wire was attending to business, arranged for him to call every hour after midnight, give his official call and sign. being argued that this would keep him awake. It did keep Edison awake for a few weeks. Then he set about utilizing would beat the "smart ruled the New York office. "smart ones" who

The result was all that could be expected from Mr. Edison's successes in later life. It was an arrangement of a battery with a clock and a cir cuit-breaking instrument which, at the proper time, would give New York the looked-for signals. For weeks it was the marvel of Mr. Edison's friends that he got along with so little sleep. Then the denouement came in the form of a call for Boston from New York with a very important message. Though Hoston had signaied but a few moments before, it was found impossible to "raise" that city when it was necessary to send the message. Nearly an hour later the New York operator was pounding

THE PURE GRAIN COFFEE

If you use Grain-O in place of coffee you will enjoy it just as much for it tastes the same; yet, it is like a food to the system, distributing the full substance of the pure grain with every drop.

TRY IT TO-DAY. At erocers everywhere: 15c, and 25c, per package away, when the circuit was opened and the sender gave off "Bn. Ed. O. K." Immediately the call for Boston was renewed, when the magic signal was again repeated. All night long the wire was watched, and when morning came the manager at Bos-

ton was asked to explain the mystery.

The manager, a canny Scot, knew a thing or two, or at least he thought he did, and without saying a word to anybody examined the clock and Edi-son's locker, finding there the tell-tale wires and mechanism. That night, when the future "Wixard" showed up for work, he found that the manager had decided to give him "30"—which telegrapher's talk spells discharg

Edison knew well enough what he was discharged for, and so left the next day for New York, and the career hich has since made his nan household word the world over. which Philadelphia Ledger,

UNPRECEDENTED LUCK.

israel Long, a prosperous young farmer of Linton, Greene county, Indiana, had a remarkable run of luck Sunday and declares in the exuberance of his joy that he has beaten the record of President Roosevelt as a maker of prosperity. When Mr. Long rose he found himself the father of a 10-pound baby boy, the first child that had been born to him, and he arranged at once to go to church twice that day in evidence of his appreciation of the advent of the younger Long.

Then he went into the meadow and found the family mare fondling a which had arrived some time during the night. A short distance away he his Jersey cow, one of the finest in the country, rejoicing over the possession of a helfer calf, which is even a finer breed than its mother. The new arrivals were viewed with something like the feelings with which he had looked upon the face of the newcomer at the house, but as he wandered his way back to the house he ran across the old black which was intent with care for

Long went to the barn to see if any thing else were to be added to his good fortunes for the day, and disovered one of his guinea hens just leaving the nest with a brood of 14 young guineas which had come out of the shells during the night. the incidents to a neighbor at church that day, and said: "Just to think of it! A young Long at the house, a fine colt and a finer Jersey in the meadow, nine Poland China pigs, and as pretty as they make 'em. and 14 young guineas at the barn, and all in one night, and all the moth-ers doing well."—Chicago Record-Herald

MUST BE SOLD TO SETTLE ES-TATE.

I have a farm of 186 acres, located in the heart of the famous Grand Ronde valley. Its soil is a rich deep am. It would make an ideal site for stock farm for blooded stock. It It. has bearing fruit trees and splendid hay fields. It is on the Grand Ronde-Cove road and is but three miles from hot springs on the place, which are worth the price of the whole property. There is a 15-room house, good barns and outbuildings on the place. paying well now, but the revenue could be readlly doubled with small outlay for additional baths and rooms

women well.

"I wish to add my testimony to hundreds of others as to the value of Dr. Pierce's medicines," writes Mrs. Ids. M. De Pord, of Latona, Rubbard Co., Minn. "Have doctored with a great many physicians—some specialists; have twice been in a hospital for treatment. My case has been regarded as a hopeless one, and they knew not what the trouble was. Heart was had; stomach all out of order: tired out; severe pains is all parts of the body; sinking spells, and nearly every ailment a woman could have. I took many a bottle of 'patent medicines' without effect. I began taking Dr. Pierce's Paworite Prescription, and ten months afterward I gave birth to a ten-pound boy. All physicians had stated as a fact that I severe round bear a child. Both the baby and myself were strong, and I got along splendidly—thanks to your undicine."

The Common Sense Medical Adviser, 1008 large pages, in paper covers, is ser free on receipt of 21 one-cent stamps to pay expense of mailing only. Address Dr. R. V. Pierce, Buffalo, N. Y.
