MORROW COUNTY CROPS.

Fall Sown Grain Will Average 20 Bushels Per Acre.

F. P. Vaughn, one of the prosperous Eight Mile farmers, left a few sample heads of Scotch flint wheat at the Times office Monday while in town, says the Heppner Times.

These wheat heads are from five and a half to six inches in length, have four to five good plump grains to the inch. He has 150 acres of this wheat, which he thinks will yield 20 to 25 bushels per acre, while some of his neighbors think it will go 30 bushels per acre.

Mr. Vaughn has about 500 acres in all in wheat, which he thinks will average about 15 bushels to the acre.

All grain sown in summer fallow last fall will make about as good a crop as last year, and would have been better but for the fact that the stand is not as good as last year. Mr. Vaughn thinks the fall sown grain

will average between 15 and 20 bushels per acre in the Eight Mile country, but owing to the fact that a great deal of the grain is spring sowing, on account of the weather conditions last fall, the general average will be cut down considerably.

THE WEEK'S WEATHER.

Summary of Temperature in Pendleton for Seven Days.

Local Weather Observer R. P. Bryson, furnishes the following summary of the weather for the past week. There is nothing remarkable about the report, except the very low temperature reached about 3 o'clock Wednesday morning.

The thermometer went down to 31 degrees at that time and more than one citizen who went to bed with the usual allowance of summer covering got up and pulled down the window, hunted up another quilt and closed the transom. Following is the maximum and minimum temperature for the week:

	Min.	Max.
July 10	58	95
July 11	58	94
July 12	53	89
July 13	54	77

Kilgore Had a Narrow Escape.

While driving some stock to the city yesterday, Ed Kilgore of Athena, met with an accident which might have been worse, but fortunately resulted in nothing serious. One of the horses being driven broke from the band and started back the way it had come, and the boy attempted to head it off. The animal Kilgore was riding was a two-year-old colt and but half broken, and in the excitement of the chase jumped into a ditch alongside of the road and caught the rider under him as he fell. Both horse and rider lay in the ditch for some time, and when at last the colt did get up its rider was powerless for a time to use his leg. However, after a time he recovered the use of the limb and came on to town. Besides a few bad bruises and the shock of the fall he is none the worse for the experience.

The beds of peas in Colorado sometimes include as many as 2,000 acres and there is one bed exceeding in size 2,500 acres.
