ARE CHANGING LABORERS

Japs Not a Success as Workingme -Importation From Southern Euope Not Much Better-Both Ar Contract Laborers.

The railroad corporations of the West are tiring of the Jap, as a trace laborer and are jumping out of the "frying pan into the fire" by hiring a mongrel horde of Greeks, which possesses all the faults and none of the virtue of the Japs.

The Jap becomes so independent, after a couple of years in the United States that it is impossible to depend upon him with any certainty. He quarrels with the white boss, works only when he feels inclined, and be comes dissipated. The fact of the matter is, 10 Japs will not do the work of five good white men on a track, and they never do the work as intelligently. They are quick to learn, saving of their money, and very duriable for the first year, but become head-strong and unbeatable with lead strong and unbearable with longer acquaintance. They are con-stantly changing their location, removing from gang to gang and are an endless source of trouble to the track lepartment.

As a relief from this condition, the cuspanies are now bringing into the country, as fast as they can induce them to shake off their attachments that bind them to the slums and cess pools of Europe, a horde of Greek, and monarel laborers. This addition to the population of the country is no better than the Jap, as they are no better than the Jap, as they are foreign to every American idea and instinct and not so cleanly, personally, as the Jap. They are more slow to pick up American ways, slower to learn the work required of them and more dissipated after a short residence than the Jap. Most of these people calling themselves Greeks are mongreis from Sicily and Sardinia, Macedonians with an Italian University. Macedonians with an Italian tinge, renegade Bulgarians and Tyrolese la borers and a general collection of promiscuous nativity, which would stag-ger the bureau of ethnology to figure

nealt Italian as Greek. Not one in tho of them know a Greek letter when they see it and not many of hem write letters home in any lancoage, while the Jap is a greater etter-writer than the American work-

About the only advantage to the country in general of the Greek la-borer over the Jap, is that the Greek buys and eats more American products than the Jap. The basis of the food of the Japs is the Soy or bean julce, which they ship here in casks and which they ship here in cases and which enters into every meal with more or less regularity. The basis of the meal of the Greek is bread and the oven is the first possession of the gang of Greeks. The Greeks are not as cleanly as the Japs. They do not acquire one-half the civility to strangers as the Jap and are more clannish and insolent. Their general appearance is little bet-ter than that of the Asiatic, and their

intellectual gifts are not so great.

The main point of resemblance between the two classes, however, is the fact that both are contract labor. ers under a system of padronism, which destroys their value as citi-zens. They are nothing more nor less than slaves under the Greek or Jap contractor, until they learn enough of American practices to throw off their bondage and look for a job on their own account.

### No Pity Shown.

"For years fale was after me con-tinuously," writes F. A. Gulledge, Ver-bens, Ala. "I had a terrible case of piles causing 24 tumors. When all pens, Als.
