WHEAT AND BARLEY

OFFERINGS ARE LAGGARD, BUT ARE IMPROVING DAILY.

Barley is the Banner Crop This Year—There is no Jangling in Umatilla County Between Producers and the Market—Considered That Chances Are Good for Better Prices for Wheat.

It is about the time of year when the people of this city will see the grain wagons begin to string into town with their loads for the warehouses, but not quite. Now and again you can see an outfit on the streets at this time, but they are few and far between...

Advices received from Athena and vicinity, say that the harvest is on there and that the yield will run from 30 to 35 bushels to the acre, and that the grain is plump and hard and well filled in all the fields.

Barley all over the country is the banner crop, as it has yielded better on the average than has the wheat, going from 35 to 45 bushels, though on the whole it might be safe to say that it has averaged 40 bushels the county over.

At the local warehouse and at the one at Mission, the grain is coming at the rate of 700 sacks a day and has been for several days, but this will be vastly increased as soon as the harvest is over and the farmers have the time to give to hauling.

The tale of the warfare between the wheat growers and the buyers is the same old story told from year to year by the chronics of the country, and the same old tale that will be told as long as there is a wheat grain in the county.

The rantists say that the growers are holding their wheat for 70 cents and will not haul for less than that price, but the growers claim that it is not time to haul, for the simple reason that the grain is yet on the stalk in most of the fields.

However, the outlook for an advance over the prevailing prices seems to be good in the estimation of some of the conservative men of the county who not only grow, but buy wheat.
