POLICE FIGHT TO BREAK UP A TREMENDOUS CROWD

Shoot and They Declare Their Purpose to Carry it Out-Whole Situation is Extremely Critical and Bloodshed is Imminent,

Chicago, July 16.—A wagon from the Kellogg Switchboard Company this morning started to deliver freight. Milwaukee railway strikers and sympathizers soon surrounded it with 2,000 hooting, yelling and turb ulent men. All along the route to the factory hands raised windows and added to the din. In some instan-ces missiles were thrown, but with-

out injuring anyone seriously.

Numerous arrests were made of drivers who attempted to blockade

the route with wagons.

Day was operated on by Company Surgeon A. E. Rockey and Dr. L. E. Irvine shortly after 9 o'clock. They found the bullet, which was a 38-caliber entered the right side of the back, about eight inches from the spine. It fractured the tenth rib and lodged against the spinal column, traversing about eight inches of flesh and bone in its course. It tore a piece of cloth from Day's coat, carrying it on its leaden point the full course. It made a very large hole in the flesh. Dr. Rockey has the bullet in

Police Theories.

it is the general opinion about police headquarters that the robbers are a part of a crowd of swell-dress-ed men who arrived in the city over the Northern Pacific from Seattle two days ago. The men were known to the police as "bad actors," but none of them had been arrested. One officer who saw them leave the train states that they were run out of Spokane some time ago, and that they are a hard set, known to be crooks of daring and ability to turn just such a trick as that last night.

FLY BY AEROPLANE.

Professor Langley Resumes His Experiments Near Washington,

Widewater, Va., July 16.—Profes-or Langley's flying machine is on a house boat anchored two miles from the Maryland shore. The professor will arrive this afternoon. The wide expanse of water with lowlands on either side make an ideal experimenting ground. It is understood the first tests will be made with models. One

of Langley's assistants will make the first flight with the big machine.

The macaine as it appears is about 65 feet long by 15 feet wide at the center, and tapers to points. It has four aeroplanes. The operator's platform hangs below the body. A gasoline motor gives power.

OPEN PORTS TO ALL THE WORLD

China Promises Them, and Russia Says it Will Be All Right.

DIPLOMATIC TRIUMPH

FOR THE UNITED STATES.

Indicates Increasing Good Will Between China and America and That Russia's Feelings Are Not Hurt Over the Protest About the Massa cre of Jews at Kishineff.

Washington July 16.-China has notified the state department that she intends to open several ports in Manchuria to the commerce of the world. The Russian ministry officially confirms this, and says the exar has no objections.

The state department considers the opening of the ports as a tous concession to principles for which America has contended from the start. Minister Takahira, of Japan, called on the department this morning, but brought no news. It is apparent he was not given informa-

tion.

This declaration of China, accompanied by the formal acceptance of Russia, means an additional victory for Hays' diplomacy in China, and will undoubtedly bind that country to America more firmly than ever.

Russia's acceptance also means that no acrimony exists at St. Petersburg over the Kisihneff petition, and it is probable some arrangement has been already reached on that point, although it is not officially disclosed that there has been.
