THREE BIRTHS.

Natural Increase in Population in This Vicinity.

President Roosevelt is mistaken as to his race suicide theory, inasmuch as the doctrine applies to Pendleton at any rate. On the 16th a boy was born to the wife of Carl Swanson on West Webb street; on the evening of the 17th the stork visited the home of Mr. and Mrs. John G. Richardson at Cold Springs, and left as a memento of his visit a bouncing baby boy; and on the evening of the 19th, Mr. and Mrs. Arthur Haney were made glad by the advent of a little girl at their home on Stonewall Jackson street.

All of the children and all of the mothers are doing well, and the fathers are buying the cigars and other things in keeping with the state of the weather which are demanded by the friends of the families.

To Seaside.

Rev. W. E. Potwine, accompanied by his father, N. W. Potwine, his sister, Miss Ida E. Potwine, and by Miss Edith Johnson, left this morning for Seaside, where they will spend the summer. Rev. Potwine, however, will return in a few days to be at his post here.

Merchants' Lunch.

During the hot weather you can save your wife the misery of cooking over the hot stove by going to the Merchants' Cafe (formerly the Mazepa) and getting a hot lunch for 15c, between 11:30 and 2 p. m.

How to Prevent

The spread of infection and contagious diseases is a matter in which all are interested. In order that our customers may have the most modern method of disinfection, as well as the safest, simplest and most reliable, we have added to our already complete drug stock a fine line of

SOLIDIFIED FORMAL-DE-HYDE and FORMALDEHYDE GENERATORS.

Besides being an ideal sick-room disinfectant, it is unequalled in fleas, insects of all kinds, etc. See them in our window and come in and let us tell you more about it.

COUNTY POOR FARM

BUILDINGS ARE NOW NEARLY COMPLETED.

Reservoir to Supply Water to Farm and Buildings About Done—Cottages and Quarters for Inmates Are Conveniently Arranged.

In this utilitarian age Umatilla county is as businesslike as the next one and in evidence of that fact can be brought to mind the new venture at the poor farm where the workmen are now completing the buildings for a new departure in the problem of caring for the poor of the county. About two miles south of west of the city is a tract of 160 acres which the county has bought for a poor farm. It is part in the valley and part in the river bed so that when it is brought under the care of the management and is given the advantages of irrigation it will be made a garden and an ornament to the county government.

The entire tract will be irrigated from a reservoir which is now half completed and will soon be ready for the water. This reservoir is situated on the top of a hill near the cottages and from it the water will be piped over the houses and trrenched out over the land. The water will be pumped into the reservoir from a well on the place and is a good water as there is in the country. It will be pumped up by a gasoline engine and there is sufficient of it to supply all of the demands of the farm.

Two Cottages Under Way.

There are two cottages under construction at present and they are situated near the road on the front of the county's holdings. The one nearest done is the cottage to be occupied by the superintendent and his family as a dwelling.

From the front door you enter a long hall from which the stairway to the upper floor takes its start. At the right of the hall as you go in is the large dining room where the inmates of the farm will take their meals. It is a room 12 feet and 3 inches wide by 21 feet 3 inches long and will be capable of seating all of the people the county will have to feed for some time to come.

The floor will be oiled, as will all of the floors in the building.

Passing through the dining room you come into the kitchen which is large and convenient as can be made. It is well lighted and well ventilated and will be a model in every way. On the opposite side of the kitchen, from the large dining room, is the pantry, which is well supplied with shelves and drawers for the convenience of the cooks. A large sink will be placed in it so that the dishes can be handled as close as possible to the place where they are used.

Opening out of the pantry is the family dining room to be used by the superintendent and his family. It is a pleasant room, well lighted and finished in the natural wood.

Officers' Quarters.

Up stairs there are four rooms for the use of the officers of the place, as sleeping rooms. At the present time all of them will not be required by the superintendent's family and it is possible that some of the inmates of the farm may be placed there. The rooms are large and well placed as regards ventilation and light and will be cool and pleasant.

All of the plastering used in the finishing of both of the cottages is the acme plaster, a compound imported from Texas, and which is almost as hard as cement. It is put on with great care by the contractors and especial precautions have been taken to prevent its cracking on the walls. Wire lathing has been used in most of the construction and all of the woodwork has been so made as to overcome the tendency to draw at the corners, thereby reducing the danger of shrinkage and subsequent wreck of the plaster.

Inmates' Quarters.

The second cottage and the larger, is to be the home of the inmates of the farm and there all of the work pertaining to the household with the exception of the cooking will be performed. In it will contain 15 rooms of which about 10 will be for the sleeping apartments of the inmates.

Heating Plant.

In the basement, which extends

over the whole ground area of the house, will be located the heating plant and the laundry. The place will be heated by hot air and the plant is as perfect as could be devised. No cold air will be admitted direct from the outside, but it will all be tempered before it is put in the ventilators. The air coming into the ventilating pipes is first taken to the attic, and then forced down again through the air space in the big chimney and from there carried to the rooms to furnish fresh air to the people.

The central chimney is large and through its center the iron pipe or stack carrying off the smoke from the heater is run. As all of the air used for the ventilation of the house has to pass the length of the chimney around this pipe, it will be seen that there will be no cold air admitted to the rooms.

Laundry.

The laundry is also in the basement and covers 26x36 feet of the floor space. It will be equipped with three cement tubs and several washing machines and a wringer. In fact, it will be a complete little laundry plant and will have all of the conveniences of the larger places. In it will be done the washing of all the people connected with the place. The dry room will be close to the furnace and will be heated by it.

On the first floor will be found the sitting rooms. One of the rooms will be on the right of the hall as you go in and the other on the left. The rooms will both be about 12x14 feet.

The surgery will be on the first floor and will be in the southwest corner of the building. It is a room 15x13 feet in dimensions and will be well lighted. It is plastered with the acme smooth plaster and will be painted with several coats of white enamel paint. There will be no wood in the room except the floor and the window sashes and the doors. The casings are all of galvanized iron, and the floors will be oiled and polished. Adjoining this room is the drug room, a smaller room 10x12 feet, well supplied with shelves and drawers.

On the second floor there are four rooms each 12x22 feet. These are to be used by the men as sleeping apartments and will each contain five or six beds. All of the men are to be kept on the second floor and the women on the first.

The bath rooms will be found on both floors and will be fitted with the best porcelain tubs. Adjoining the bath rooms on both floors are the closets, fitted with modern plumbing and as sanitary as can be made.

The plumbing in the buildings is the most complete in the county, for it has been put in piece by piece and every precaution taken to make it lasting and effective. It is trapped in several places, and has a fresh air vent pipe that takes away the least chance for the gas from the cesspool getting into the houses.

The total cost of the place will be in the neighborhood of \$10,000, which will include not only the buildings, but the sewerage and plumbing as well. When the place is ready for the inmates to be moved from their present location it will be a model farm and as soon as it can be straightened out in the details it will be a self-paying proposition and the care of the poor of the county will be no added expense to the government.

Dennis Nichols is the architect in charge of the work, and has been the overseer of all of the labor done. He has planned the buildings from the ground up and has been at the spot continually since the work was begun.

All of the work with the exception of the carpenter work was done by contract, and the latter was done by the day.

CORNERSTONE TO BE LAID.

New Methodist Church of Athena Progressing Nicely.

C. E. Troutman, architect, who designed the new Methodist church at Athena, visited that city this forenoon for the purpose of inspecting the work.

The stonework for the foundation and basement is progressing very satisfactorily and the cornerstone will be formally laid on Wednesday, July 23, attended with appropriate ceremonies.

The church building will be an imposing and beautiful structure and will be equipped with a hot air plant for heating purposes and all other modern improvements.

The new Christian church at Athena is one of the finest buildings in Eastern Oregon, and with the completion of this edifice for the Methodists, the little city will take front rank in the inland Empire as the builder of churches. The two buildings will represent an expenditure of nearly \$25,000.

Will Ship to Canada.

E. E. Willard, a stock buyer of La Grande, is in the city for a few days, having arrived yesterday from a visit through the Yukon country. Mr. Willard expects to make a shipment of horses to Alberta, Canada, in the near future. He leaves tonight for Wallowa county.

Drunk and Disorderly.

In the police court this afternoon Dan Burke was given two days for being drunk, and William Davis was sentenced to 10 days in the city jail for disorderly conduct. Both of the men are transients and were unable to pay a cash fine.

PERSONAL MENTION.

G. W. Biggs, of Arlington, is in the city on a short business trip.

Mrs. A. D. Stillman is quite sick at her home on Water street.

A. Vinson, of Walla Walla, was a business visitor in the city yesterday.

A. B. Stevens, of Umatilla, was a visitor in the city today on business.

O. H. Reeder, of Athena, was a guest of the Hotel St. George yesterday.

R. B. Stanfield, the Echo sheepman, is in the city today on a short business trip.

A. Niebergall, of Walla Walla, is transacting business in Pendleton for a few days.

Neva Hodder is visiting a few days in the country, at the home of her friend, Bernice Royce.

F. L. Hammond, agent for the New York Mutual Life Insurance Company, visited Adams today.

Frank Hammond went to Adams this morning for a short visit in the interests of his business.

S. V. Knox, the attorney of Weston, is registered at the Pendleton and is in the city on legal business.

J. F. Clemmer, of Dixie, is the guest of his cousin, A. C. Fink, of the Sheriff's office, for a short time.

Bert Blair, of Mencham creek, was in the city yesterday transacting business and meeting his friends.

Henry Blackman, of Heppner, one of the important stockmen of that section, is in the city on business.

Mr. and Mrs. Leon Cohen, of Pendleton, are at the Hotel Portland, en route to the seaside.—Oregon Daily Journal.

Charles Gerking, of Athena, is at the Hotel St. George for a short time, having come to the city for the transaction of some business.

Mr. and Mrs. T. J. Cheney left this morning for Seaside, where they will spend the summer. They were accompanied by their little child.

C. H. Bingham and W. J. Homer, of the Indiana State Insurance Company, went to Milton this morning in the interest of their company.

Mrs. G. A. Robbins, accompanied by Miss Hazel Hamblin, has gone to Lehman Springs, where they will spend the hot months of the summer.

GRAIN-O THE PURE GRAIN COFFEE

In comparing Grain-O and coffee remember that while the taste is the same Grain-O gives health and strength while coffee satters the nervous system and breeds disease of the digestive organs. Thinking people prefer Grain-O and its benefits.
